# Fall 2024 Oishi Symposium

Thursday, October 17, 2024

8:00 – 11:00 am

Chicago, IL

---

# WELCOME!

In honor of Dr. Noboru Oishi, who was a great supported of Oncology Research, the Oishi symposium focuses on key issues related to Oncology Research Professionals (ORP).

As always, our gratitude and thanks to the Oishi's for their generous support of the Symposium.

Thank you, Jeri and Noboru Oishi!

---

# Announcement and Updates Oncology Research Professionals (ORP) Committee

Connie Szczepanek, RN, BSN, CCRP  
*Chair, SWOG ORP Committee*

---

# Logistics Details

- Please keep your phone on mute to help with sound quality.
- Questions can be submitted all throughout the meeting via the CHAT icon. We will present them to the speakers during the meeting.
- The presentations will be posted on the SWOG website within a few weeks.

---

# **YOU** are The ORP Committee!

“SWOG holds a fundamental conviction that the Oncology Research Professionals (ORP) play a crucial role in the successful development, implementation, and analysis of any SWOG clinical trial.”

# ORP Executive Committee Members

Deb Bergevin	Erin Cebula	Joyce Nancarrow-Tull
Lisa Stoppenhagen	Sandy Annis	Dana Little
Connie Szczepanek	Liz Edwards	Anthony Hicks
Annette Betley	Caitlin Hutchinson	Jamie Myers
	Kira Pavlik	

# The SWOG Oncology Research Professionals (ORP) Committee & Sub-Committees

## SWOG Cancer Research Network's Mission

- To significantly improve lives through cancer clinical trials and translational research.

## ORP Committee Mission

- To support SWOG activities through promotion of integrity and excellence in clinical research through education, guidance, & collaborative contributions.

# Quick Reference

See the ORP page on the SWOG Website:  
Member Resources > Oncology Research Professionals

## Quick Access to:

- Contact info of Committee Leaders
- Lead ORP (Head CRA) Training Modules
- APP Workshop

The screenshot shows the SWOG Cancer Research Network website. The page title is "Oncology Research Professionals". The text describes the ORP committee as the largest in the SWOG Cancer Research Network, composed of nurses, clinical research professionals, pharmacists, quality managers, and other front-line site staff. It details their roles in protocol development, data safety monitoring, and education. A list of committee leaders is provided, including the Executive Committee Leadership (Chair: Connie Szczepanek, Vice Chair: Dana Little), Nursing Research Lead (Jamie Myers), ORP Liaisons Leads (Sandy Annis, Erin Cebula), Membership Leads (Anthony Hicks, Lisa Stoppenhagen), Education Leads (Deb Bergevin, Joyce Nancarrow-Tull), and Site Operations Leads (Connie Szczepanek, Caitlin Hutchinson, Elizabeth K. Edwards). A photo of Dana Little is shown on the right. At the bottom, there is a "New Resources" section with a link to a meeting recording.

# Get Involved with ORP

Follow the link to the ORP Membership Application on the ORP Member Resources page:

To get more involved please complete the [ORP Membership Application](#).

## Key Involvement Opportunities

- Disease Specific Liaisons
- Liaisons at Large
- Education Team

**It only takes 5 minutes to apply!**

**SWOG ONCOLOGY RESEARCH PROFESSIONALS COMMITTEE  
SUBCOMMITTEE APPLICATION FORM**

Date Submitted: \_\_\_\_\_ Date Received: \_\_\_\_\_

Name & Credentials: \_\_\_\_\_

SWOG Roster ID: \_\_\_\_\_

Current Position: \_\_\_\_\_

Specialty: \_\_\_\_\_

Member Site: \_\_\_\_\_

Business Address: \_\_\_\_\_

Telephone: \_\_\_\_\_ Fax: \_\_\_\_\_

E-Mail Address: \_\_\_\_\_

Apply by November 1

## THE NCTN MAPP PROGRAM

**A year-long mentoring program for Advanced Practice Providers including:**

- Online APP training workshop
- Focused mentoring sessions
- Travel to professional meetings

APPLY NOW

GILEAD

This program is made possible with generous support from Gilead

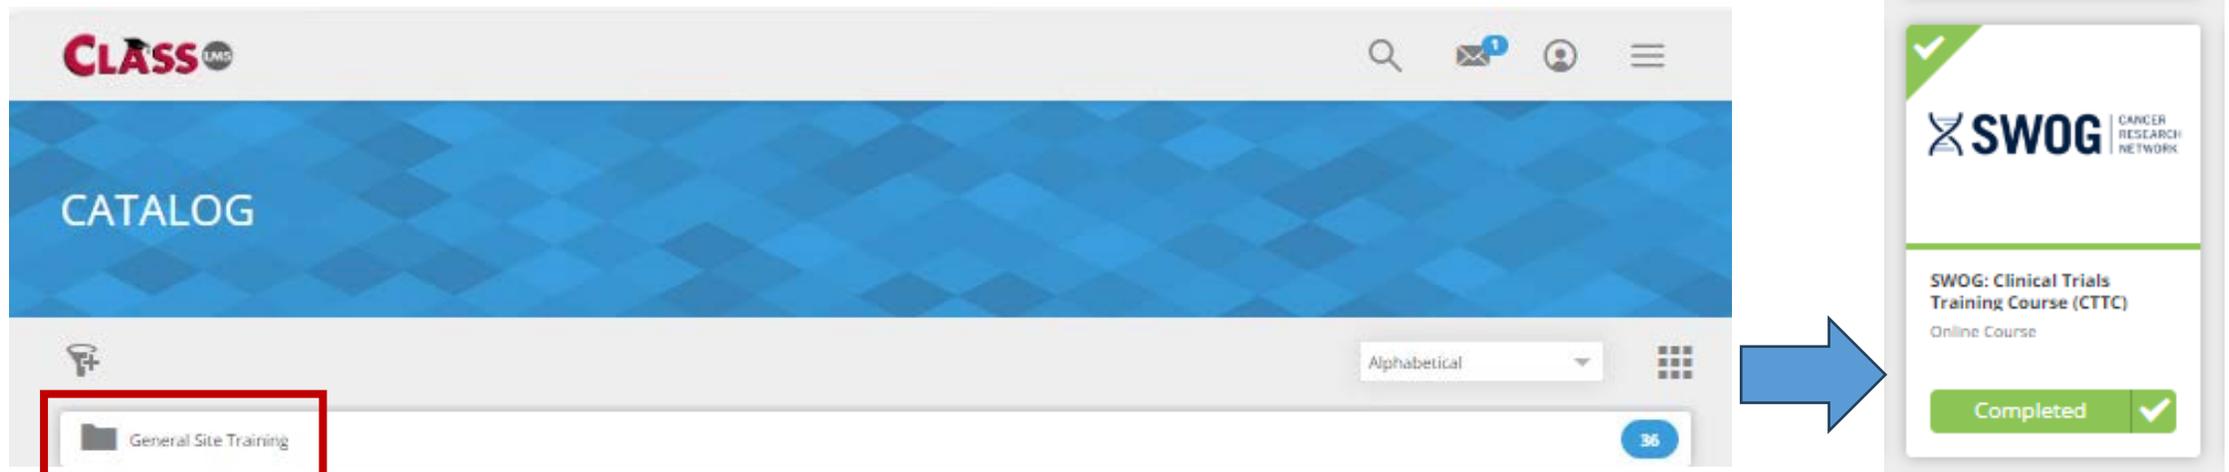

# SWOG Protocol template update – Biospecimen submissions

- SWOG has updated the SWOG protocol template (Section 15) to more clearly communicate biospecimen submission requirements.
- Going forward all newly developed SWOG protocols with biospecimen submission requirements will include a simple summary table at the beginning of the biospecimen submission section of the protocol (Section 15).
  - The table will include the following information: Specimen Type/Amount, Timepoint, whether it is a required submission, and whether a collection kit is being provided.
  - For additional views, sites can refer to sortable tables that will soon be accessible via the SWOG specimen tracking system.

# SWOG Clinical Trials Training Course (CTTC) – Now Posted in [CTSU \(CLASS\)](#)

- The online version of the CTTC has been transitioned to the CTSU CLASS learning management system.
  - Anyone with credentials to access NCI systems can access the course in the CLASS Catalog under the “General Site Training” folder or via the direct link to the course:  
<https://www.ctsu.org/Public/class.aspx?courseid=0b0190ea-b489-4505-b4a3-b8c7a368c0bd>

- Please update any local site onboarding materials to reflect the new CTTC link.
- Effective 10/21/24: Learners will no longer be able to enroll to the CTTC in the SWOG ExpertusOne Learning Management System.
- Learners who previously enrolled in, but have not yet completed, the CTTC in ExpertusOne will have until April 2025 (at time of next online CTTC course updates) to complete the course in ExpertusOne.

# Background/Overview (1)

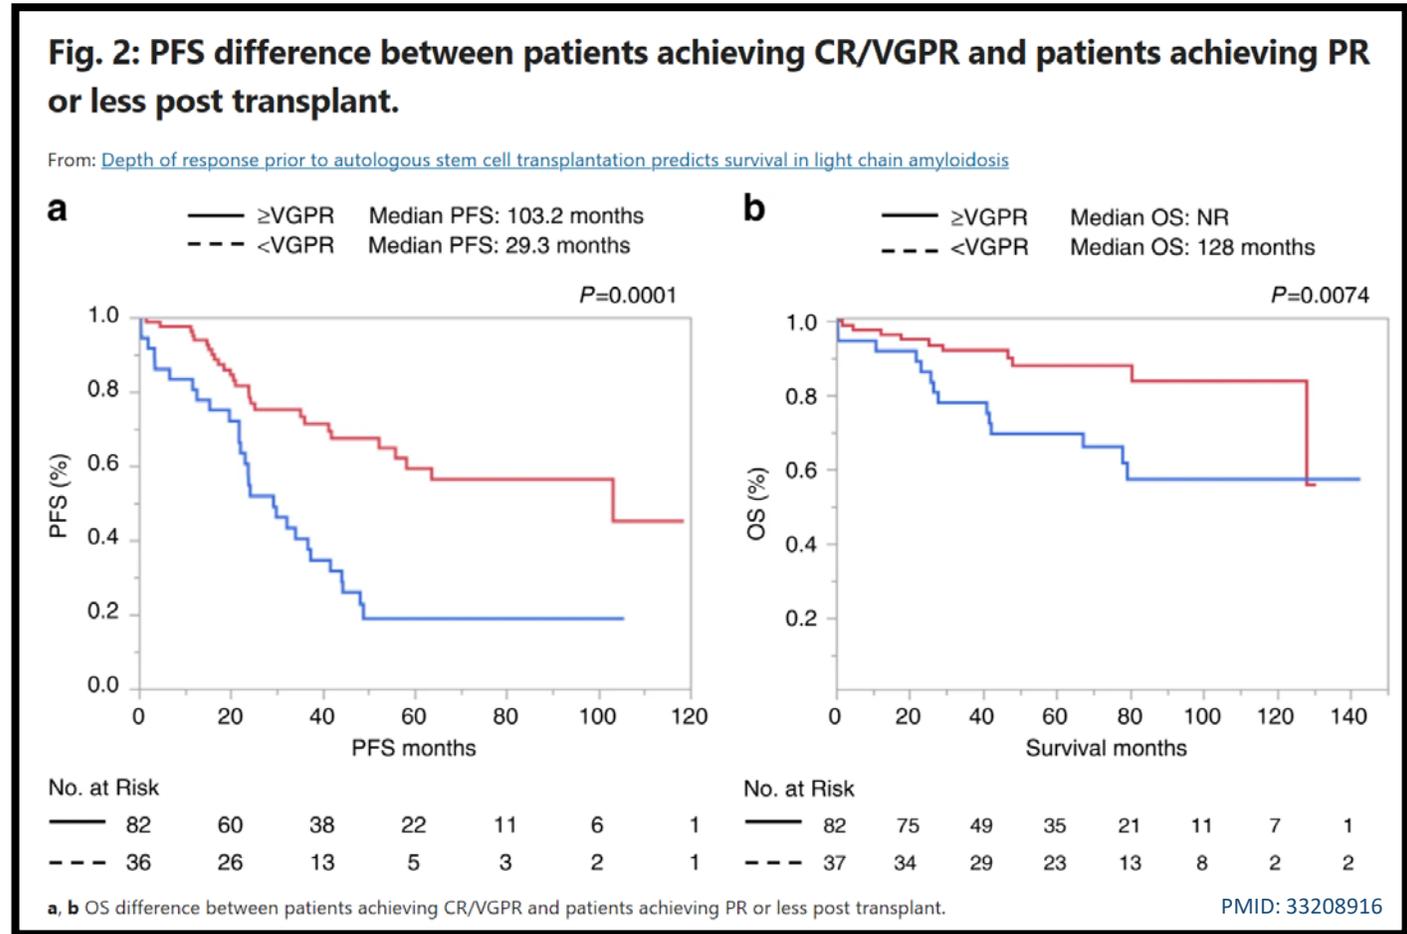

- Jaccard et al NEJM 2007: Only randomized trial evaluating high dose melphalan v “conventional therapy”
  - Outdated and flawed: 24% 100 Day TRM
  - Medians OS only 22.2m in high dose melphalan arm

PMID: 17855669

- TRM now consistently in the 2-5% range at “experienced” centers

PMID: 29558277

PMID: 29933072

# Prior SWOG Quality Assurance Webinars Posted as Enduring Courses

Links to Previous Webinars and Upcoming Webinar Announcements are posted at: [\*\*SWOG Quality Assurance Live Webinar Series | SWOG\*\*](#)

CEU Courses in ExpertusOne:

- [\*\*Workload Prioritization in Clinical Trials\*\*](#) (1.5 contact hours)
- [\*\*Research Protocol Deviations vs Deficiencies\*\*](#) (1 contact hour)
- [\*\*Best Practices for Informed Consent\*\*](#) (1 contact hour)

Non-CEU Courses now in CLASS:

- [\*\*Adverse Event Reporting\*\*](#)
- [\*\*Serious Adverse Event Reporting\*\*](#)
- [\*\*SWOG Audits: Preparing for Success and Audit Process\*\*](#)
- [\*\*How to Develop a CAPA Plan\*\*](#)

# Website Resources – SWOG.org

- [Frequently Asked Questions | SWOG Webpages](#)
- [Training Resources | SWOG](#) includes direct links to SWOG training workshops.
- The [Announcements / Current Training Opportunities | SWOG](#) section of the webpages announces newly published individual training courses that are not part of a complete SWOG training workshop.
  - Includes links to prior Group Meeting presentations (such as [SWOG QA Audits - Top 10 Deficiencies](#), [Improving Specimen Submissions to the SWOG Biospecimen Bank](#), or [Biospecimen Quality, Compliance, Tips and Tricks](#)), links to training for SWOG ORPs, such as: the [SWOG and NCI Systems Overview Training](#) or [NCTN and NCORP Study Funding and Payment Distribution](#), and links to training materials in Spanish.

The screenshot shows the SWOG.org website interface. The top navigation bar includes 'About', 'The SWOG Network', 'News & Events', and 'Clinical Trials'. A dropdown menu for 'Clinical Trials' is open, showing options like 'Biospecimen Submission', 'Biospecimen Access', 'Clinical Trials Search', 'Clinical Research Resources', and 'Frequently Asked Questions'. The 'Clinical Research Resources' link is highlighted with a red box. The left sidebar contains a 'Clinical Trials' menu with 'Frequently Asked Questions' highlighted by a red box. The main content area is titled 'Clinical Research Resources' and features a section for 'ANNOUNCEMENTS / CURRENT TRAINING OPPORTUNITIES'. A red arrow points from this section to the table below.

# SWOG Training Resources List for Oncology Research Professionals – Transitioned to CTSU.org

- ORP onboarding and training resource list (previously under the [Clinical Research Resources](#) section of the SWOG website at: [SWOG Training Resources List for Oncology Research Professionals](#)).
  - Includes links to federal and Lead Group training and clinical research resources for oncology research professionals.
- These resources have been transitioned to CTSU.org: [Resources >> Researcher Resources](#).
- Thank you to NCI, CTSU! and Lead Group WG members.
  - Please update any local site bookmarks / documents to reflect the NEW compiled researcher resources (downloadable) spreadsheet link (below):
    - <https://www.ctsu.org/readfile.aspx?EDocId=1937857&CTSUCreated=Y>

# CTSU Researcher Resources

- Additional resource links are now accessible on CTSU.org under Resources >> Researcher Resources.

The screenshot shows the CTSU website interface. At the top, the logo for the Cancer Trials Support Unit (CTSU) is visible, along with navigation links like 'My Account', 'CRISP', and a user access update. The main navigation bar includes 'Home', 'Protocols', 'Dashboard', 'Regulatory', 'OPEN', 'Data Management', 'Auditing & Monitoring', 'RUMS', 'Delegation Log', 'Resources', 'Collaboration', 'CLASS', and 'Reports'. The 'Resources' menu is open, showing a list of sub-items including 'Experimental Therapeutics Clinical Trials Network (ETCTN) Program', 'CTSU Operations Information', 'Protocol Specific Materials', 'Researcher Resources', 'Educational Multimedia', 'Site Advisory Panel', 'Translated Short Form Consents', 'Disease Portfolios', 'FAQs', 'Glossary and Acronyms', and 'LPO Resources'. The 'Researcher Resources' sub-menu item is highlighted with a red box. In the left sidebar, the 'Resources Browser' section is visible, with a red box around the 'Researcher Resources' folder. A red arrow points from this folder to the main content area of the 'Researcher Resources' page.

## Researcher Resources

This section provides links to a broad assortment of resources that should be useful to those working in the clinical trials environment. For more information, click on the Help Topics icon.

For a downloadable and sortable list of most of the items within these folders, view the [Compiled Researcher Resources List](#). This list includes columns for the topic area, the posting category (i.e., sub-folder(s) within Researcher Resources), target audience, and information about the resource itself. Note that while new items may be posted to these folders at any time, the list itself will be updated quarterly.

# Reminder: SAE Reporting Requirements updates

- Effective August 30, 2024 NCI implemented a global safety update to the notification procedures for serious adverse events (expedited reporting requirements).
- The primary change is to require 24-hour notification to IND/IDE sponsors for ALL SAEs, irrespective of grade/severity, if the AEs meet any of the SAE criterion defined in FDA regulations, followed by a completed expedited report in 5 or 10 calendar days.
- Affected trials include: All CTEP-supported Clinical Trials Networks and Consortia IND/IDE trials (and any trials supported by another organization under CTEP IND) that:
  1. Use the current CTEP expedited reporting tables (effective date of May 5, 2011) and
  2. Still have patients on treatment as of August 30, 2024 (i.e., trials that have a status of “Active”, “Closed to Accrual”, or “Temporarily Closed to Accrual” as of that date).
- For more information, refer to the Memorandum and list of [Protocols with Updated Adverse Event \(AE\) Tables](#) posted on CTSU.org.
- For questions on reporting requirements for SWOG-led studies: Email [adr@swog.org](mailto:adr@swog.org).

---

# And Before We Proceed - Feedback is Needed!

A successful Oishi Symposium and Open Forum are only possible with your valued feedback! Please use the link below or QR Code to fill in the simple Qualtrics Survey and tell us what you liked, didn't like, or want to see in future meetings! We value and use your feedback every time! Thanks!

[https://yalesurvey.ca1.qualtrics.com/jfe/form/SV\\_2gbZXcJy2jI2ERM](https://yalesurvey.ca1.qualtrics.com/jfe/form/SV_2gbZXcJy2jI2ERM)

---

# Cancer Trials Support Unit (CTSU) Updates

Krishna Chothwani  
CTSU Protocol Team Manager

# Topics

- Oncology Patient Enrollment Network (OPEN) Modernization
- Institutional Review Board (IRB)-Exempt Studies
- Protocol Deviation (PD) Form
- Roster Update Management System (RUMS)
- Source Document Portal (SDP) and Auto-Redaction of Personally Identifiable Information/Protected Health Information (PII/PHI)
- Researcher Resources & Compliance, Learning, and SOP Solutions (CLASS)

# OPEN Modernization

---

# CTSU Updates: OPEN Modernization

- In February 2024, the CTSU started work on improving the look, feel, and functionality of the OPEN application
- CTSU is taking a phased approach to the modernization:
  - **Phase 1:** Form setup screens used by the Lead Protocol Organizations (LPOs) to configure their OPEN enrollment forms
  - **Phase 2:** Enrollment screens which include the History and Funding screens as well as Slot Reservation
  - **Phase 3:** Transfer and Update Module and the COG Registry
  - **Phase 4:** Administrative screens and reports

*\*Phases and timelines are subject to change*

# CTSU Updates: OPEN Modernization (Cont.)

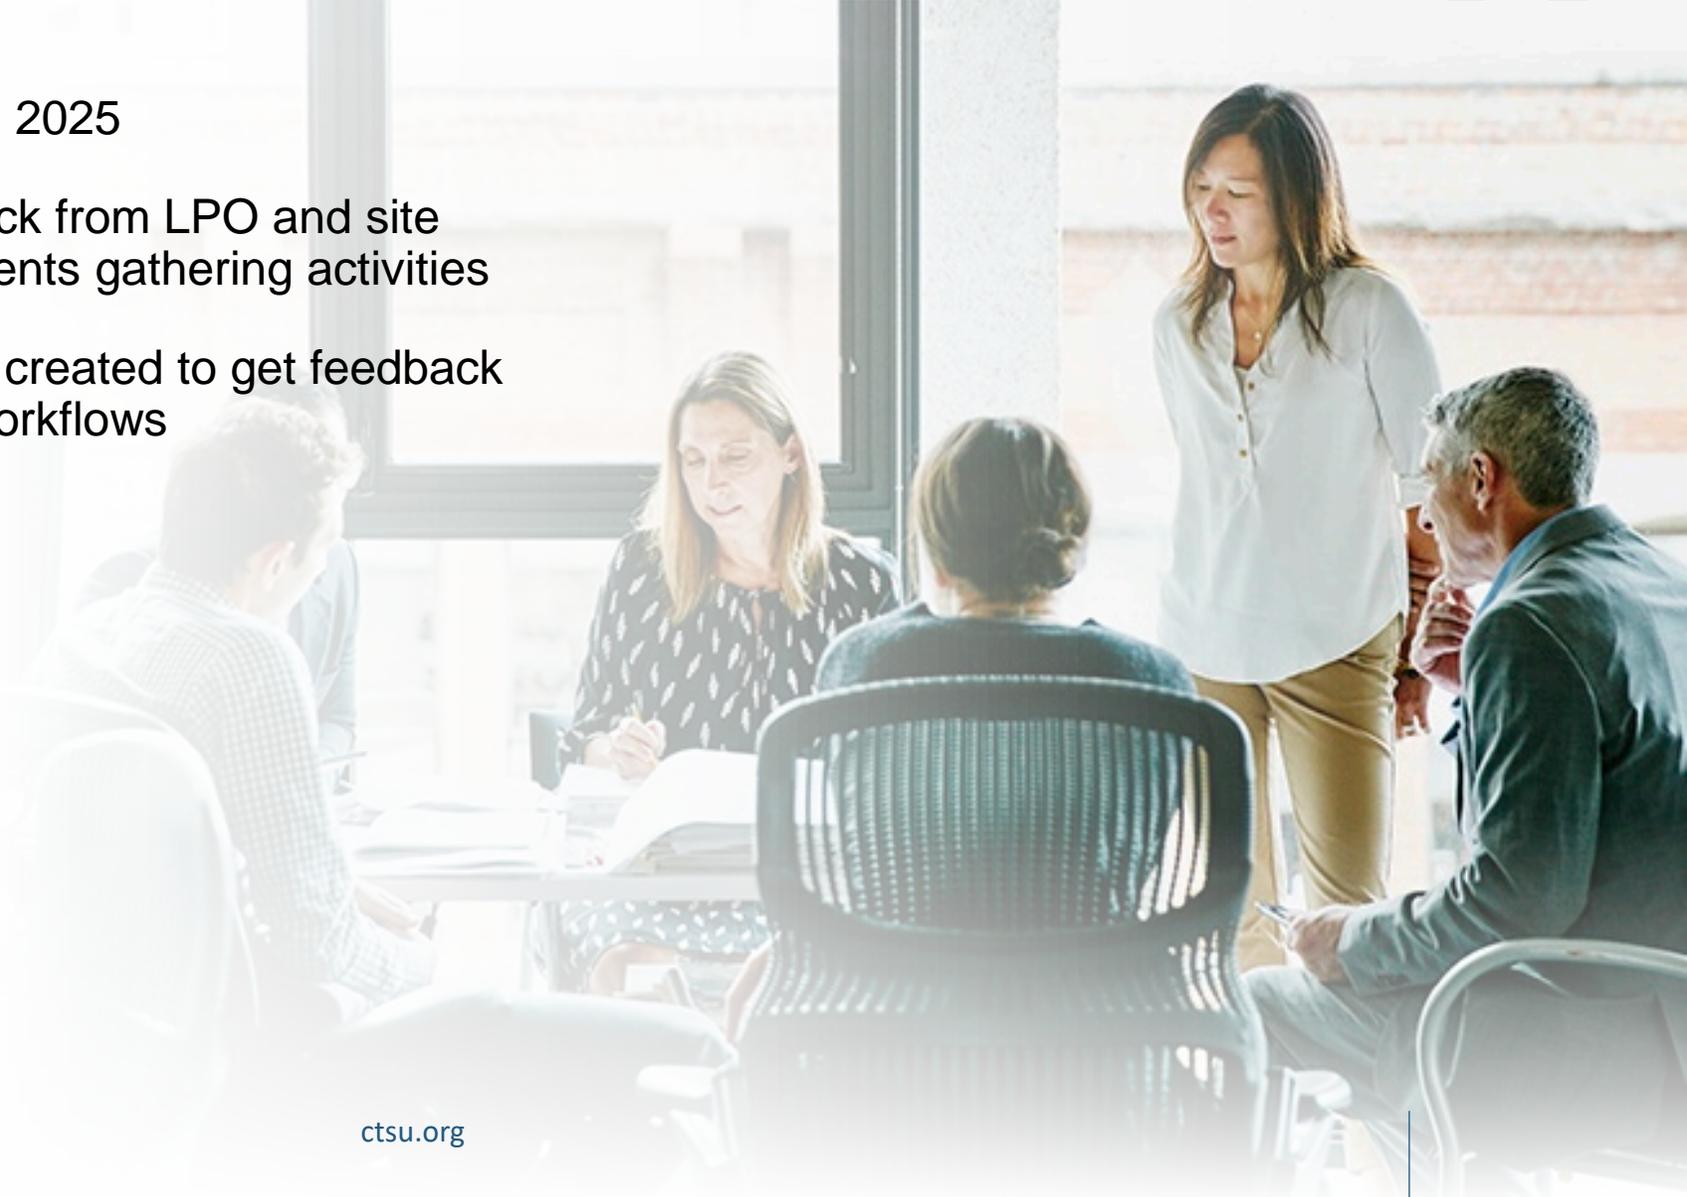

- Stakeholder interviews were conducted to get feedback regarding the current OPEN application:
  - Stakeholders consisted of LPO and CTSU staff users
  - Feedback was used to identify areas in need of improvement with OPEN
  - An LPO Working Group was formed to receive feedback on proposed mockups and workflows for Phase 1

# OPEN Modernization: Coming Soon

- Phase 2 is targeted to start in 2025
- CTSU will be seeking feedback from LPO and site users as part of the requirements gathering activities
- A Site Advisory Group will be created to get feedback for proposed mockups and workflows

# IRB Exempt Studies

---

# IRB Exempt Studies

- CTSU worked with the Division of Cancer Prevention (DCP) to update CTSU Applications to accommodate the management of IRB Exempt studies
  - CTSU Application updates were released to production at the end of July 2024
- An *LPO Approval* requirement will be used to manage site registration statuses for IRB Exempt studies
  - Sites will work with the LPO to obtain approval to participate in the IRB Exempt study
    - Sites will submit the LPO Approval document to the CTSU via the Regulatory Submission Portal on the CTSU members' website
  - Additional requirements may be set up for collection as well, per the LPOs request, but the *LPO Approval* will replace the *IRB Approval* as the mandatory requirement for IRB Exempt studies
- Sites with an *Approved* site registration status after submitting their LPO Approval to the CTSU will be able to complete patient and non-patient (if applicable) enrollments in OPEN

# CTSU Members' Website Changes – *Protocol*

## > *Protocol Requirements*

- > The Description of the mandatory requirement in the *Protocol Requirements* section of the Protocol page for IRB Exempt studies shows as *LPO Approval* rather than *IRB Approval*

The screenshot shows the CTSU website interface. The 'Protocol Requirements' tab is highlighted in red. Below the tab, a table lists requirements for NRG-CC006. The first requirement is 'LPO Approval', which is also highlighted in red. The table has columns for #, Description, Submission Type, Source, Required for Enrollment?, Required by Date, LPO Review required?, and Applicable Countries.

#	Description	Submission Type	Source	Required for Enrollment?	Required by Date	LPO Review required?	Applicable Countries
1	LPO Approval	Specific Site(s) and Protocol(s)		✓	Prior to Enrollment		ALL

# CTSU Members' Website Changes – *Regulatory > Protocol Requirements*

- > The Description of the mandatory requirement in the *Protocol Requirements* section of the *Regulatory* page for IRB Exempt studies shows as *LPO Approval* rather than *IRB Approval* as well

The CTSU Regulatory Office is available to answer your regulatory questions by phone (1-866-651-2878) or email [CTSURegHelp@coccg.org](mailto:CTSURegHelp@coccg.org). If you have a subject waiting, be sure to submit your regulatory documents as urgent via the Regulatory Submission Portal and you will be contacted once your submission has been processed.

Protocol: NRG-CC006  [Print](#)

Protocol Number: NRG-CC006  
Current Version: 07/19/2024  
Countries Open To: US

Protocol Status: Active  
Status Date: 12/13/2018  
Report Date: 9/13/2024

Protocol Specific Requirements (PSR)

#	Description	Submission Type	Source	Required for Enrollment?	Required by Date	LPO Review required?	Applicable Countries
1	LPO Approval	Specific Site(s) and Protocol(s)	SITE	✓	Prior to Enrollment		ALL

[U.S. Department of Health and Human Services](#) | [National Institutes of Health](#) | [National Cancer Institute](#) | [USA.gov](#)

Chrome and Microsoft Edge browsers are recommended for best results.

# CTSU Members' Website Changes – *Regulatory > Site Registration*

> The *IRB Type* field in the *Site Registration* section of the *Regulatory* page shows as *EXEMPT* for IRB Exempt studies

The screenshot shows the CTSU Regulatory website interface. At the top, there is a navigation bar with the CTSU logo, "Cancer Trials Support Unit A SERVICE OF THE NATIONAL CANCER INSTITUTE", and "CTSUUAT". On the right, there are links for "My Notes", "Home", "Contact", "Feedback", "Public Site", and "Log Out", along with the version "Version: 2024.1.0". Below this is a search bar and a "Go!" button. A secondary navigation bar includes "Home", "Protocols", "Dashboard", "Regulatory" (highlighted), "OPEN", "Data Management", "Auditing & Monitoring", "RUMS", "Delegation Log", "Resources", "Collaboration", "CLASS", and "Reports". Under "Regulatory", there are sub-tabs: "Site Registration" (highlighted with a red box), "Protocol Requirements", "Provider Association", "Regulatory Submission", and "CIRB Site Preferences".

The main content area features a text block: "The CTSU Regulatory Office is available to answer your regulatory questions by phone (1-866-651-2878) or email [CTSURegHelp@cocccg.org](mailto:CTSURegHelp@cocccg.org). If you have a subject waiting, be sure to submit your regulatory documents as urgent via the Regulatory Submission Portal and you will be contacted once your submission has been processed." A "Help" button is visible on the right.

Below the text is a search form with fields for "Site Number", "Registration Status" (dropdown: "Approved, Close..."), "Protocol Status" (dropdown: "All Protocol Statuses"), and "IRB Type" (dropdown: "All IRB Types"). There are also "Pick" and "Go" buttons, and a "Disclaimer" link.

The "Site Registrations" table is shown below:

Site	Protocol Number	LPO	Protocol Status	IRB Type	IRB Approval Expiration (Days)	CTSU Collecting IRB Continuing Review?	Site-Protocol PI	Site Registration Status	Status Date	Status Reason	Missing Reqs	Initial Approval Date
OH007	NRG-CC006	NRG	Active	EXEMPT		Yes	Addison, Daniel	Approved	19-Jul-2024	Complied with all items	N	19-Jul-2024

At the bottom of the page, there is a footer with links: "Contact Us", "Site Map", "CTSU Disclaimer", "CTSU Accessibility", "Viewing Files", "Disclaimer Policy", "Accessibility", "FOIA", "HHS Vulnerability Disclosure", "U.S. Department of Health and Human Services", "National Institutes of Health", "National Cancer Institute", and "USA.gov". A note states: "Chrome and Microsoft Edge browsers are recommended for best results."

# PD Form

---

# PD Form Updates

- The CTSU and NCI are revisiting the PD Form (currently in pilot for SWOG S2012) to streamline the reporting process as much as possible
- Specific changes include, but are not limited to:
  - Reducing required fields for each deviation
  - Consolidating deviation reporting with medication error reporting
  - Expanding available help text
- The CTSU is planning to host online real-time training events to review form updates with site staff
- Additional information about this form update and relevant training sessions will be announced in the CTSU Newsletter and Bi-monthly Broadcast

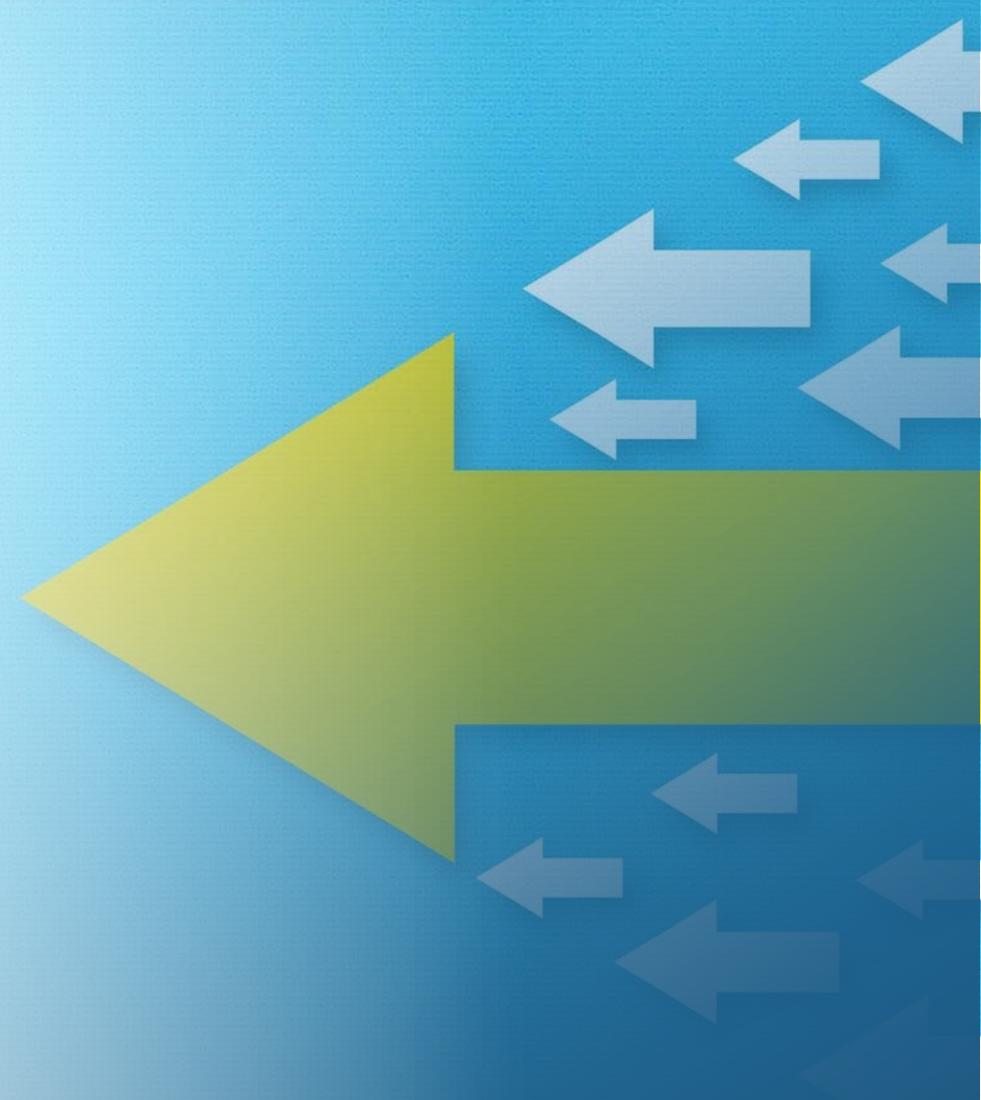

# RUMS

---

# RUMS Update

- Allow bulk addition of person roles during:
  - Add Role Action
  - Add Person Action
- Changes to Summary Page layout

# Add Person/Role Summary

Each Roster/Site has own block

Manage Person

STEPS: 1. Select Person, 2. Select Sites, 3. Select Roles, 4. Questions, 5. Documents, 6. Review and Confirm

1. Select Person: Schuman, Shari (AP-627905 / AP)

2. Select Sites:
 

- ALLIANCE
- NRG
- ECOG-ACRIN
- NRG

3. Select Roles:
 

- TRAD Site User (ALLIANCE)
- TRAD Site User (ECOG-ACRIN)
- TRAD Site User (NRG)
- TRAD Site User (NRG)

4. Questions: REQUIRED: 4 of 4 answered; OPTIONAL: 6 of 6 answered

5. Documents: Primary Role Doc MP

6. Review and Confirm

You are about to submit 8 requests. Please review before you click SUBMIT button.

#	QUESTION	VALUE	REQUIRED?
1	Do you want to receive Alliance broadcast emails?	Yes	Yes
1	Select the type of communications that you would like to receive, and enter today's date as the effective date.	ALL_COMM Effective Date: NONE End Date: NONE	Yes
2	Does this individual need a primary role for NRG (Lead CRA or Co-Lead CRA) at the site?	No	No
1	Does this person need to be added to the ECOG-ACRIN mailing list?	Yes	Yes
2	Select the applicable Specialty area.	Other	Yes
3	Do you need a GRE's registrar role for your site?	Yes	No
4	Enter degree information	BA	No
5	Do you need a Raw role assignment?	No Raw Role Required	No
6	Do you need the TRAD Site User role?	No	No
7	To obtain ECOG-ACRIN website access, call the ECOG-ACRIN Boston Operations Office at 617-504-2900 and ask to speak with the Password Specialist.	I acknowledge	No
1	Select the type of communications that you would like to receive, and enter today's date as the effective date.	ALL_COMM Effective Date: NONE End Date: NONE	Yes
2	Does this individual need a primary role for NRG (Lead CRA or Co-Lead CRA) at the site?	No	No

Role Summary

Assign 4 Non Primary Role(s) to Schuman, Shari(AP-627905)

ROSTER	SITE CTEP ID	ROLE	ROLE ASSIGNMENT LEVEL	ROLE ASSIGNED AT
ALLIANCE	R004	TRAD Site User	INSTITUTION	R004
ECOG-ACRIN	R015	TRAD Site User	INSTITUTION	R015
NRG	R004	TRAD Site User	INSTITUTION	R004
NRG	R015	TRAD Site User	INSTITUTION	R015

# Hints

- Contact the Cancer Therapy Evaluation Program (CTEP) Identity Access Management (IAM) Help Desk to remove people:
  - This will set the person to inactive and withdraw/inactivate all their roster affiliations, roles, and task assignments
- Only assign roles that are needed
- The system will allow 500 requests per submission, but do you need that many roles?
- The system functions best when no more than 20 sites are selected – a future update will allow for additional sites to be selected

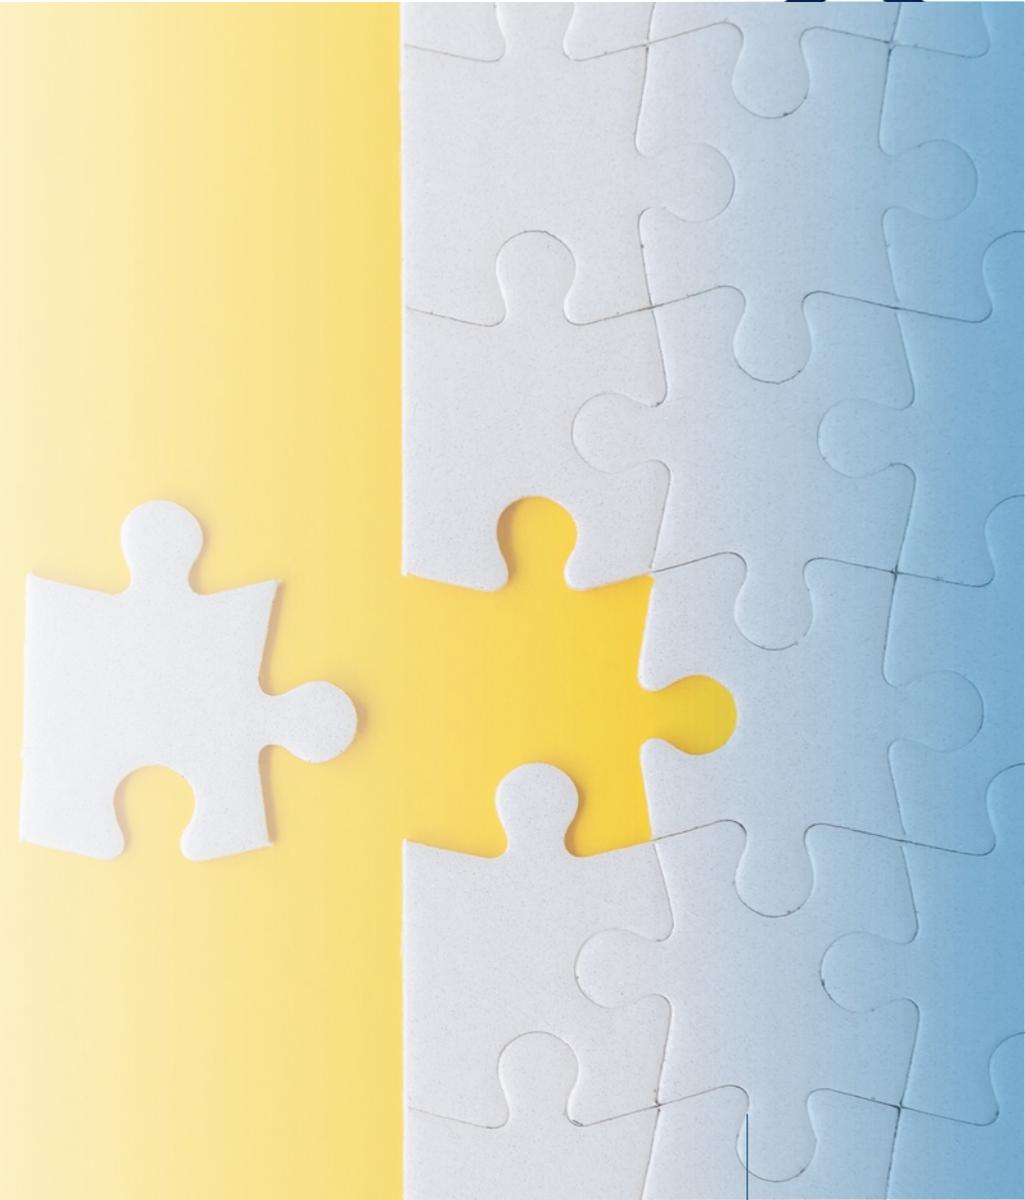

# SDP and Auto-Redaction of PII/PHI

---

# Redaction: Current Method

- CTSU's SDP provides a mechanism for reviewing a patient's chart against data sources such as a clinical database or adverse event report
- When patient documents are uploaded to the SDP, sites are required to remove/redact information that could violate a person's privacy per the Health Insurance Portability and Accountability Act (HIPAA)
- Source documents are manually redacted either:
  - Before uploading documents (use of Sharpie)
  - During upload of documents using a tool within SDP
- Documents which are not fully redacted will be rejected/removed from the SDP

# Redaction: Current Pain Points

- The current process can be:
  - Time Consuming:
    - While some source documents are only a few pages, others can be 50+ pages
    - Site staff can spend many hours redacting documents (indicated in 2021 Site Survey & Group Meetings)
    - If LPO Triage staff rejects the document to sites, the process starts over
- Error Prone:
  - Site staff can miss PII/PHI
  - LPO Triage staff can miss PII/PHI
- Distracting:
  - Time spent redacting could be used instead to treat patients

# Auto-Redaction: Why should I use this tool?

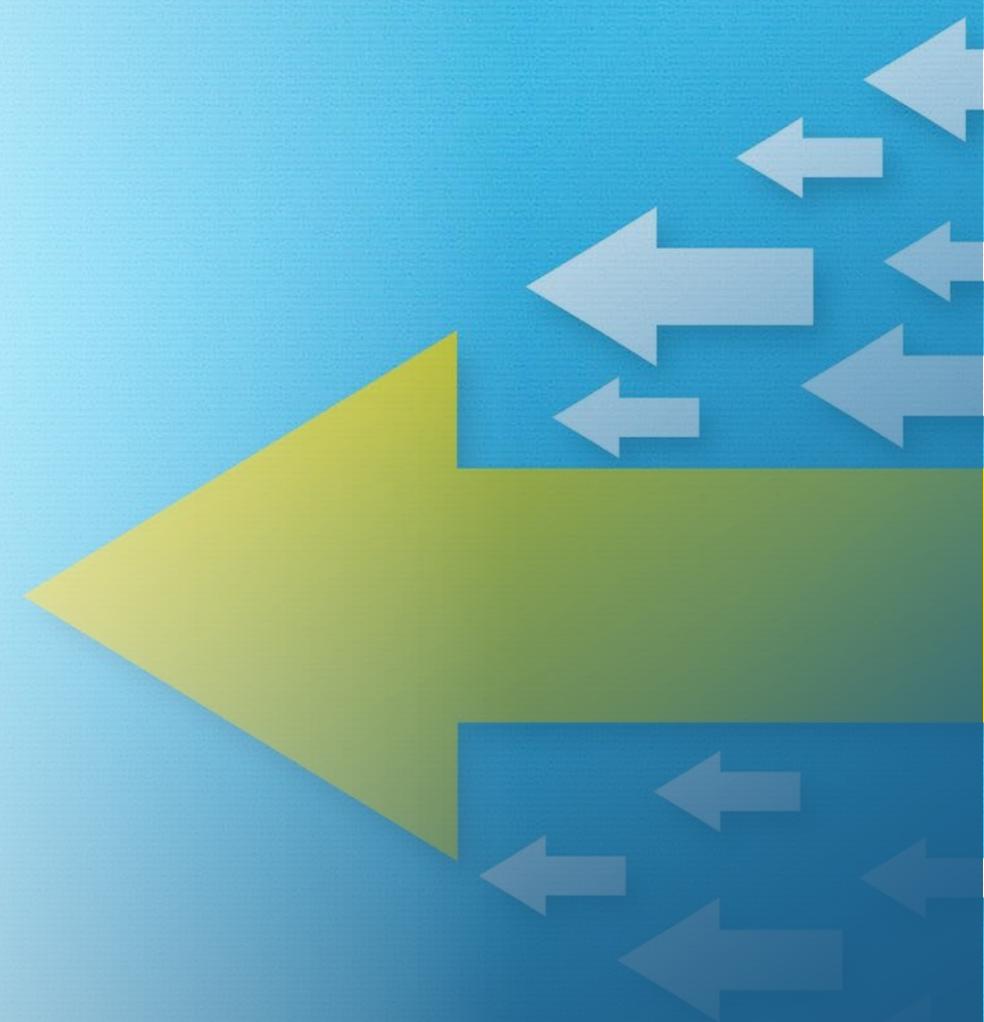

- The CTSU is planning to launch an auto-redaction tool in the SDP in the next release
- The auto redaction tool uses advances in Artificial Intelligence and Machine Learning (AI/ML) to 'read' and redact PII/PHI when the document is uploaded
- CTSU is planning the next SDP release to be a pilot phase of the auto-redaction tool to determine usefulness for sites
- The goals of the auto-redaction tool are to:
  - Accurately and consistently redact PII/PHI
  - Auto-redact both computer-generated and handwritten text
  - Significantly reduce the time sites are spending manually redacting documents
  - Reduce the time LPOs spend triaging documents after sites upload source documents for review because of more consistent redaction
  - Reduce document rejection by LPO Triage staff for unredacted PII

# Auto Redaction: Can I make changes?

- The auto-redaction tool will by default be enabled and will immediately run when uploading a document
- The auto-redaction tool can be easily disabled by the site prior to uploading a document
- The auto-redaction tool will display redacted terms prior to saving thus allowing for corrections:
  - Over redaction: terms redacted in error can be unredacted
  - Under redaction: terms which were not redacted can be manually selected for redaction

# Researcher Resources & CLASS

---

# Cross-Network Training Working Group

- The CTSU has been working with the Cross-Network Training Working Group to improve and expand access to staff training resources. Membership includes staff from:
  - CTSU
  - CTEP
  - DCP
  - NCTN Groups
  - NCORP Research Bases
- Intent is not necessarily to always create new resources, but to also collect those that are already out there and make them more easily accessible

# Expanded Researcher Resources

- Reworked and expanded the **Researcher Resources** folders on the CTSU members' website
- Improved categorization
- Links to resources from CLASS, CTSU, NCI, Office for Human Research Protections, etc.

The screenshot shows a web interface titled "Resources Browser". At the top, there is a search bar with the text "Search by Document Title" and a "Go!" button. Below the search bar, there is a list of folders and sub-folders. The "Researcher Resources" folder is expanded and highlighted with a red border. The sub-folders under "Researcher Resources" include:

- NCI Program and General LPO Resources
  - + NIH and NCI Resources
  - + LPO Resources
- Audit and Monitoring
  - + Audit Resources
  - + Central Monitoring
- + Investigational Agent Management including AURORA
- Participant Coordination and Data Management
  - + Adverse Event Reporting and CTEP-AERS
  - + Data Management including Rave
  - + Disease-specific Training, Staging, and Assessment including RECIST
  - + Dose Modifications
  - + Eligibility
  - + Image Management including TRIAD
  - + Laboratory Evaluations
  - + Modality-specific Training including Facility Credentialing
  - + Participant Registration/Transfer including OPEN
  - + Recruitment and Retention
  - + Specimen Management including LPO Systems
- Regulatory
  - + Confidentiality and Privacy including HIPAA
  - + Consent, Assent, and Consent Process Documentation
  - + Delegation of Tasks Log (DTL) or Site Authority Log
  - + General Regulatory Principles
  - + IRB and NCI CIRB
  - + Protocol Deviations, Unanticipated Problems, Noncompliance
- Site/Staff Management
  - + Funding and Payment
  - + General Research Training
  - + Investigators
  - + Patient Advocate
  - + Roster Management

# Compiled Researcher Resources List

➤ Now available: Downloadable, sortable list of the resources

OPEN Data Management Auditing & Monitoring RUMS Delegation Log **Resources** Collaboration CLASS Reports

## Researcher Resources

This section provides links to a broad assortment of resources that should be useful to those working in the clinical trials environment. For more information, click on the Help Topics icon.

For a downloadable and sortable list of most of the items within these folders, view the [Compiled Researcher Resources List](#). This list includes columns for the topic area, the posting category (i.e., sub-folder(s) within Researcher Resources), target audience, and information about the resource itself. Note that while new items may be posted to these folders at any time, the list itself will be updated quarterly.

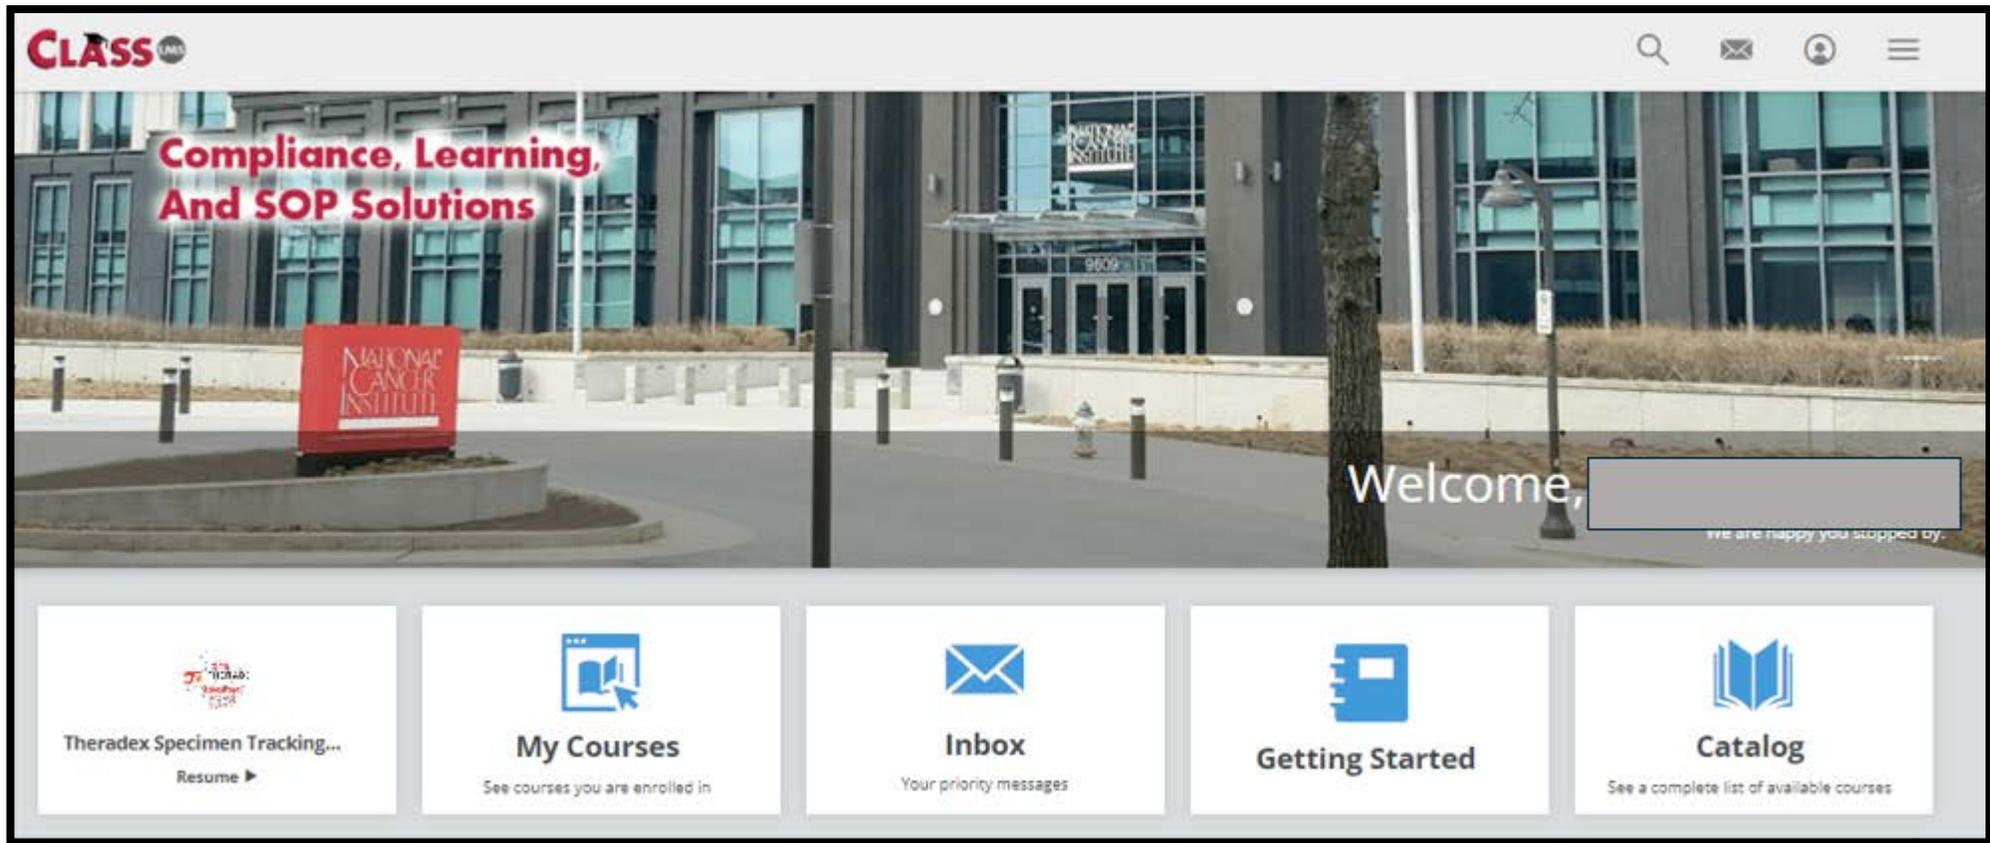

➤ Currently > 200 items; will be updated quarterly

# CLASS-related Updates

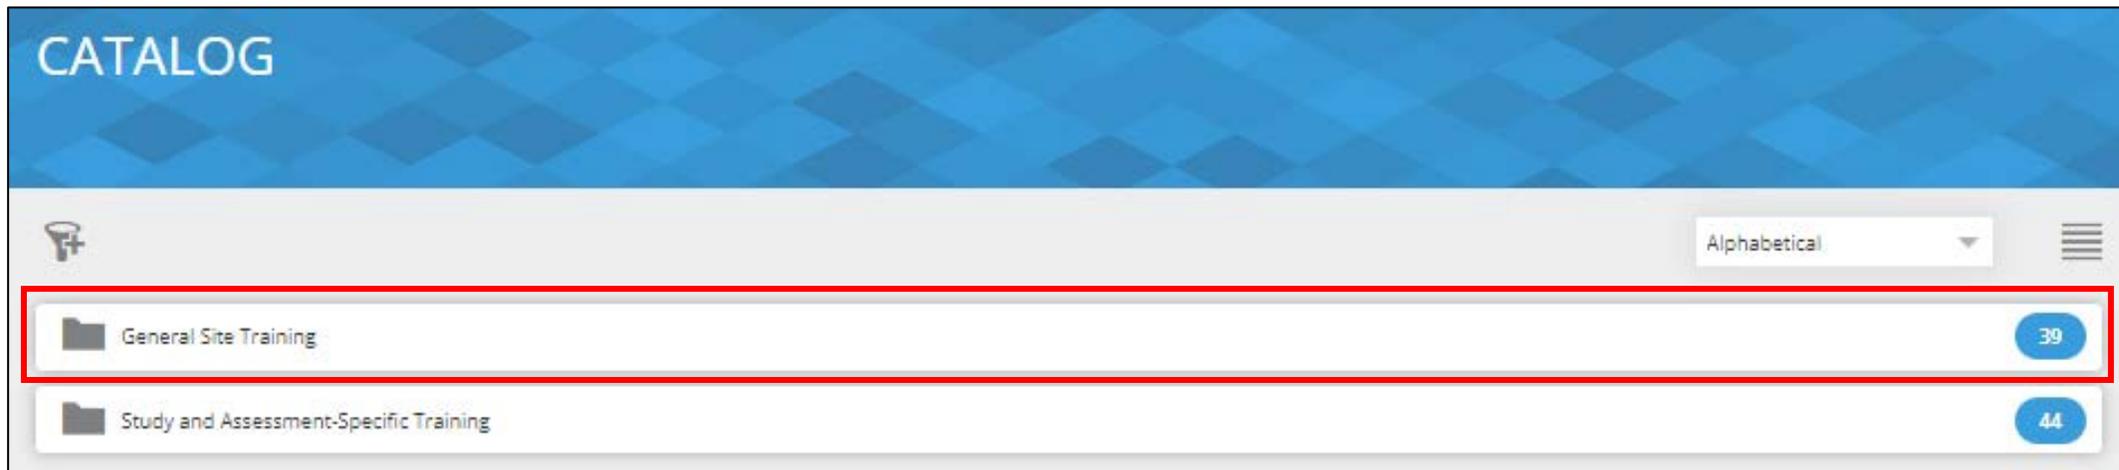

- Expanded course options
- New training report on CTSU website

# Courses Available in CLASS

- › Longstanding CLASS trainings:
  - Clinical Trials Monitoring Branch (CTMB) auditor training
  - Theradex Specimen Tracking System (STS) training for ETCTN, NCICOVID, and Moonshot studies
  - Protocol-specific trainings
- › More recent expansion to include more general research training
  - Separate folder in the CLASS catalog

# General Site Training

- › Wide range of topics
- › Generally provided by an NCTN Group (e.g., Alliance, SWOG)
- › Most are open to everybody via self-enrollment, although a few are limited to roster members\*

NRG: An Overview of NRG\*

Alliance: RECIST Basics

Alliance: Data Management Tips & Tricks

Alliance: Regulatory 101 and 102

SWOG Audits: Serious Adverse Event Reporting Training

# CRA Manual

## for Oncology Research Professionals

The CRA Manual for Oncology Research Professionals really is the main resource tool to help CRAs in their day-to-day tasks working on SWOG trials. The Quality Assurance team and the SDMC (Statistics and Data Management Center) are often asked where certain answers are documented, and most often the information is provided here. Find anything from audits, data submission and expectation reports to long-term follow-up requirements, how to conduct response assessment and forms completion guidelines. We encourage you to share this valuable resource to new and experienced staff at your site!

## CRA Manual (for Oncology Research Professionals)

- [Clinical Trials Training Course \(CTTC\)](#)

(The CTTC now resides in the CTSU CLASS learning management system. Site staff who previously enrolled in the CTTC in ExpertusOne may still complete the workshop in ExpertusOne until April 2025.)

A screenshot of an online course interface. The background is dark grey with a diamond-shaped pattern. In the top right corner, there is a white 'X' icon. The text 'Online Course' is in a light grey font. Below it, the title 'SWOG: Clinical Trials Training Course (CTTC)' is displayed in white. At the bottom left, there is a blue 'Start' button, followed by a white square button with a plus sign, and another white square button with three vertical dots.

[Overview](#) [Lessons](#) [Resources](#)

This training course offers a comprehensive overview of SWOG and reinforces the importance of the CRA's impact in clinical trials research. The CTTC includes presentations on topics such as protocol development, data submission, patient follow-up, the expectation and institutional performance reports, adverse event reporting, audits, and specimen submission. The goals of the CTTC are to introduce the fundamentals of SWOG and National Cancer Institute (NCI) policies and procedures as well as provide the foundation to efficiently perform your responsibilities as a SWOG CRA.

# Quality Assurance & Audits

The purpose of the Quality Assurance Program is to enhance the reliability and validity of clinical trials data through routine monitoring. Audits are designed to provide assurance that the data reported on research records accurately reflect data in the primary patient record and to verify compliance with protocol and regulatory requirements. The program also surveys data management practices at each institution to provide educational support to clinical trial sites regarding data quality, management, and more.

**The following resources can help with clinical trials quality assurance and the audit process.**

GUIDELINES

REGULATORY GUIDANCE

FDA INSPECTIONS

INVESTIGATIONAL AGENTS AND PHARMACY

AUDIT RESOURCES

ADDITIONAL RESOURCES

VOLUNTEER AUDITOR PROGRAM

## Guidelines

Audits of SWOG Cancer Research Network institutions are conducted in accordance with the guidelines below:

- [SWOG Policy 19: Quality Assurance Program](#)
- [SWOG Quality Assurance Audit Guidelines](#)

## Guidelines

Audits of SWOG Cancer Research Network institutions are conducted in accordance with the guidelines below:

- [SWOG Policy 19: Quality Assurance Program](#)
- [SWOG Quality Assurance Audit Guidelines](#)
- [NCI-CTMB Guidelines for Monitoring of Clinical Trials, effective 2/15/21](#)

## Regulatory Guidance

Clinical trials operate under the policies and regulations of the federal Department of Health and Human Services' Office for Human Research Protections (OHRP).

- **Human Subjects Protection:** OHRP provides leadership in the protection of the rights, welfare, and well-being of subjects involved in research conducted or supported by the U.S. Department of Health and Human Services. OHRP helps ensure this by providing clarification and guidance, developing educational programs and materials, maintaining regulatory oversight and providing advice on ethical and regulatory issues in biomedical and social-behavioral research.
- **SWOG Regulatory Guidance:** Guidance for a successful regulatory audit including expectations of the audit team for IRB, consent form content, Delegation of Task Log, and patient informed consent.
- **OHRP Guidance on Changes in Informed Consent Documents and Continued Enrollment of New Participants, April 2008:** Changes in informed consent documents in NCI/CTEP-sponsored clinical trials and the continued enrollment of new participants to those trials when new or modified risk information is discovered.
- **OHRP Correspondence, September 2008:** Section E describes information in regard to Communication of New Risk Information to Subjects Already Enrolled in a Clinical Trial Without Obtaining IRB Approval
- **FDA Guidance on AE Reporting, January 2009:** Guidance on reporting of external adverse events to IRBs.
- **OHRP Guidance on AE Reporting, January 15, 2007:** Guidance on reporting of external adverse events to IRBs.

## Accountability of Investigational Agents and Pharmacy Operations

Drug accountability and storage procedures described in this section are required under Federal Regulations and CTEP, DCTD, NCI policy.

- **ORP Manual: Drug Ordering and Maintenance**: Chapter 6 of the ORP Manual provides detailed instructions on completing the NCI Drug Accountability Record Form (DARF).
- **NCI Pharmaceutical Management Branch Policies**: Pharmaceutical Management Branch (PMB) Guidelines on the management of investigational agents.
- **SWOG Investigational Agent Handling Training**: Guidance on the proper handling of investigational drugs and is recommended training for new staff involved in ordering, accounting for, and disposing of investigational drugs is accessible to *SWOG members* via the **SWOG Investigational Agent Handling Course** (or individual modules) maintained in the ExpertusOne learning management system.
- **NCI-PMB Investigational Drug Handling Slide Show**: A PMB training module that addresses the investigational drug handling process and CTEP's specific policies for maintaining investigational agents.
- **Drug Accountability Record Forms (DARFs)**: The Drug Accountability Record Forms in this section are required under Federal Regulations and CTEP, DCTD, NCI policy.
  - **NCI Investigational Agent Record Form (Non-Oral)**: The NCI DARF must be used to account for all non-oral investigational agents used in NCI sponsored studies.
  - **NCI Investigational Agent Record Form for Oral Agents**: The NCI DARF must be used to account for all oral investigational agents used in NCI sponsored studies.

## Audit Resources

In order to be consistent with standard medical care and to be compliant with Federal regulations, each investigator participating in trials must prepare and maintain adequate and accurate source documentation designed to record all observations and other data pertinent to the investigation of each participant (21 CFR 312.62.b).

- [Site Preparation for an Audit](#): Guidance on how to prepare for a quality assurance audit
- [Policy on Auditing Electronic Medical Records](#): Guidance on providing access and facilitating the audit process if auditors will be expected to review patient records in the EMR.
- [SWOG Patient Chart Review Guidance](#): Tips for a successful patient case review audit including expectations of the audit team for eligibility, treatment administration, toxicity assessment, endpoint assessment, patient informed consent and general data quality

## Additional Resources

- **Best Practices for SWOG Studies**: Current information related to expectations for protocol compliance, documentation practices, and consenting issues for those participating on SWOG studies
- **FAQs**: Answers to common questions about record-keeping, data entry and more
- **Record Retention Guidance**: Requirements for record retention of IRB and research records
- **Internal QA Program**: Guidance on implementing an internal QA Program within the research setting
- **Site Authority Log**: This log covers studies that do not that do require a Delegation of Task Log (DTL) available on the CTSU website. All staff who participate in the research process for SWOG and CTSU clinical trials must sign this log which indicates what responsibilities they have authority to perform. The Principal Investigator must sign this form to certify that site staff are trained and qualified to perform the specified duties for NCI Sponsored Protocols. This log must be made available during SWOG audits so that auditors may determine areas of responsibility and verify signatures or initials on data if questions arise during the audit process. Investigators, Advanced Practice Providers, CRAs, Research Nurses and other research personnel should sign it but it is not necessary to include pathologists, surgeons or other medical staff such as residents, infusion nurses and lab personnel whose primary duties are within their scope of practice but not related to research activities. Investigational pharmacy personnel should also be included. During an audit, it is expected that the majority data reviewed would be collected by people who have signed the log. A local version of the log may be used in place of this form provided it includes the required information.

**IRB REVIEW**

A review of regulatory documents will be conducted for **all** the protocols listed above. The IRB records required to be available for review include:

- CIRB: Initial *CIRB Approval of the Study-Specific Worksheet About Local Context* giving approval to conduct the study, documentation of date of local activation or implementation of protocol updates/consent versions and reports of serious non-compliance or reportable SAEs
- Informed consent forms: Copies or a comprehensive list of all approved/implemented consent forms

**The following information must be submitted to the Network Operations Center for review by September 9, 2024:**

**CONSENT FORM REVIEW**

An unsigned copy of the most current IRB approved version of the consent form for the following protocols:

S1826  
S1912CD  
S1918  
S2013

\*Submit a copy of the CIRB approved Annual Signatory Institution Worksheet with local context (boilerplate language).

**DRUG ACCOUNTABILITY REVIEW**

Copies of the drug accountability records (including shipping receipts, return forms, and transfer forms) for the protocols listed below. This includes records utilized from June 14, 2022 to the present for both the control and satellite pharmacies.

GA020: S1826, S1918

**SWOG QUALITY ASSURANCE CASE REVIEW FORM**

Case #:	Protocol #:	Disease Site:
SWOG Patient #:	Registration Date:	Investigator:

ELIGIBILITY	OK	Major	Lesser	NA
Review of documentation available confirms patient did not meet all eligibility criteria.				
Documentation missing; unable to confirm eligibility.				
Eligibility affirmation signed by investigator (lesser in data quality if not signed/dated)				

TREATMENT:	OK	Major	Lesser	NA
Incorrect agent/treatment/intervention used.				
Additional agent/treatment/intervention used which is not permitted by protocol.				
Dose deviations or incorrect calculations (> ± 10% is a major).				
Dose modification/treatment interventions not per protocol; incorrectly calculated.				
Treatment incorrect, not administered correctly, or not adequately documented.				
Timing and sequencing of treatment/intervention not per protocol.				
Unjustified delays in treatment.				

DISEASE OUTCOME/RESPONSE	OK	Major	Lesser	NA
Inaccurate documentation of initial sites of involvement.				
Tumor measurements/evaluation of disease not performed/reported per protocol.				
Protocol-directed response criteria not followed.				
Claimed response (PR, CR, stable) cannot be verified.				
Failure to detect cancer (prevention study) or failure to identify cancer progression.				

ADVERSE EVENTS	OK	Major	Lesser	NA
Failure to report or delayed reporting of a Serious Adverse Event (SAE).				
Adverse events not assessed by the investigator in a timely manner per protocol.				
Grades, types, or dates/duration of serious adverse events inaccurately recorded.				
Adverse events cannot be substantiated.				
Follow-up studies necessary to assess adverse events not performed.				
Recurrent under- or over-reporting of adverse events.				

DATA QUALITY	OK	Major	Lesser	NA
<b>Last contact reported:</b> _____ <b>Off treatment:</b> _____				
Recurrent missing documentation in the patient/study participant records.				
Protocol-specified laboratory tests or other parameters not done/reported/documented.				
Protocol-specified diagnostic studies including baseline assessments not done/reported.				
Protocol-specified research (QOL/PRO, specimens) or advanced imaging not done.				
Frequent data inaccuracies (to include use of white out/poor clinical documentation).				
Errors in submitted data; data cannot be verified.				
Delinquent data submission.				

Auditor Signature: \_\_\_\_\_

CONSENT FORM	Version	Date Signed: _____	OK	Major	Lesser	NA
Consent form not signed and dated by patient or LAR.						
Patient signature cannot be corroborated.						
Consent form not protocol specific.						
Failure to document the informed consent process with the patient.						
Patient signed consent form containing changes not approved by CIRB/LIRB.						
Consent form document missing.						
Translated consent not available or signed/dated by non-English speaking patient						
Consent form not signed by patient prior to study registration/enrollment.						
Consent form does not contain all required signatures.						
Consent form used was not the most current IRB-approved version at patient registration.						
Consent form does not include updates or information required by IRB.						
Reconsent not obtained as required.						
Consent for ancillary/advanced imaging studies not executed properly.						
HIPAA authorization signed (Consent Form – other)						
Notification required: No _____ Yes _____						

**1.0 OBJECTIVES**

- Screening and Reassessment (MSRP)
- Tier Advancement Pathway (TAP)
- Specimens for translational medicine and banking

**4.1 Diagnostic Criteria**

Acute myeloid leukemia (AML) or myelodysplastic syndrome (MDS) as defined by the WHO (Section 18.4) or the international consensus classification (ICC) (Section 18.3)

**5.0 ELIGIBILITY CRITERIA**

**5.1 Disease Related Criteria**

\_\_\_\_ a. Participants must be suspected to have previously untreated acute myeloid leukemia (AML) or myelodysplastic syndrome (MDS). Participants with AML cannot have a history of previously treated myeloproliferative neoplasms (MPN) or MDS.

\_\_\_\_ b. Participants must be  $\geq$  18 years of age.

**5.2 Prior/Concurrent Therapy Criteria**

\_\_\_\_ a. Participants must not have received prior anti-cancer therapy for AML or MDS.

NOTE: Hydroxyurea to control the white blood cell count (WBC) is allowed.

NOTE: Prior erythroid stimulating agent (ESA) is not considered prior therapy for the purposes of eligibility. Participants must not be currently receiving any cytarabine-containing therapy other than up to 1 g/m<sup>2</sup> of cytarabine, which is allowed for urgent cytoreduction.

\_\_\_\_ b. Participants are allowed prior use of hydroxyurea, all-trans retinoic acid (ATRA), BCR-ABL directed tyrosine kinase inhibitor, erythropoiesis-stimulating agent, thrombopoietin receptor agonist and lenalidomide, with a maximum limit of 1 month of exposure.

NOTE: Participants receiving hydroxyurea prior to treatment substudy or TAP assignment must agree to discontinue hydroxyurea within 24 hours before beginning substudy or TAP treatment.

**5.3 Clinical/Laboratory Criteria**

\_\_\_\_ a. Participants must not have a prior or concurrent malignancy that requires concurrent anti-cancer therapy.

NOTE: active hormonal therapy is allowed.

\_\_\_\_ b. Participants must have a Zubrod Performance Status evaluation within 28 days prior to registration

**7.0 General Considerations**

Participants must register to MYELOMATCH prior to submitting specimens to the MDNet. It is recommended that participants register to MYELOMATCH no more than 14 calendar days prior to submitting specimens to the MDNet.

**7.1 Central laboratory assessment through MDNet for Treatment Assignment to a myeloMATCH Treatment Substudy or TAP – Initial Screening**

Molecular and clinical data will be used to assign participants to myeloMATCH treatment substudies or TAP.

No investigational treatment plan is included in the MSRP and TAP. The goal is to assign participants to myeloMATCH treatment substudies based on clinical, genomic, and/or measurements of remaining disease burden.

Successful biomarker profiling results through MDNet are required to register a participant to a myeloMATCH treatment substudy (see Sections 5.4, 14.4, and 15.0).

Sites will be notified of MDNet testing failures and have the option to submit additional specimens for repeat testing (see Section 18.1).

**7.2 Tier Advancement Pathway (TAP)**

Participants who do not have an available myeloMATCH treatment substudy will be assigned to standard of care (SOC) treatment per treating investigator and institutional preference. Note: participants cannot receive investigational drugs or enroll on local clinical trials. Participants may receive Tier 1 through Tier 3 TAP therapy at a non-NCTN site.

TAP specimen collections should be done at treating investigator discretion at the suggested reassessment timepoints indicated in Table 7.4 below.

**7.3 Reassessment through MDNet for Treatment Assignment to a myeloMATCH Treatment Substudy or TAP – Rescreening for Participants Assigned to a Treatment Substudy**

Within 30 days after the participant reaches a reassessment event (as defined in the respective myeloMATCH treatment substudy protocol, reassessment specimens must be submitted to MDNet (See Section 18.1).

If the site wants to have the participant evaluated for reassignment to a subsequent tier of treatment, the MYELOMATCH Re-Screening Registration Worksheet may be completed in OPEN. This will register the participant to the next step of the MSRP to determine eligibility and trigger assignment for additional myeloMATCH therapy (see Section 14.4).

A new myeloMATCH assignment will be provided within 10 days of MDNet receipt of all required specimens. If there is a new myeloMATCH treatment substudy assignment, participants must register to the assigned myeloMATCH treatment substudy to receive their treatment assignment on the treatment substudy.

NOTE: The myeloMATCH treatment substudy assignment will expire in OPEN after 10 days, and the site will be unable to register the participant to the assigned myeloMATCH treatment substudy. If this occurs, contact the myeloMATCH Helpdesk for assistance ([myelo-match-support@nih.gov](mailto:myelo-match-support@nih.gov)).

**7.4 Reassessment through MDNet for Treatment Assignment to a myeloMATCH Treatment Substudy or TAP – Rescreening for Participants Assigned to TAP**

TAP participants will be evaluated at suggested reassessment timepoints (indicated in Table 7.4 below). Within 30 days after the participant reaches a reassessment event, specimens may be submitted to MDNet at the discretion of the treating investigator (see Section 18.1). Specimens for MDNet submission must be collected by the participating NCTN site.

If the site wants to have the participant evaluated for reassignment to a subsequent tier of treatment, the MYELOMATCH Re-Screening Registration Worksheet may be completed in OPEN. This will register the participant to the next step of the MSRP to determine eligibility and trigger assignment for additional myeloMATCH therapy (see Section 14.5).

NOTE: The myeloMATCH treatment substudy assignment will expire in OPEN after 10 days, and the site will be unable to register the participant to the assigned myeloMATCH treatment substudy. If this occurs, contact the myeloMATCH Helpdesk for assistance ([myelo-match-support@nih.gov](mailto:myelo-match-support@nih.gov)).

Table 7.4: Suggested Specimen Collection for Participants Receiving SOC Therapy Through the TAP (See Section 15.1 for specimen collection information)

Tier	Treatment Type	Specimen Collection Time for Reassessment	
		Less-Intensive Therapy	Intensive Therapy
Tier 1	Induction	After 2-6 cycles	Response Assessment
Tier 2	Consolidations/Post-Remission	End of post-remission therapy	End of post-remission therapy
Tier 3	Hematopoietic Stem Cell Transplant (HCT)	Day 30 & Day 100 post-HCT	Day 30 & Day 100 post-HCT
Tier 4	Maintenance/Observation	As clinically indicated	As clinically indicated

For questions regarding specimen collection timing, please contact the Treatment Advisement Group (TAG)

**7.5 Criteria for removal from MSRP**

1. Progressive or refractory disease.
2. Upon morphologic relapse from morphologic CR/CRh/CRi, a first attempt in TAP to regain complete response fails.
3. Participation in a non-myeloMATCH clinical trial.
4. Receipt of non-myeloMATCH investigational treatment.

**7.6 Follow-Up Period**

All participants will be followed until death or 10 years after registration, whichever occurs first.

**8.0 ADVERSE EVENT REPORTING AND DOSAGE MODIFICATIONS**

Because TAP treatments associated with registration to the MSRP are standard of care (SOC), no toxicity data will be collected on the MSRP. Toxicity data will be collected as per the specific myeloMATCH treatment substudies.

9.0 Study Calendar

9.1 Study Calendar-For all TAP-Tier Equivalents

REQUIRED STUDIES	Before TAP Treatment Starts	At Time Of Response Assessment	At Time Of TAP Treatment Failure Or To Receive Non-MyeloMATCH Therapy
<b>PHYSICAL</b>			
H&P	X	X	X
Wt & PS	X	X	X
<b>LABORATORY</b>			
CBC (only when marrow submitted)	X	X	X
<b>MSRP SPECIMEN SUBMISSION</b>			
BM Aspirate/Blood for MSRP Reassessment (REQUIRED)		X	X
BM Aspirate/Blood for MSRP Reassessment (REQUIRED IF PT CONSENTS)		X	X

See Sections 15.2-15.4 for details regarding specimen submission timepoints and procedures.

**10.0 Criteria for Evaluation and Endpoint Definitions**

**10.1 Time to Treatment Substudy or TAP Assignment**

Measured from latest date of MDNet receipt of all required specimens (if specimens not received on the same day) to date treatment substudy or TAP assignment is returned via email to participant's site. Reliant upon receipt of local pathology report to release participant assignment.

**10.2 Remission and Treatment Failure Definitions**

- a. Morphologic complete remission (CR): Bone marrow blasts <5%; absence of circulating blasts with Auer rods; absence of extramedullary disease; absolute neutrophil count (ANC)  $\geq 1.0 \times 10^9/L$  (1000/mcL); platelet count  $\geq 100 \times 10^9/L$  (100,000/ $\mu$ L)
- b. Morphologic complete remission with partial hematological recovery (CRh): All CR criteria except count recovery for CR are not met AND ANC  $> 0.5 \times 10^9/L$  (500/mcL) AND platelets  $> 50 \times 10^9/L$  (50,000/mcL).
- c. Morphologic complete remission with incomplete blood count recovery (CRI): All CR criteria except for residual neutropenia ( $<1.0 \times 10^9/L$  [1000/mcL]) OR thrombocytopenia ( $< 100 \times 10^9/L$  [100,000/mcL])
- d. Partial remission (PR): All hematologic criteria of CR; decrease of bone marrow blast percentage to 5% to 25%; and decrease of pretreatment bone marrow blast percentage by at least 50%
- e. Morphologic leukemia-free state (MLFS): Bone marrow blasts  $< 5\%$ ; absence of blasts with Auer rods; absence of extramedullary disease; no hematologic recovery required (Note: for myeloMATCH this will not be reported as part of a composite overall response, but may be reported alone as an observed non-response)
- f. Stable disease (SD): Failure to achieve at least a PR, but with no evidence of progression as defined below for at least 8 weeks  
 Disease Progression:
  - 1. Evidence for an increase in bone marrow blast percentage and/or increase of absolute blast counts in the blood:
    - a. 50% increase in marrow blasts over baseline (a minimum 15% increase is required in cases with  $<30\%$  blasts at baseline; or persistent marrow blast percentage of  $>70\%$  over at least 3 months; without at least a 100% improvement in absolute neutrophil count (ANC) to an absolute level  $> 0.5 \times 10^9/L$  (500/mcL), and/or platelet count to  $>50 \times 10^9/L$  (50,000/mcL) non-transfused]; or b. 50% increase in peripheral blasts (WBC  $\times$  % blasts) to  $>25 \times 10^9/L$  ( $>25,000/mcL$ ) (in the absence of differentiation syndrome)
  - 2. New extramedullary disease
 Note: Transient cytopenias during chemotherapy courses should not be considered disease progression, as long as they recover to the previous levels
- g. Refractory disease: failure to achieve CR, CRh, CRI, PR, or SD, excluding patients with death in aplasia or death due to indeterminate cause
- h. Death in aplasia: Deaths occurring  $\geq 7$  days following completion of initial treatment while cytopenic; with an aplastic or hypoplastic bone marrow obtained within 7 days of death, without evidence of persistent leukemia
- i. Death from indeterminate cause: Deaths occurring before completion of therapy, or  $< 7$  days following its completion; or deaths occurring  $\geq 7$  days following completion of initial therapy with no blasts in the blood, but no bone marrow examination available

**10.3 Minimal residual disease (MRD) response**

MRD response is based on flow cytometry studies performed by the MDNet.

- a. MRD negative complete remission (MRD neg CR): all criteria for morphologic CR are met and there is no evidence of AML based on flow cytometry from central MDNet lab; MRD will be considered undetectable if  $<10^{-3}$ .

14.4 Data Submission Overview and Timepoints	FORMS
AFTER REGISTRATION TO THE MSRP SUBMIT	<ul style="list-style-type: none"> <li>• Specimens as outlined in section 15.0</li> <li>• Upload the participant's local pathology report(s) in OPEN</li> </ul> NOTE: It is recommended that the participant submit specimens to the MDNet no more than 14 days after registering to the MSRP.
WITHIN 15 DAYS AFTER REGISTRATION TO THE MSRP SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Vistal Status Form</li> <li>• MYELOMATCH Onstudy form</li> <li>• MYELOMATCH Eligibility Criteria Form</li> </ul>
WITHIN 30 DAYS AFTER THE PARTICIPANT HAS A REASSESSMENT EVENT ON THEIR MYELOMATCH TREATMENT SUBSTUDY (defined in each treatment protocol) SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Vital Status Form</li> <li>• Specimens as outlined in Section 15.0.</li> </ul>
AT ANY TIME WHEN THE PARTICIPANT SHOULD BE EVALUATED FOR RE-ASSIGNMENT TO A SUBSEQUENT TIER OF TREATMENT SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Re-screening Registration Worksheet (completed in OPEN)</li> <li>• Upload the participant's local pathology report(s) in OPEN (recommended)</li> </ul>
WITHIN 30 DAYS AFTER THE PARTICIPANT DISCONTINUES PARTICIPATION ON THE MYELOMATCH PROTOCOL SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Vital Status Form</li> <li>• PMI Off Study Standard Form</li> </ul>
WITHIN 30 DAYS AFTER PARTICIPANT REFUSES ALL FURTHER FOLLOW-UP AND CONTACT FOR THE MYELOMATCH PROTOCOL SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Vital Status Form</li> <li>• PMI Off Study Standard Form</li> </ul>
WITHIN 30 DAYS AFTER PARTICIPANT REFUSES ALL FURTHER FOLLOW-	<ul style="list-style-type: none"> <li>• MYELOMATCH Vital Status Form</li> <li>• PMI Consent Withdrawal Standard Form</li> </ul>

UP AND CONTACT FOR THE MYELOMATCH PROTOCOL SUBMIT	
IF NOT SUBMITTED OTHERWISE, AT LEAST EVERY 6 MONTHS UNTIL 10 YEARS AFTER REGISTRATION SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Vital Status Form</li> </ul>
WITHIN 30 DAYS (IF ON MYELOMATCH PROTOCOL) OR 60 DAYS (IF OFF MYELOMATCH PROTOCOL) AFTER KNOWLEDGE OF DEATH, SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Vital Status Form</li> <li>• MYELOMATCH Notice of Death Form</li> <li>• If not previously submitted, PMI Off Study Standard Form</li> </ul>
<b>14.5 Tier Advancement Pathway (TAP) Data Submission Overview and Timepoints</b>	<b>FORMS</b>
WITHIN 15 DAYS AFTER PARTICIPANT IS ASSIGNED TO A TAP TIER EQUIVALENT TREATMENT SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Vital Status Form</li> <li>• MYELOMATCH TAP Tier-equivalent Onstudy Form (this form is tier-specific)</li> </ul>
WITHIN 30 DAYS AFTER EACH DISEASE ASSESSMENT SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Vital Status Form</li> <li>• MYELOMATCH TAP Disease Assessment Form</li> </ul>
AT ANY TIME WHEN THE PARTICIPANT HAS A REASSESSMENT EVENT (defined in Section 7.2) SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Vital Status form</li> <li>• Specimens as outlined in Section 15.0</li> </ul>
AT ANY TIME WHEN THE PARTICIPANT SHOULD BE EVALUATED FOR RE-ASSIGNMENT TO A SUBSEQUENT TIER OF TREATMENT SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Re-screening Registration Worksheet (completed in OPEN)</li> <li>• Upload the participant's local pathology report(s) in OPEN (recommended)</li> </ul>
WITHIN 30 DAYS AFTER DISCONTINUING TAP TIER EQUIVALENT THERAPY SUBMIT	<ul style="list-style-type: none"> <li>• MYELOMATCH Vital Status Form</li> <li>• MYELOMATCH TAP Treatment Summary Form</li> </ul>

**15.2 Translational Medicine (REQUIRED)**

**a. Timepoint: Pre-Enrollment/Diagnosis and Progression**

**Table 15.2.a**

Assay	Specimens	Ship To
Flow Cytometry1 (Required)	1 EDTA tube bone marrow aspirate (3-5 mL)	Children's Hospital Los Angeles (CHLA)
Cytogenetics 2 (Required)	1 Sodium Heparin tube bone marrow aspirate (3-5 mL)	Fred Hutchinson Cancer Center (FHCC) Specialty Labs – Clinical Cancer Genomics Laboratory
NCI Myeloid Assay 1 (Required)	1 EDTA tube bone marrow aspirate (3-5 mL)	If shipping on Sunday-Wednesday for overnight delivery: Molecular Characterization Laboratory (MoCha)  If shipping on Thursday-Saturday for overnight delivery: Molecular Oncology Fred Hutchinson Cancer Center

1 If marrow is dry tap, 10 mL of whole blood collected into institutionally supplied EDTA tubes may be substituted for bone marrow aspirate.

2 When total specimen acquisition is limited, please allocate volumes to help ensure at least 3mL are put into the Sodium Heparin (green top) tube. Assay failure is high for cytogenetics when there is less than 3mL. If marrow is dry tap, 10 mL of whole blood collected into institutionally supplied Sodium Heparin (green top) tubes may be substituted for bone marrow aspirate.

**b. Timepoint: Reassessment Event**

**Table 15.2.b**

Assay	Specimens	Ship To
Flow Cytometry1 (Required)	1 EDTA tube bone marrow aspirate (3-5 mL)	Children's Hospital Los Angeles (CHLA)
Cytogenetics 2 (Required)	1 Sodium Heparin tube bone marrow aspirate (3-5 mL)	Fred Hutchinson Cancer Center (FHCC) Specialty Labs – Clinical Cancer Genomics Laboratory
NCI Myeloid Assay 1 (Required)	1 EDTA tube bone marrow aspirate (3-5 mL)	If shipping on Sunday-Wednesday for overnight delivery: Molecular Characterization Laboratory (MoCha)

		If shipping on Thursday-Saturday for overnight delivery: Molecular Oncology Fred Hutchinson Cancer Center
<i>Add rows for any treatment-protocol-specific collections.</i>	<i>[Specimens] *This row is to be added to treatment protocols.*</i>	<i>[Destination]</i>

1 If marrow is dry tap, 10 mL of whole blood collected into institutionally supplied EDTA tubes may be substituted for bone marrow aspirate.  
2 When total specimen acquisition is limited, please allocate volumes to help ensure at least 3mL are put into the Sodium Heparin tube. Assay failure is high for cytogenetics when there is less than 3mL. If marrow is dry tap, 10 mL of whole blood collected into institutionally supplied Sodium Heparin (green top) tubes may be substituted for bone marrow aspirate.

**15.3 SPECIMEN BANKING (REQUIRED IF PARTICIPANT CONSENTS)**

**a. Timepoint: Pre-Enrollment/Diagnosis and Progression**

**Table 15.3.a**

Assay	Specimens	Ship To
Biobanking (Required if participant consents)	- 2 Streck cfDNA tubes peripheral blood (20 mL total or 10 mL each) - 2 EDTA tubes peripheral blood (20 mL total or 10 mL each) - 1 Buccal Swab <sup>1</sup>	SWOG Biospecimen Bank

1 Buccal swab is to be collected only once, preferably at Pre-Enrollment/Diagnosis timepoint. If not collected initially, buccal swab should be collected at a subsequent timepoint.

**b. Timepoint: Reassessment Event**

**Table 15.3.b**

Assay	Specimens	Ship To
Biobanking (Required if participant consents)	- 1 EDTA tube bone marrow aspirate <sup>1</sup> (3-5 mL) - 1 Sodium Heparin tube bone marrow aspirate (3-5 mL) <sup>1</sup> - 2 Streck tubes peripheral blood (20 mL total or 10 mL each) - 2 EDTA tubes peripheral blood (20 mL total or 10 mL each) - Buccal Swab (only if not previously obtained) <sup>2</sup>	SWOG Biospecimen Bank

1 If marrow is dry tap, 10 mL of whole blood collected into institutionally supplied EDTA tubes may be substituted for bone marrow aspirate.

2 Buccal swab is to be collected only once, preferably at Pre-Enrollment/Diagnosis timepoint. If not collected initially, buccal swab should be collected at a subsequent timepoint.

**15.4 SHIPPING SAMPLES**

**Table 15.4**

Initial Activation <i>Note: At initial activation, paper forms will be used to collect required study data.</i> For initial activation, fax (or securely email) Generic Specimen Submission Forms, CLIA Submission Form, and Local Pathology Group Information Form to each receiving laboratory.	Post-Activation Transition to Rave <i>Notes:</i> <i>These documents are required after MyeloMATCH transitions to electronic data entry in Rave. Paper forms will no longer be accepted after this transition. Rave forms do not need to be faxed.</i>
- myeloMATCH Specimen Submission Form - Local Pathology Group Information Form - CLIA Submission Form	- Rave-generated Samples Tracking and Manifest Form - Rave-generated Local Pathology Group Information Form - Rave-generated CLIA Submission Form

A copy of all pathology reports must be uploaded via the MYELOMATCH OPEN Registration for initial registration.

# Common “intensive” chemotherapy for AML

## PRINCIPLES OF SYSTEMIC THERAPY INTENSIVE INDUCTION ELIGIBLE ([AML-1](#), [AML-2](#))

Therapy	Regimen
Standard 7 + 3 (daunorubicin or idarubicin) + gemtuzumab ozogamicin (CD33 positive) <sup>a,1,2,3,4,5</sup>	Cytarabine 200 mg/m <sup>2</sup> continuous infusion x 7 days with daunorubicin 60 mg/m <sup>2</sup> or idarubicin 12 mg/m <sup>2</sup> x 3 days and a single dose of gemtuzumab ozogamicin 3 mg/m <sup>2</sup> (up to one 4.5-mg vial) given on day 1, or day 2, or day 3, or day 4; alternatively, three total doses may be given on days 1, 4, and 7
Standard 7 + 3 (daunorubicin or idarubicin) <sup>6,7,8,9,10</sup>	Cytarabine 100–200 mg/m <sup>2</sup> continuous infusion x 7 days with idarubicin 12 mg/m <sup>2</sup> or daunorubicin 60 or 90 mg/m <sup>2</sup> x 3 days
Standard 7 + 3 (mitoxantrone) <sup>b,11</sup>	Cytarabine 100-200 mg/m <sup>2</sup> continuous infusion x 7 days with mitoxantrone 12 mg/m <sup>2</sup> x 3 days
FLAG-IDA + gemtuzumab ozogamicin (CD33 positive) <sup>a,c,d,12,13</sup>	Fludarabine 30 mg/m <sup>2</sup> days 2–6, cytarabine 2 g/m <sup>2</sup> over 4 hours starting 4 hours after fludarabine infusion on days 2–6, idarubicin 8 mg/m <sup>2</sup> IV on days 4–6, and G-CSF subcutaneously (SC) daily days 1–7 plus a single dose of gemtuzumab ozogamicin 3 mg/m <sup>2</sup> in first course
FLAG-IDA <sup>c,d,1,12</sup>	Fludarabine 30 mg/m <sup>2</sup> days 2–6, cytarabine 2 g/m <sup>2</sup> over 4 hours starting 4 hours after fludarabine infusion on days 2–6, idarubicin 8 mg/m <sup>2</sup> IV on days 4–6, and G-CSF SC daily days 1–7
Standard 7 + 3 (daunorubicin <sup>14</sup> or idarubicin <sup>15</sup> ) + midostaurin (FLT3-ITD or TKD)	Cytarabine 100–200 mg/m <sup>2</sup> continuous infusion x 7 days with daunorubicin 60 mg/m <sup>2</sup> or idarubicin 12 mg/m <sup>2</sup> x 3 days and oral midostaurin 50 mg every 12 hours, days 8–21
Standard 7 + 3 (daunorubicin or idarubicin) + quizartinib <sup>16</sup> (FLT3-ITD only)	Cytarabine 100–200 mg/m <sup>2</sup> continuous infusion x 7 days with daunorubicin 60 mg/m <sup>2</sup> or idarubicin 12 mg/m <sup>2</sup> x 3 days and quizartinib 35.4 mg PO daily, days 8–21

# Newer intensive regimens for AML

## PRINCIPLES OF SYSTEMIC THERAPY INTENSIVE INDUCTION ELIGIBLE ([AML-1](#), [AML-2](#))

Therapy	Regimen
CPX-351/dual-drug liposomal cytarabine and daunorubicin <sup>17</sup>	CPX-351/dual-drug liposomal cytarabine 100 mg/m <sup>2</sup> and daunorubicin 44 mg/m <sup>2</sup> on days 1, 3, and 5 x 1 cycle
Decitabine (days 1–5) + venetoclax	Decitabine 20 mg/m <sup>2</sup> IV (days 1–5 of each 28-day cycle) and venetoclax PO once daily (100 mg day 1, 200 mg day 2, and 400 mg day 3 and beyond)
Azacitidine + venetoclax	Azacitidine 75 mg/m <sup>2</sup> SC or IV days 1–7 of each 28-day cycle and venetoclax PO once daily (100 mg day 1, 200 mg day 2, and 400 mg days 3 and beyond)
LDAC + venetoclax <sup>18</sup>	LDAC 20 mg/m <sup>2</sup> /day SC days 1–10 of each 28-day cycle and venetoclax PO once daily (100 mg day 1, 200 mg day 2, 400 mg day 3, and 600 mg days 4 and beyond)
Low-intensity therapy (azacitidine or decitabine)	Azacitidine 75 mg/m <sup>2</sup> SC or IV days 1–7 of each 28-day cycle Decitabine 20 mg/m <sup>2</sup> /day IV (days 1–5 or days 1–10 of each 28-day cycle)
Cytarabine (HiDAC) + (daunorubicin or idarubicin) + etoposide <sup>d,19-21</sup>	Cytarabine 2 g/m <sup>2</sup> every 12 hours x 6 days or 3 g/m <sup>2</sup> every 12 hours x 4 days with daunorubicin 50 mg/m <sup>2</sup> or idarubicin 12 mg/m <sup>2</sup> x 3 days, and etoposide 50 mg/m <sup>2</sup> days 1–5 (1 cycle)

# Regimens for patients “unfit” for intensive regimens

PRINCIPLES OF SYSTEMIC THERAPY  
LOWER INTENSITY THERAPY (INTENSIVE INDUCTION INELIGIBLE OR DECLINES)  
(AML-4)

Therapy	Regimen
Azacitidine + venetoclax <sup>24</sup>	Azacitidine 75 mg/m <sup>2</sup> SC or IV days 1–7 of each 28-day cycle and venetoclax PO once daily (100 mg day 1, 200 mg day 2, and 400 mg days 3 and beyond)
Azacitidine + ivosidenib ( <i>IDH1</i> mutation) <sup>25</sup>	Azacitidine 75 mg/m <sup>2</sup> SC or IV (days 1–7 or days 1–5, 8, and 9 of each 28-day cycle) and ivosidenib 500 mg PO once daily on days 1–28
Decitabine + venetoclax <sup>26</sup>	Decitabine 20 mg/m <sup>2</sup> IV (days 1–5 or days 1–10) and venetoclax PO once daily (100 mg day 1, 200 mg day 2, and 400 mg day 3 and beyond)
Ivosidenib <sup>27,28,29</sup> ( <i>IDH1</i> mutation)	500 mg PO once daily on days 1–28 of a 28-day cycle
LDAC + venetoclax <sup>30</sup>	LDAC 20 mg/m <sup>2</sup> /day SC days 1–10 of each 28-day cycle and venetoclax PO once daily (100 mg day 1, 200 mg day 2, 400 mg day 3 and 600 mg days 4 and beyond)
Azacitidine	75 mg/m <sup>2</sup> SC or IV days 1–7 of each 28-day cycle
Decitabine	20 mg/m <sup>2</sup> /day IV (days 1–5 of each 28-day cycle)
Gemtuzumab ozogamicin (CD33 positive) <sup>a,1,31</sup>	6 mg/m <sup>2</sup> IV on day 1 and 3 mg/m <sup>2</sup> IV on day 8

## NCCN Guidelines Version 2.2024 Myelodysplastic Syndromes

[NCCN Guidelines Index](#)  
[Table of Contents](#)  
[Discussion](#)

### PROGNOSTIC SCORING SYSTEMS

#### INTERNATIONAL PROGNOSTIC SCORING SYSTEM (IPSS)<sup>a,1</sup>

Survival and AML Evolution					
	Score Value				
Prognostic variable	0	0.5	1.0	1.5	2.0
Marrow blasts (%) <sup>b</sup>	<5	5–10	—	11–20	21–30
Karyotype <sup>c</sup>	Good	Intermediate	Poor	—	—
Cytopenia <sup>d</sup>	0/1	2/3	—	—	—

#### PROGNOSIS ACCORDING TO IPSS RISK SCORE<sup>1</sup>

IPSS Risk Category (% IPSS pop.)	Overall Score	Median Survival (y) in the Absence of Therapy	25% AML Progression (y) in the Absence of Therapy
LOW (33)	0	5.7	9.4
INT-1 (38)	0.5–1.0	3.5	3.3
INT-2 (22)	1.5–2.0	1.1	1.1
HIGH (7)	≥2.5	0.4	0.2

For IPSS: Low/Intermediate-1, see [MDS-4](#) through [MDS-6](#)

For IPSS: Intermediate-2/High, see [MDS-7](#)

<sup>a</sup> IPSS should be used for initial prognostic and planning purposes. WPSS permits dynamic estimation of prognosis at multiple time points during the course of MDS.

<sup>b</sup> Patients with 20%–29% blasts may be considered to have MDS (FAB) or AML (WHO).

<sup>c</sup> Cytogenetics: Good = normal, -Y alone, del(5q) alone, del(20q) alone; Poor = complex (≥3 abnormalities) or chromosome 7 anomalies; Intermediate = other abnormalities. [This excludes karyotypes t(8;21), inv16, and t(15;17), which are considered to be AML and not MDS.]

<sup>d</sup> Cytopenias: neutrophil count <1,800/mcL, platelets <100,000/mcL, Hb <10 g/dL.

<sup>e</sup> Cytogenetic risks: Very good = -Y, del(11q); Good = normal, del(5q), del(12p), del(20q), double including del(5q); Intermediate = del(7q), +8, +19, i(17q), any other single or double independent clones; Poor = -7, inv(3)t(3q)/del(3q), double including -7/del(7q), complex: 3 abnormalities; Very poor = complex: >3 abnormalities.

#### REVISED INTERNATIONAL PROGNOSTIC SCORING SYSTEM (IPSS-R)<sup>2</sup>

Prognostic variable	Score Value						
	0	0.5	1	1.5	2	3	4
Cytogenetic <sup>e</sup>	Very good	—	Good	—	Intermediate	Poor	Very poor
Marrow blasts (%)	≤2	—	>2–<5	—	5–10	>10	—
Hemoglobin	≥10	—	8–<10	<8	—	—	—
Platelets	≥100	50–<100	<50	—	—	—	—
ANC	≥0.8	<0.8	—	—	—	—	—

#### PROGNOSIS ACCORDING TO IPSS-R RISK SCORE<sup>2</sup>

IPSS-R Risk Category (% IPSS-R pop.)	Overall Score	Median Survival (y) in the Absence of Therapy	25% AML Progression (y) in the Absence of Therapy
VERY LOW (19)	≤1.5	8.8	Not reached
LOW (38)	>1.5–≤3.0	5.3	10.8
INT <sup>3</sup> (20)	>3.0–≤4.5	3	3.2
HIGH (13)	>4.5–≤6.0	1.6	1.4
VERY HIGH (10)	>6.0	0.8	0.7

For IPSS-R: Very Low/Low/Intermediate, see [MDS-4](#) through [MDS-6](#)

For IPSS-R: Intermediate/High/Very High, see [MDS-7](#)

Metzeler KH et al. *Blood*. 2016; 128 (5): 686-696

# What I used to think of "Precision Medicine"

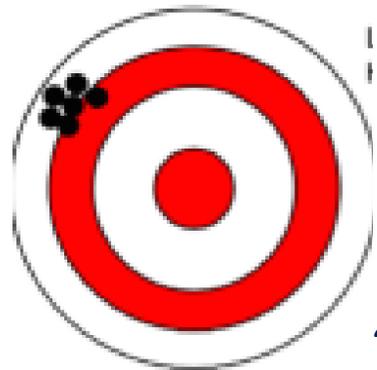

# NIH/NCI/FDA MRD in AML

## AML Precision Medicine

- Rapid diagnostics (3d)
- Trials based on targets
- MRD as endpoint
- MRD eraser trials

## fNIH MRD in AML

- Reagents for testing
- “Sandbox” for testing new analyses
- Winner of bake off goes into next trials
- NIH and partners fund (pharma and biotech)

*“I’d rather be vaguely right than precisely wrong.”*  
(John Maynard Keynes)

# NCI Myeloid Malignancies Molecular Analysis for Therapy Choice “myeloMATCH”

1. Genetic driven protocol assignment (cyto, mutations)
2. Predominately **phase 2** trials
3. Predominately **MRD driven** endpoints (**flow cytometry**)

# myeloMATCH Aims

- To create a portfolio of rationally designed treatment substudies onto which patients sequentially enroll over their entire treatment journey. As increasingly lower remaining tumor burden is achieved, the focus will be to target residual disease more effectively.
- Create an efficient operational model attractive to industry partners and NCTN sites to accelerate therapeutic advances for myeloid malignancies.
- Develop the careers of young investigators by promoting leadership throughout the clinical trial portfolio and laboratory program.

# New AML/MDS pt

*Basket Assignments  
in Each Tier*

**Master Screening and Reassessment Protocol**

**Initial treatments for newly diagnosed patients**

**Tier 1 Treatment Trials**

*Older Adult  
MDS  
Young Adult*

**High  
Disease  
Burden**

**MSRP Reassessment 1**

**Trials designed to evaluate patients in CR using MRD-based assignments**

**Tier 2 Treatment Trials (MRD)**

*Older Adult  
MDS  
Young Adult*

**MSRP Reassessment 2**

**Trials designed to evaluate patients using MRD-based assignments**

**Tier 3 Treatment Trials (Transplant/Consolidation)**

*Transplant/ Cellular  
Therapy*

**MSRP Reassessment 3**

**Participants with low disease burden states: trials designed to validate clinical utility of NGS and other assays**

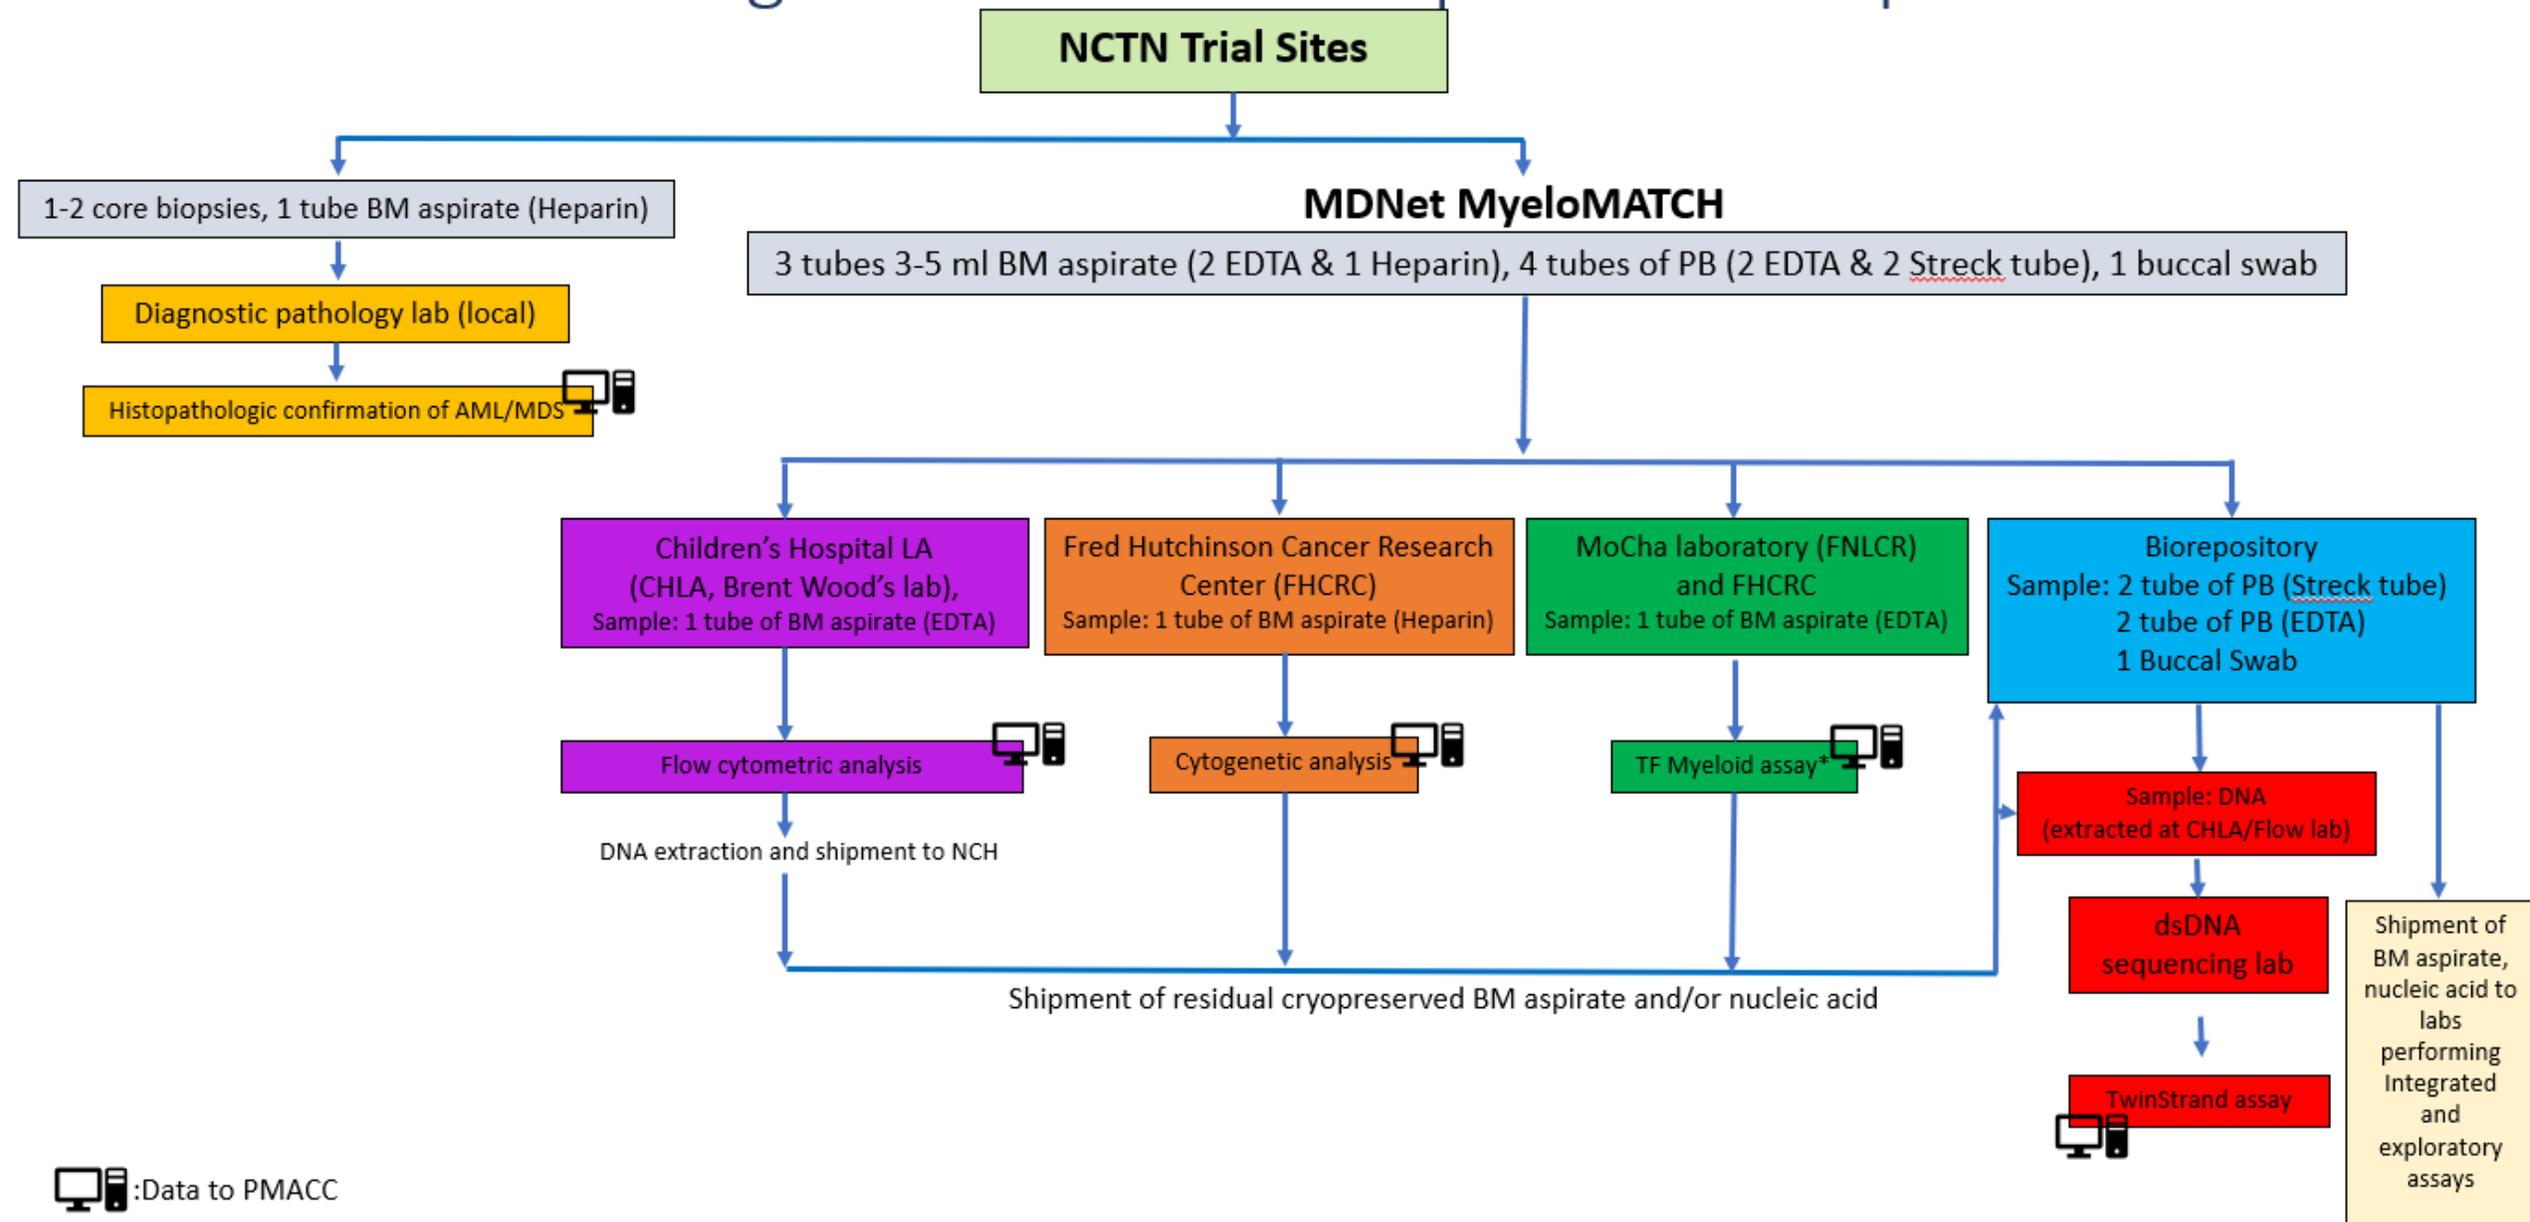

**Tier 4 Treatment Trials (NGS)**

*Clinical Utility  
Assay Validation  
studies*

**Low  
Disease  
Burden**

# myeloMATCH:

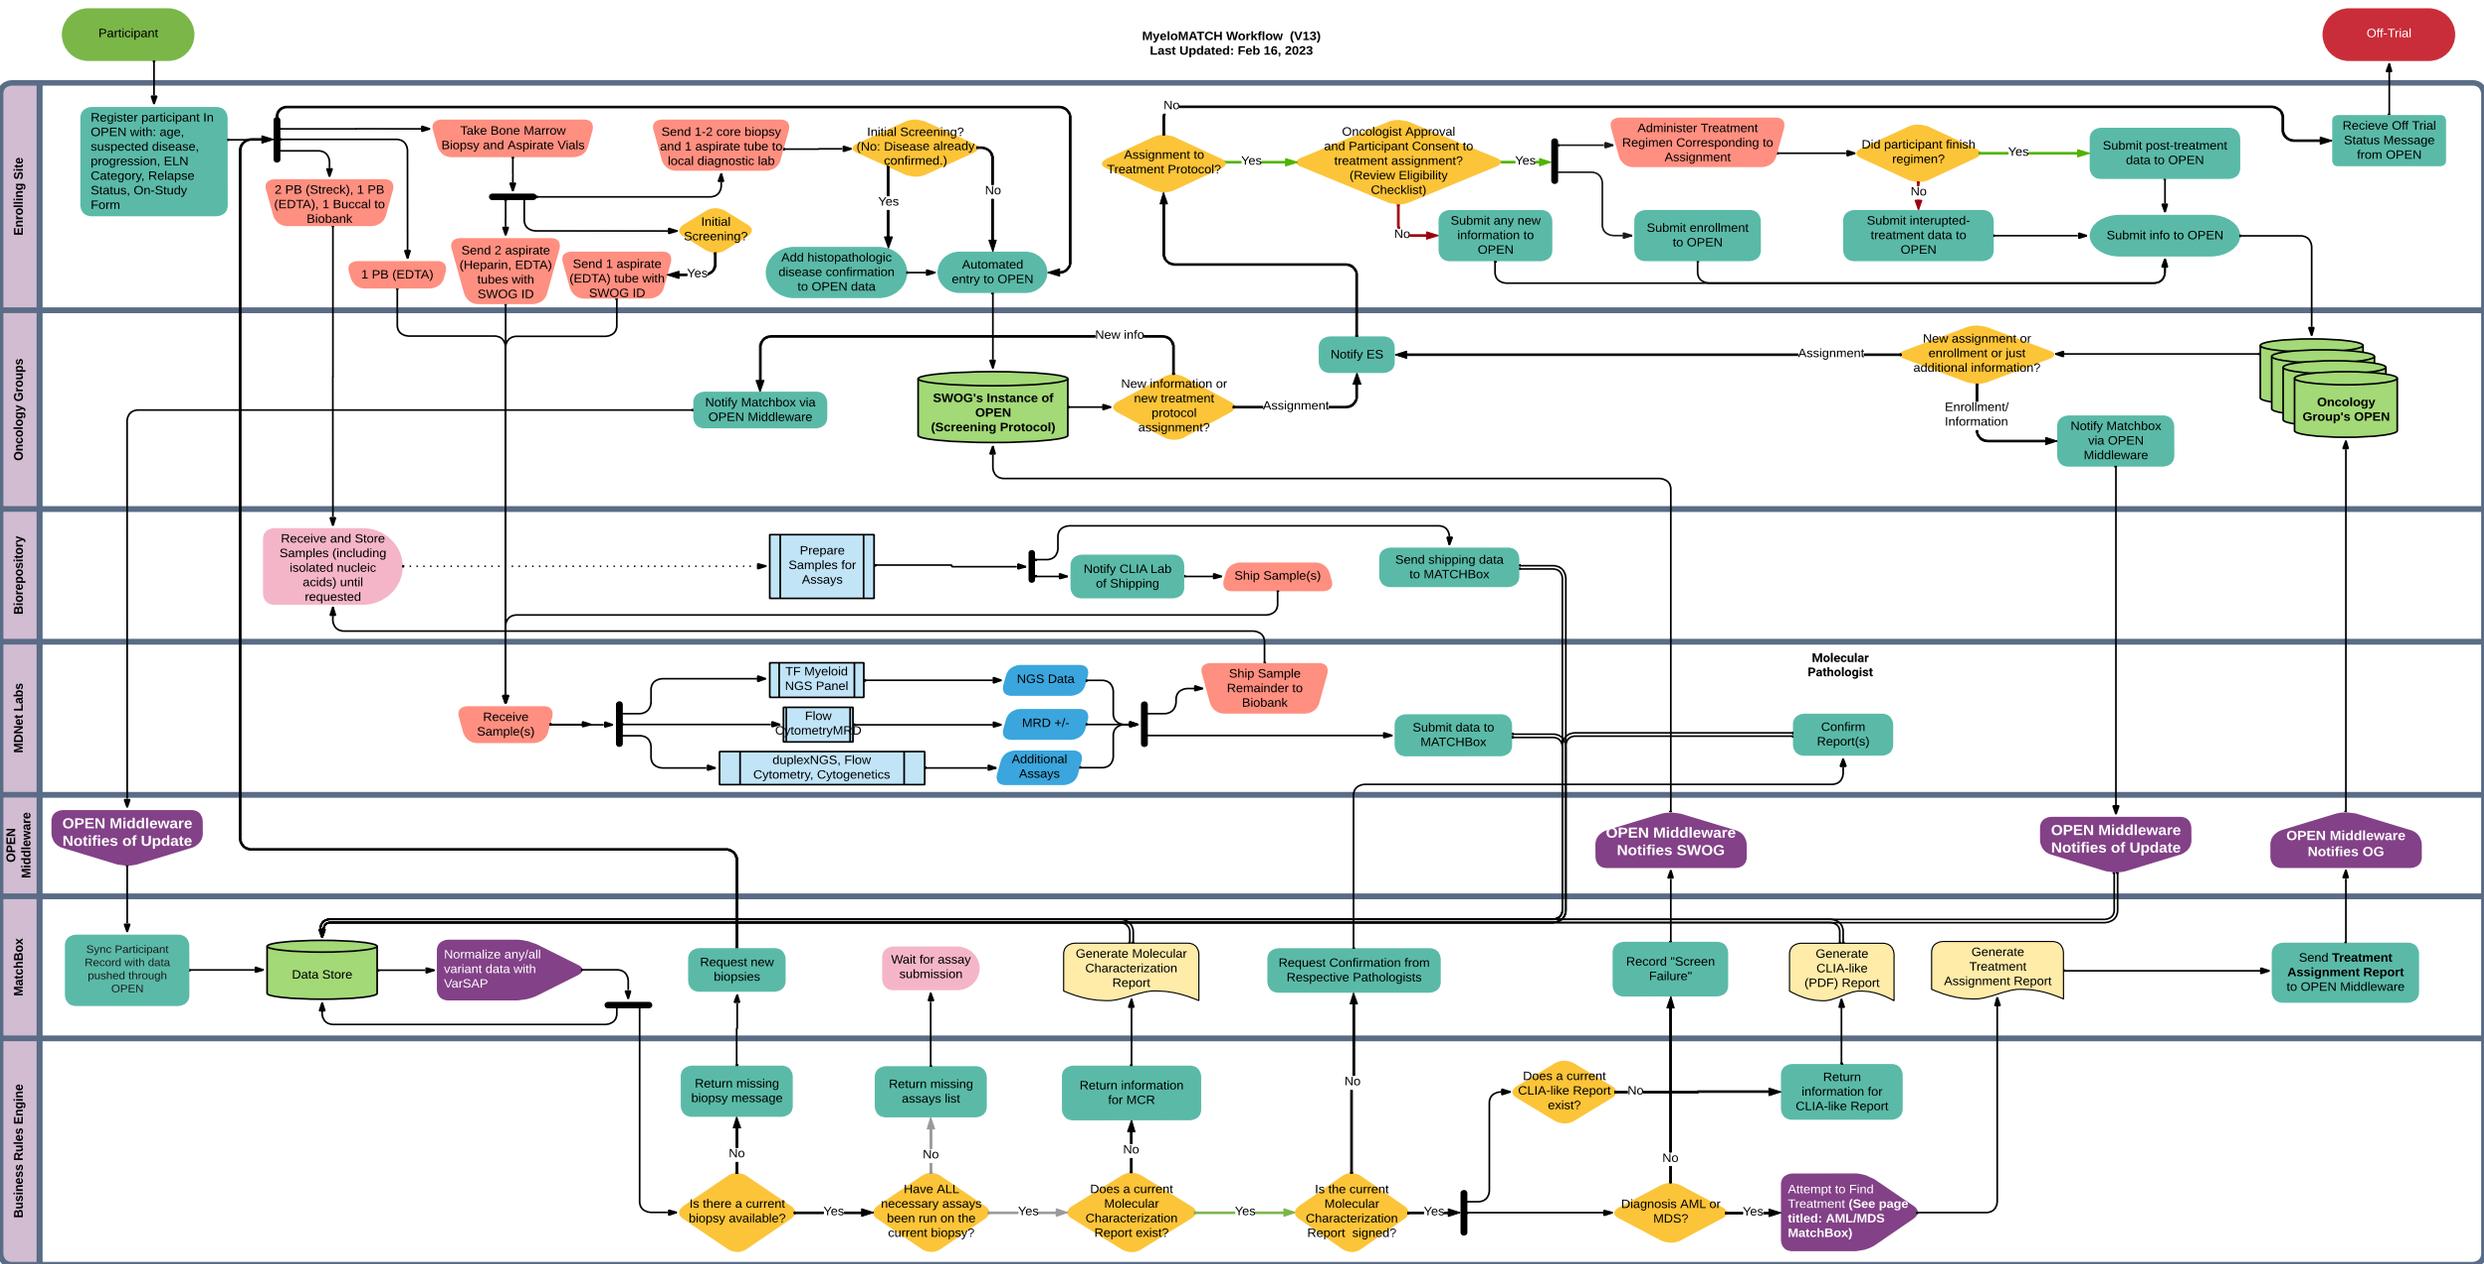

## Master screening and reassessment protocol sample work flow

# Essential components

- **Informational technology-*touches everything***
  - Enrollment from local sites, follows patients throughout trials
  - Tracks samples to labs and from labs
  - Integrates clinical info and lab data
  - Oversees treatment assignment algorithms and trial assignment
- **Agents**
  - Links new targets with new agents
  - Finds pharma partners
  - Develops contracts
- **Testing**
  - Cyto, FISH, flow, NGS-have validated, CLIA assays
  - Work with FDA for IDE
- **Trials**
  - Integrate agents and testing
  - Work with pharma for acceptable design

# Overview of myeloMATCH Agents and Genes Working Group

- Meeting timeline
  - Internal NCI meeting vetting company and agent
  - myeloMATCH Agents and Genes Working Group meeting
  - Typically, several follow-up meetings with regulatory affairs or myeloMATCH leadership
    - CRADA negotiation process can take up to 6 months
- NCI and the myeloMATCH Agents and Genes Working Group have reviewed **over 30 agents.**

*208-228 hours required for each agent brought into program  
35-60 hours for agents not brought into program*

---

# Molecular Diagnostics Laboratory Network (MDNet)

## Integral Assays Under NCI IDE

### 72 Hours for Initial Patient Assignment

- Cytogenetics and FISH
- NCI Myeloid Assay version 2 (Genexus platform)
- Error-corrected Sequencing (Duplex Sequencing)
- Flow Cytometric Analysis

# Methodologies

Integral

## What?

- Cytogenetics
- Flow cytometry
- Rapid NGS

Integrated

- Duplex Seq
- Single cell “omics
- RNA seq

## Who and where?

- Min Fang (Fred Hutch)
- Brent Wood (Children’s LA)
- MOCHA (NIH), JR (Fred Hutch)
  
- TS (Seattle) (JR backup?)
- JR (Fred Hutch)
- JR (Fred Hutch)

# NCI Myeloid Assay = Genexus Ion Torrent NGS

**Ion Torrent™ Genexus™**  
Integrated Sequencer (Available November 2019)

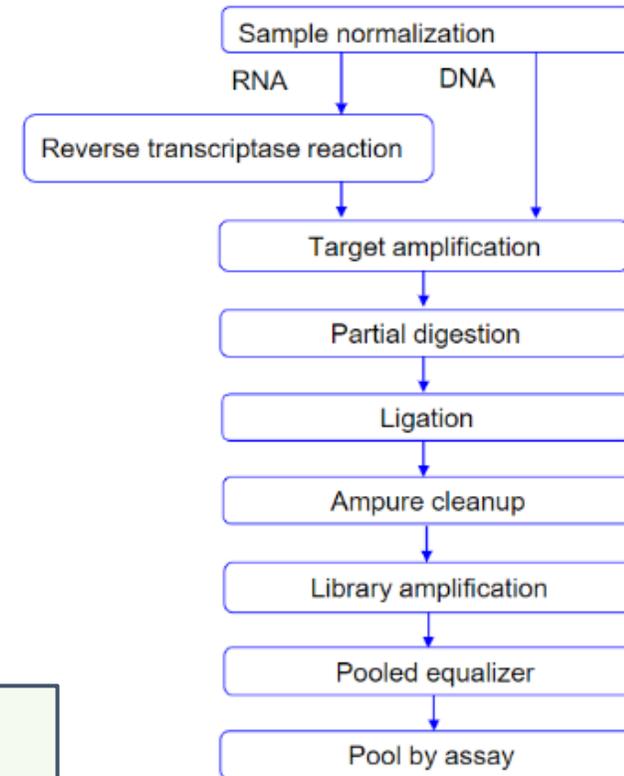

Ion Torrent™  
GX5™ Chip:  
12–15M  
reads/lane

14 hours for a single-lane run  
(approx. 24 to 30 hours for full chip)

Up to 32 Samples per run

## Library Prep - AmpliSeq

- Automated library preparation using Ion AmpliSeq technology
- Template preparation via isothermal amplification
- Rapid semiconductor pH sensor-based sequencing

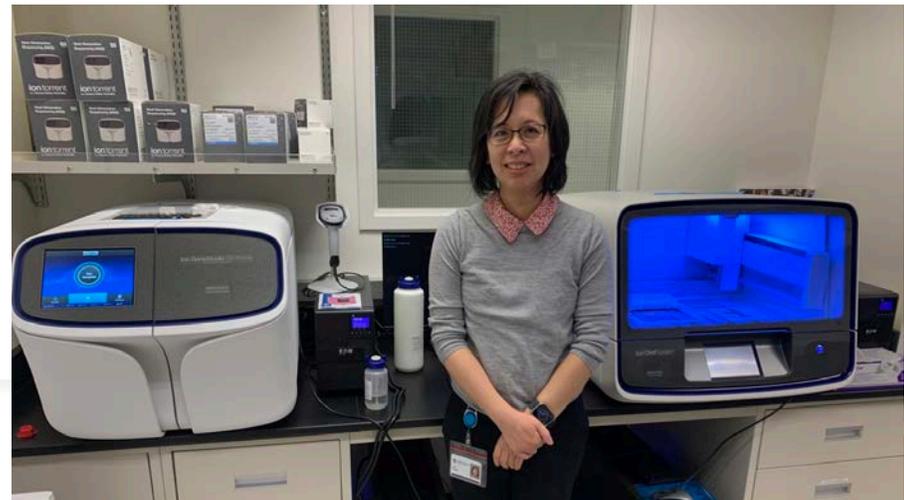

# Ion Torrent GeneStudio and Genexus

## Complementary Systems for Infectious Disease and Oncology

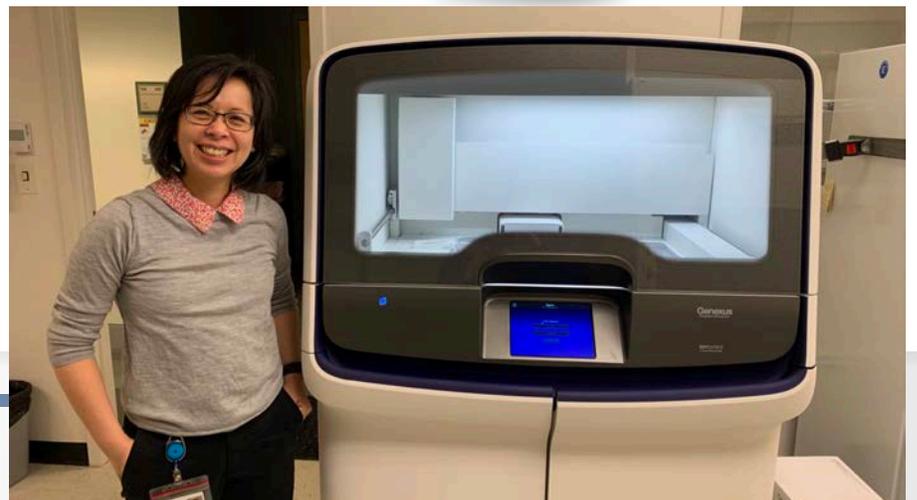

### Ion GeneStudio S5 Series

Scalable, targeted NGS to support small and large projects

### Genexus System

Specimen to report in a single day with a hands off, automated workflow\*

# NCI Myeloid Assay targets in V2: RNA and DNA

*AML: 93.3% of variants at >=3% frequency and 72% of variants at >1% frequency in AML*

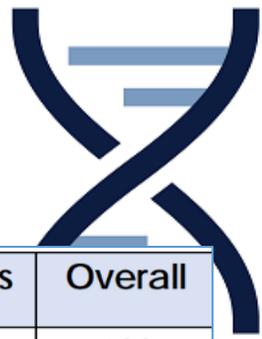

- ~1600 DNA hotspots
- ~800 RNA fusion isoforms and exon splice variants
- RNA input of 14.25ng and DNA of 27.75ng per sample
- Avg 1.5 -2 mil DNA reads and 300-500k RNA reads/sample
- Targets: AML, MDS, MPN, and other myeloid neoplasms

# Association of Measurable Residual Disease With Survival Outcomes in Patients With Acute Myeloid Leukemia

## A Systematic Review and Meta-analysis

Nicholas J. Short, MD; Shouhao Zhou, PhD; Chenqi Fu, MS; Donald A. Berry, PhD; Roland B. Walter, MD, PhD, MS; Sylvie D. Freeman, DPhil, MBChB; Christopher S. Hourigan, DM, DPhil; Xuelin Huang, PhD; Graciela Nogueras Gonzalez, MPH; Hyunsoo Hwang, PhD; Xinyue Qi, PhD; Hagop Kantarjian, MD; Farhad Ravandi, MD

61 studies, >9,000 patients

Figure 2. Estimated Survival Curves, Stratified by Measurable Residual Disease

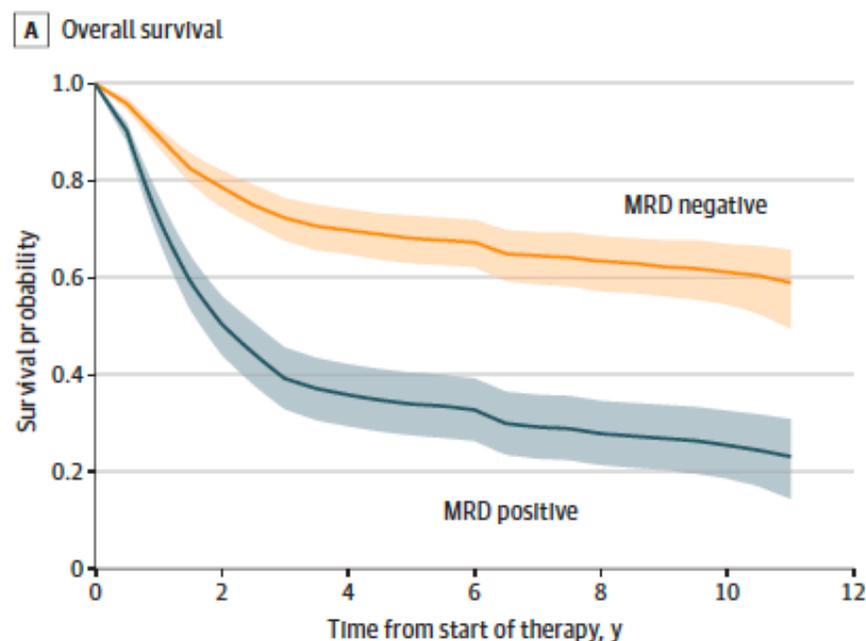

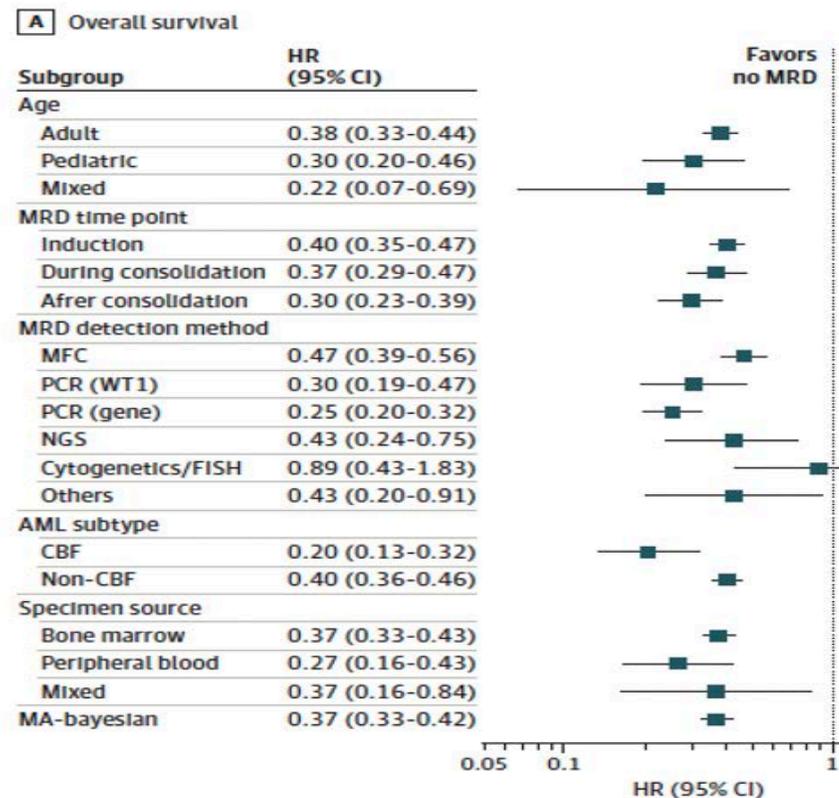

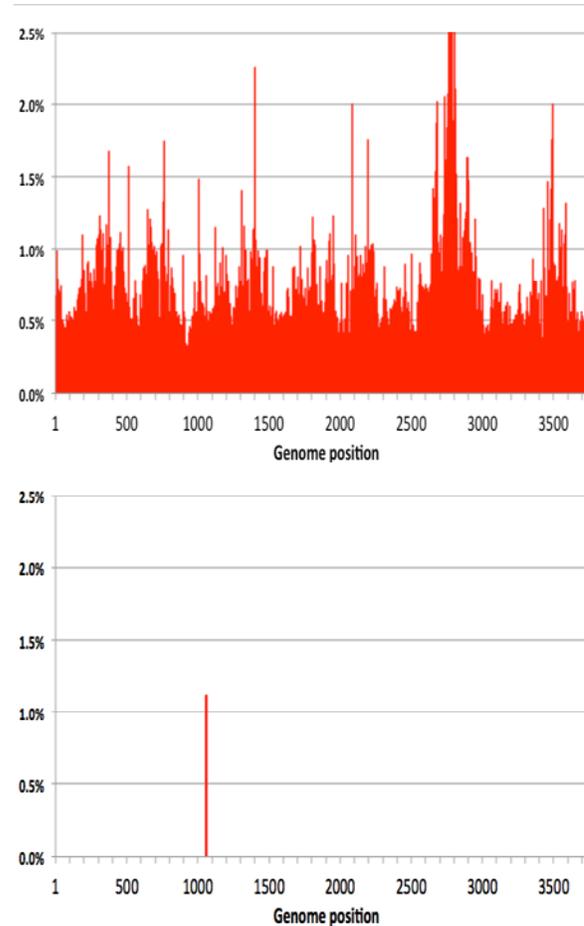

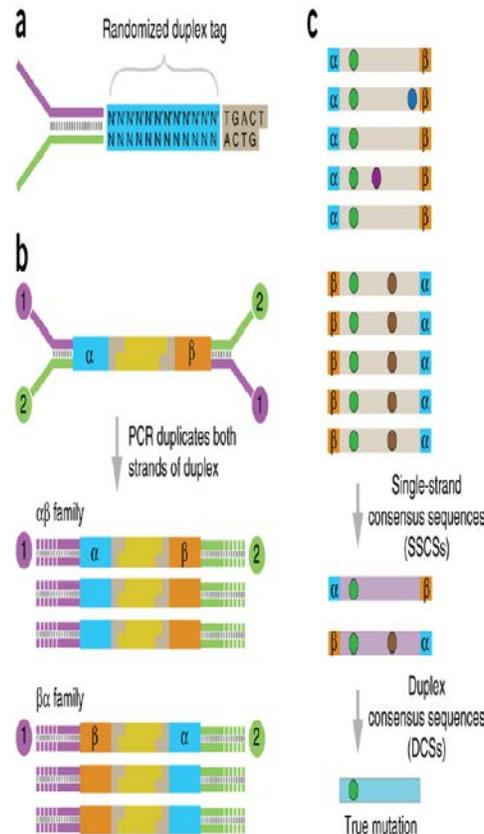

Figure 3. Hazard Ratios (HRs) for Subgroups

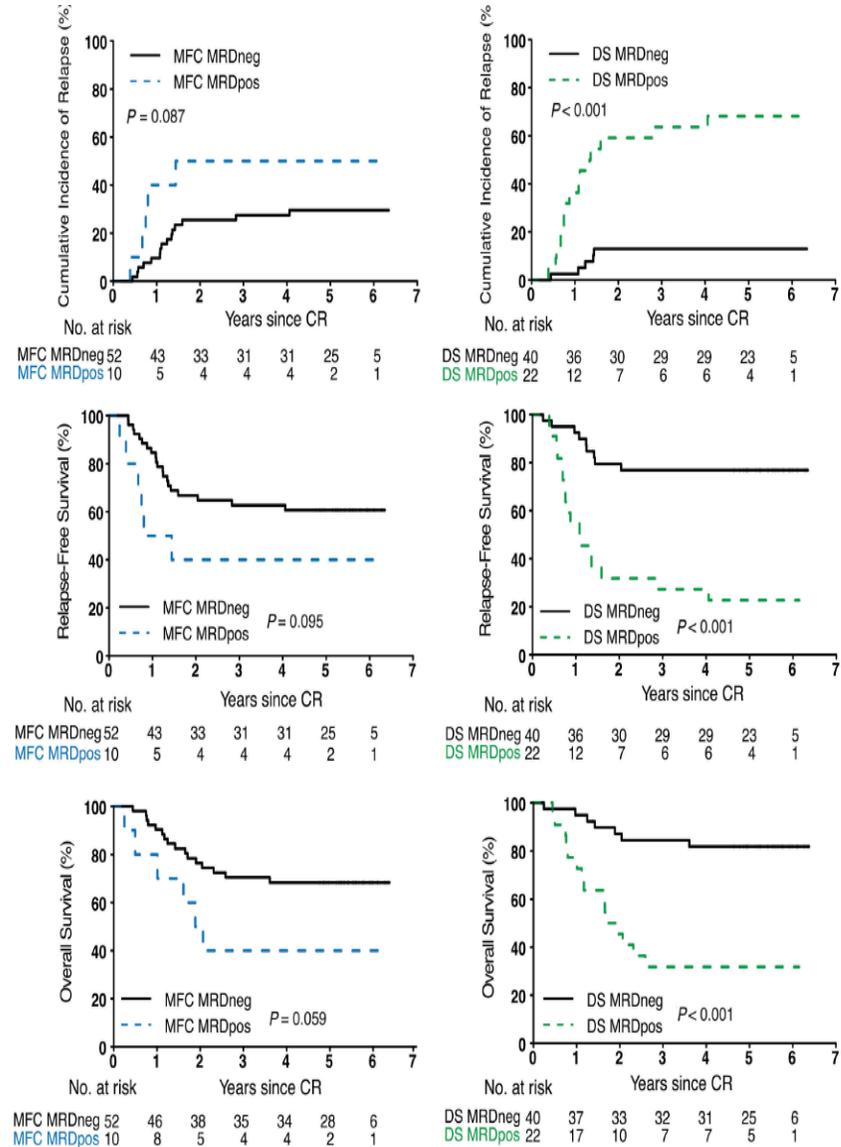

# Duplex seq and ABL TKD mutation detection

- Compare Sanger seq of mRNA to Duplex Seq of DNA
- 1/26 cDNA molecules have artifact error
- Most errors are transition mutations (e.g. C->T)
- Most mutations are artifact
- Most true mutations that happen during therapy were pre-existent
- Pre-existent mutations  
CML cp < CML bc < Ph+ ALL

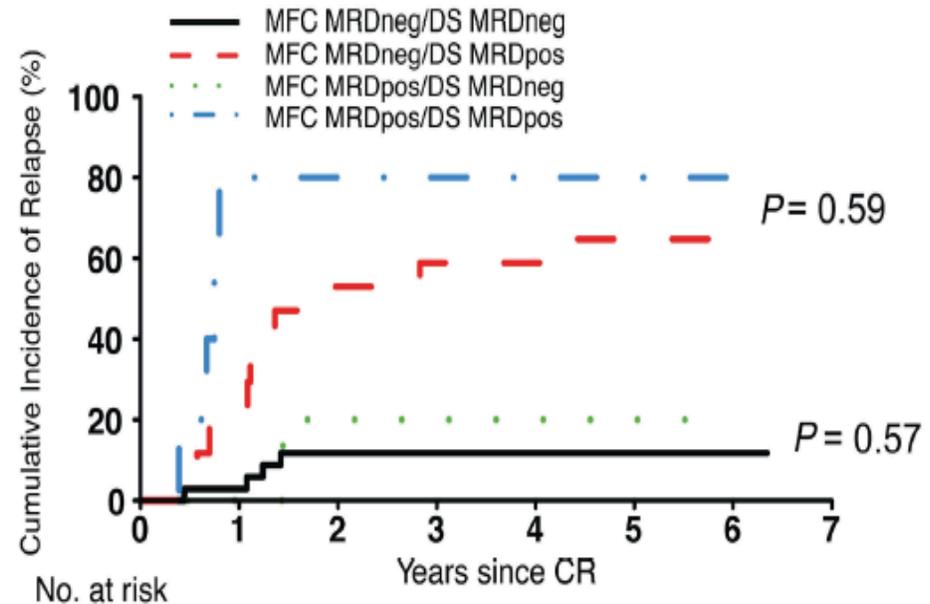

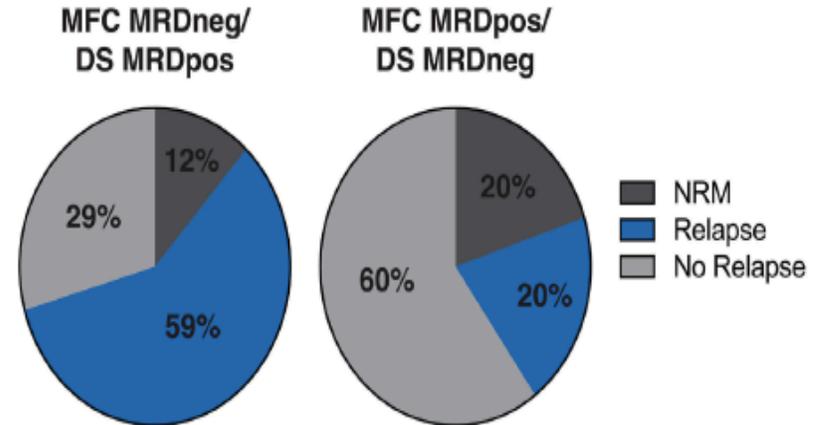

# Outcomes of residual disease

Residual disease definition	Time to relapse	Relapse-free survival	Overall survival
DS1: Non-DTA VAF > 0.1% with NPM1 > 0.01%	7.1 (2.7, 18.9) <0.001	4.9 (2.2, 10.9) <0.001	5.1 (2.1, 12.3) <0.001
DS2: Non-DTA VAF > 0.1%	4.8 (1.9, 11.8) <0.001	4.1 (1.8, 9.1) <0.001	4.8 (2.1, 11.1) <0.001
DS3: Any mutation with VAF > 0.1%	4.3 (1.6, 11.3) 0.003	3.5 (1.5, 7.9) 0.003	3.2 (1.3, 7.7) 0.009
DS4: Fold change < 2	3.0 (1.2, 7.5) 0.018	2.4 (1.1, 5.2) 0.032	2.1 (0.9, 4.8) 0.089
DS5: Non-DTA fold change < 2	3.9 (1.6, 9.7) 0.004	2.4 (1.1, 5.2) 0.032	4.3 (1.9, 10.0) <0.001
DS6: Non-DTA VAF > 1% with NPM1 > 0.01%, agnostic to diagnostic variants	5.5 (2.0, 15.2) 0.001	3.4 (1.5, 7.8) 0.003	4.0 (1.6, 9.7) 0.003
Flow	2.5 (0.9-6.7) 0.08	2.2 (0.9-5.4) 0.09	2.4 (0.97-6.1) 0.06

- SWOG S0106 (Randomized 7&3 v. 7&3 + GO)
- N=62 with paired dx and CR samples with flow
- 29 gene panel
- At diagnosis
  - 172 potential deleterious variants detected
  - Most common *FLT3*
  - Average VAF 31%
  - 90% had at least one variant (med. 2, range 0-9)
- At remission
  - Average VAF 0.2% (41-0.0036%)
  - Most common *DMNT3A*, *TET2*, *ASXL1*
  - All patients had at least one variant detected
  - 68% had a diagnostic variant found in remission sample

	MFC MRDneg (N=52)	MFC MRDpos (N=10)	Total
DS MRDneg	35 (67%)	5 (50%)	40 (64.5%)
DS MRDpos	17 (33%)	5 (50%)	22 (35.5%)

# Challenges and Opportunities

**Would each panelist please discuss the following challenges and opportunities with Myelomatch:**

1. What do you and your site PI appreciate about this protocol?
2. Could you please remark on the time-to-activation process at your site noted in the previous slide?
3. What considerations in feasibility, logistics, and operations are important to know and address?
4. Have you experienced any enrollment or registration challenges?
5. What challenges or opportunities have you experienced in collaborating with ancillary departments to make the protocol successful?
6. Could you share any operational tips and tricks for Myelomatch?
7. If you were in charge of this study, what changes you would make to the protocol?

# PAC ANALYSIS: Where are the gaps?

Currently: 27 Advocates Total (soon to be 26)  
Goal is 30 – Fill Black/AA, Asian, Rural, ?? (where needed)  
Funded through February 28, 2026: 30 (20 RA's/10 CA's)

**Gender**

- 29.6% Male underrepresented
- Population 50/50

**Breast Cancer**

- 33.3% (overrepresented)
- Survivors (not incl. Caregivers)

**Age**

- 33.3% AYA
- 33.3% Older Adults

US Population ESTIMATES

PAC Percentage

Group	US Population ESTIMATES	PAC Percentage
Black/AA	15.4%	14.8%
Hispanic/Latino	19.1%	18.5%
Asian American <i>UNDERREPRESENTED</i>	7%	3.7%
SGM	7%	14.8%
Rural Populations <i>UNDERREPRESENTED</i>	17.9%	11.1%
Veterans	6%	7.4%

# Additional Steps Toward Collaboration

We encourage you to engage with your “assigned” advocate.

- Don’t hesitate to contact PAC co-chairs
- Ask your assigned advocate if other PAC members might be able to help, too

Consider a “Pitch the PAC” session.

---

# PITCH THE PAC

Your ideas, our insights

PAC chairs set it up at your request

One-hour informal meeting

Study team presents the concept

Open discussion with PAC

It's never too soon.  
Indeed, earlier is better.  
And earliest is best!

Email: [barbarasegarra@swog.org](mailto:barbarasegarra@swog.org) or [mercurio.annemarie@gmail.com](mailto:mercurio.annemarie@gmail.com)

---

# BY THE NUMBERS

- Number of PAC members per session

- Number of sessions held to date

- PAC is represented in many communities and across many cancer types

# NEW INITIATIVE AFTER FALL 2023 GROUP MEETING

11/23

- Cancer Care Delivery
- Changed study aims, expanded eligibility criteria

2/24

- Symptom Management/Quality of Life
- Feedback on PRO collection, how will you measure success (reduce fatigue after radiation)

3/24

- GU Committee (Bladder Cancer Study)
- Recommended by “triage” to discuss with PAC/bladder preservation is a big motivator for this study

4/24

- Lung Committee
- How to present study to patient as an alternative to standard of care, study schema was clarified

5/24

- Cancer Care Delivery
- Metastatic breast cancer study, how to approach patients, appropriate compensation amounts

7/24

- Lung Committee
- Need for patient friendly study materials, support of use of PRO to accurately assess tolerability

8/24

- Early Therapeutic/Rare Cancer
- Protocol coordinators joined, asked to be invited to all future sessions because of the depth of the insights!
