
Oncology Research Professionals (ORP) Site Operations Meeting

SWOG Fall Meeting 2022

Connie Szczepanek, RN, BSN, CCRP

Liz Edwards, BA, CCRP

Caitlin Hutchinson, MS

Logistics Details

- Please keep your phone on mute to help with sound quality.
- Questions can be submitted all throughout the meeting via the CHAT icon. We will present them to the speakers during the meeting.
- The presentations will be posted on the SWOG website within a few weeks.

FALL 2022 Site Operations Meeting Agenda

October 19, 5:30 – 7:30 PM CT

Open, Welcome, and Announcements	Connie Szczepanek
NCI Updates	Andrea Denicoff
PMB Updates	Matt Boron
CTSU Regulatory Office Updates	Ryan Wilkins
SWOG Updates	
*Group Chair's Office & Study Finance	Casey Dawson Pat Mize Kyle Theige
*Operations & Membership	Dana Sparks Connie Barnes
*Statistics & Data Management Center	Cathy Rankin
*Quality Assurance	Laura Gonzales
Thoughts on Life	Caitlin Hutchinson, Liz Edwards
Closing Remarks	Connie Szczepanek

- Although there are no formal CE credits for this meeting, you may print a copy of the agenda to reflect your attendance (e.g.: for use with SOCRA or ACRP).

ORP Site Operations Committee

Wednesday, October 19, 2022 | 5:30 PM - 7:30 PM CT

Open, Welcome, and Announcements	Connie Szczepanek
NCI Updates	Andrea Denicoff
PMB Updates	Matt Boron
CTSU Regulatory Office Updates	Ryan Wilkins
SWOG Updates	
• Group Chair's Office & Study Finance	Casey Dawson, Pat Mize, Kyle Theige
• Operations Office & Membership	Dana Sparks, Connie Barnes, Leslie Weissenstein
• Statistics & Data Management Center	Rodney Sutter, Phyllis Goodman, Cathy Rankin
• Quality Assurance	Laura Gonzales
Thoughts on Life	Caitlin Hutchinson, Liz Edwards
Closing Remarks	Connie Szczepanek

I certify that I attended _____ hours of this meeting. The topics of the meeting contribute to the education and professional advancement in clinical research.

Signature _____ Date _____

Site Operations Sub-committee Chairs:

Connie Szczepanek, RN, BSN, CCRP – connie.szczepanek@crcwm.org

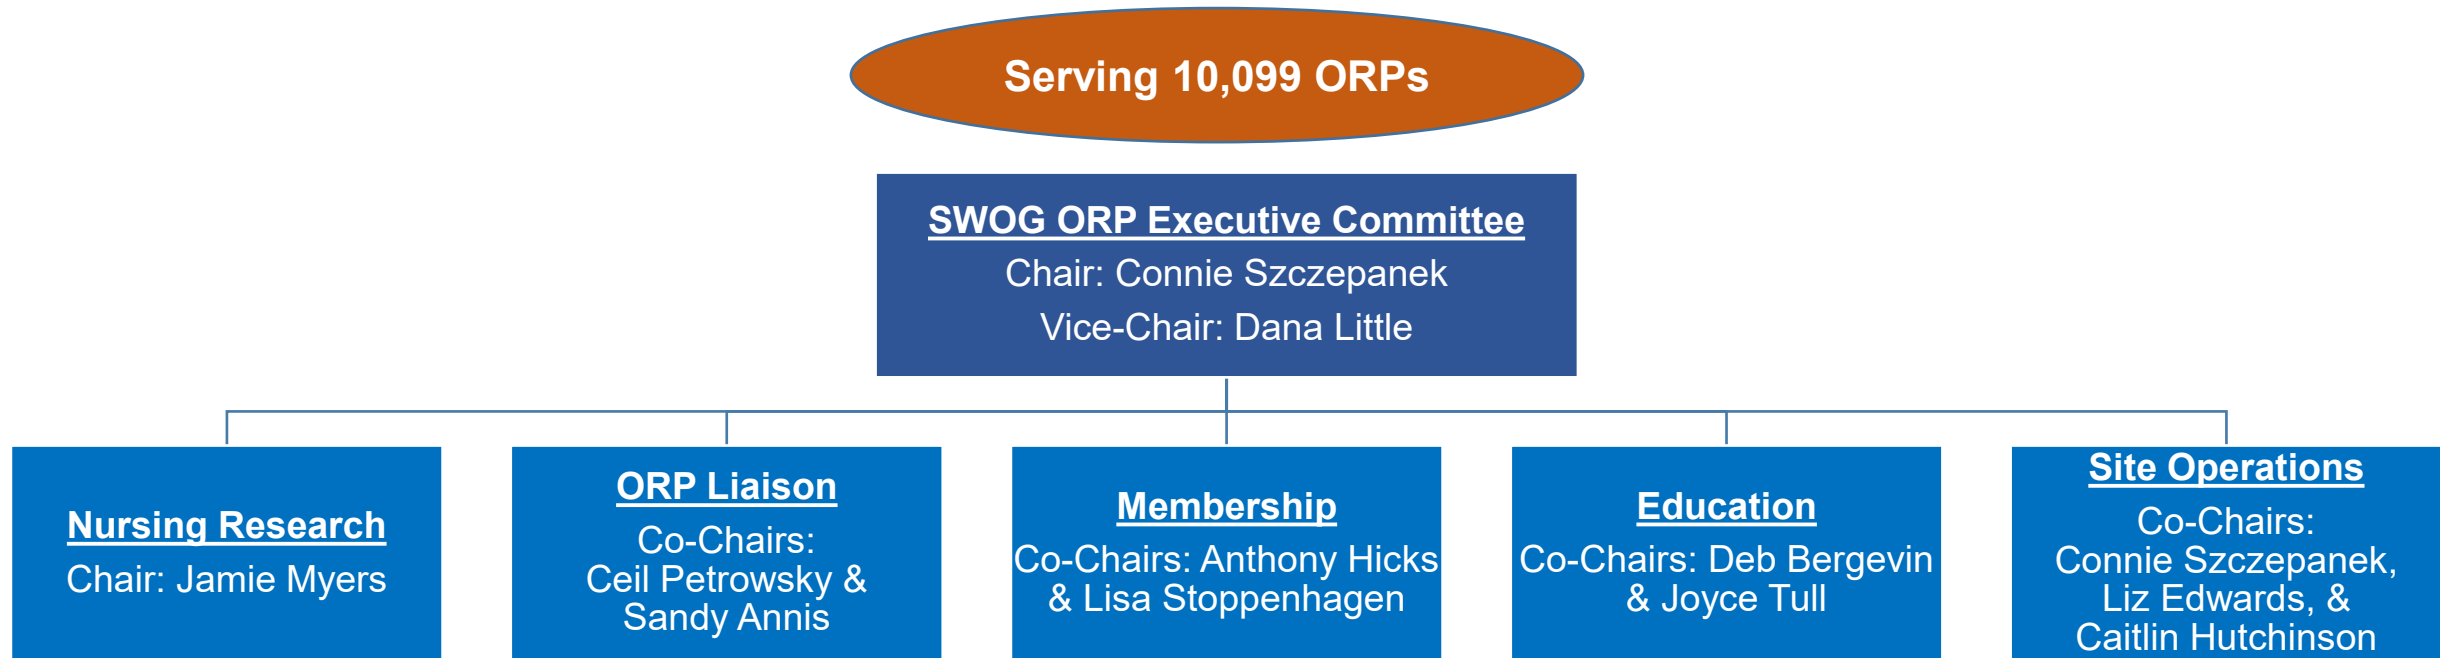

Liz Edwards, BA, CCRP – edwardel@ohsu.edu

Caitlin Hutchinson - caitlin.hutchinson2@va.gov

YOU are The ORP Committee!

“SWOG holds a fundamental conviction that the Oncology Research Professionals (ORP) play a crucial role in the successful development, implementation, and analysis of any SWOG clinical trial.”

The SWOG Oncology Research Professionals (ORP) Committee & Sub-Committees

SWOG Cancer Research Network's Mission

- To significantly improve lives through cancer clinical trials and translational research.

ORP Committee Mission

- To support SWOG activities through promotion of integrity and excellence in clinical research through education, guidance, & collaborative contributions.

Acknowledgements

ORP Executive Committee Members

Sandy Annis	Jamie Myers
Deb Bergevin	Joyce Nancarrow-Tull
Annette Betley	Ceil Petrowsky
Anthony Hicks	Lisa Stoppenhagen
Caitlin Hutchinson	Connie Szczepanek
Dana Little	

YOU are The ORP Committee!

To get more deeply involved, see the SWOG Website:
Member Resources / Membership / Committee Membership

<https://www.swog.org/member-resources/membership/committee-membership>

Key Involvement Opportunities

- Disease Specific Liaisons
 - Liaisons at Large
 - Education Team

The Role of an ORP Liaison

An ORP Liaison is a member of both the ORP Liaison Committee and a specific SWOG committee.

- **Reviews protocols in development** and provides feedback from a site and role perspective.
- Provides feedback to the SWOG Disease Committee after the study is activated addressing any **site implementation concerns**.
- Participates in **the development of tools** to assist research sites with study selection, implementation and compliance.
- Maintains **active lines of communication** with SWOG Protocol coordinators and committees.
- Reviews of **ORP Manual chapters**.
- **Mentors and supports** development of new liaison

Open Liaison Positions

Disease Committee	Position
Breast	Research Nurse
Symptom Control	Research Nurse
Early Therapeutics	Research Nurse and CRA
Gastrointestinal	Research Nurse
Leukemia	Research Nurse
Lymphoma	Research Nurse
Myeloma	CRA

An *At Large Liaison Member* is:

- A CRA or RN that is a member of the ORP Liaison Committee and not a specific SWOG committee.
- A member of the ORP Liaison Committee may attend ORP Liaison Committee conference calls, participate in committee projects and receive mentoring from an experienced Liaison while awaiting an opening on a disease committee.

Co- Chair ORP Liaison Committee Ceil Petrowsky RN MSN OCN CCRC cpetrow@luc.edu

Co- Chair ORP Liaison Committee Alexandra Annis CRA aannis2@kumc.edu

New SWOG Learning Management System (LMS)

- Direct link to the LMS is located on the SWOG Member-side of the website under the “Member Resources” menu,
 - Also accessible to SWOG Members via direct url: <https://swog.exphosted.com>.
 - Login with CTEP IAM credentials required to access.
- Online Clinical Trials Training Course, plus
 - Brief (5-15 minutes) modular course additions ongoing.
- All new SWOG study-specific training is maintained in the [CTSU Compliance, Learning, and SOP Solutions \(CLASS\) Learning Management System \[CTSU CLASS LMS\]](#); Accessible NCTN-wide to staff with CTEP IAM login.

Training for SWOG Members	

SWOG has launched a new Learning Management System (LMS)!

THE EXPERTUSONE LMS WILL BE HOME TO ALL TRAINING THAT IS SPECIFIC TO SWOG MEMBERS.

- ✓ **Training certificates** are viewable and printable for one year after completing a course.
- ✓ **Courses are available** in brief 5- to 15-minute modules.
- ✓ **Content is regularly added** and updated. See the “Announcements” window for new content.
- ✓ **In a user-friendly interface**, you can view trainings, take surveys, and complete assessments all from one LMS content player – also available for mobile devices.
- ✓ **Allows us to host** virtual classes integrated with WebEx or Zoom.

NCTN-wide training — such as for protocol-specific requirements and PRO training — will remain in the CTSU CLASS system. But SWOG internal training for members and staff will be in ExpertusOne.

Some of the training content now within ExpertusOne:

- Study Chair Workshop
- Young Investigator Workshop Online
- Investigational Agent Handling
- Clinical Trials Training Course
- Team Science

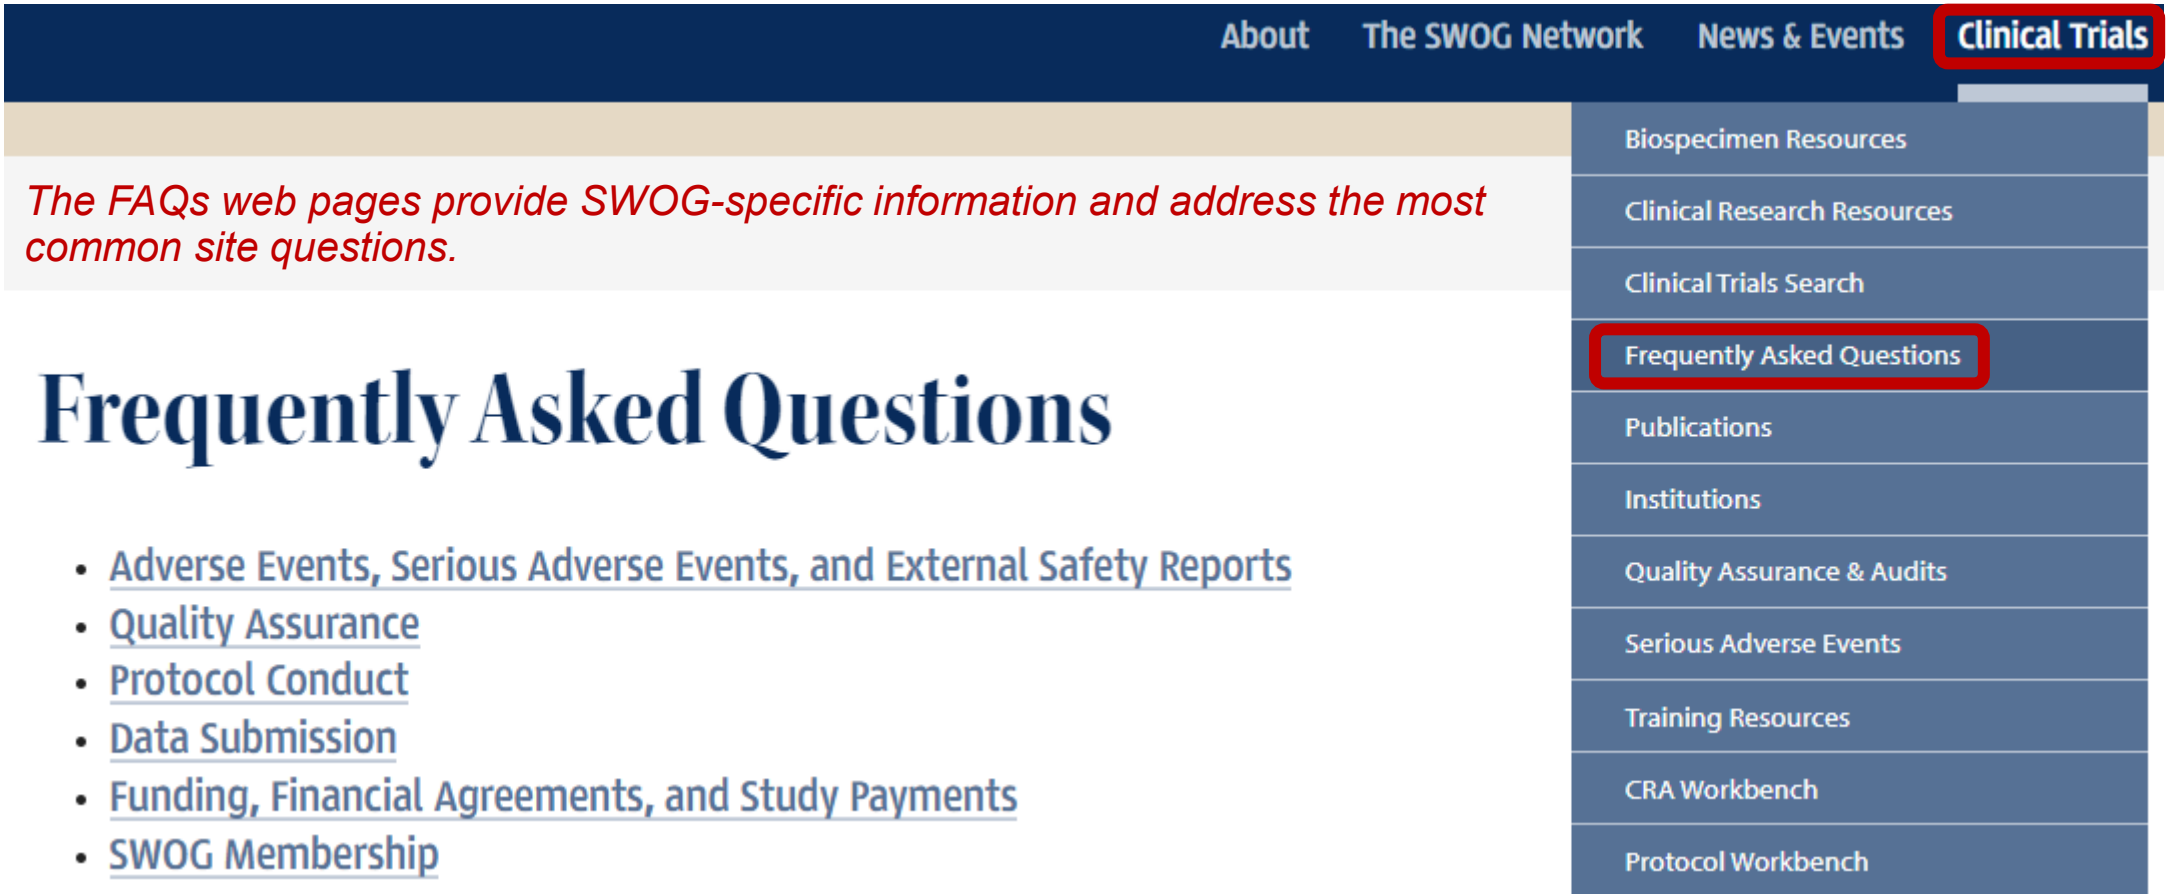

Access SWOG's new LMS at swog.exphosted.com, or link from the “Training for SWOG Members” item on the “Member Resources” menu. Use your CTEP IAM credentials to log in.

Patient-Friendly Summaries and Social Media Toolkits

S1914

- Linked from SWOG.org/clinical-trials and CTSU.org pages for newly activated trials.
- Summary questions selected by a team of patient advocates & health education experts to give patients key info to help them decide whether they want to learn more about a study.

Clinical trial summary (S1914)

Comparing Treatments for High Risk, Early Stage Non-Small Cell Lung Cancer

What is the purpose of this clinical trial?

Surgery is the standard treatment for early stage non-small cell lung cancer. However, some people can't get surgery to remove their lung cancer. Other people don't want to have surgery. In these cases, the standard treatment is radiation, using a procedure called stereotactic body radiotherapy, or SBRT. This clinical trial is testing whether SBRT can be improved when used with a new cancer immunotherapy drug called a checkpoint inhibitor. Other clinical trials have found this immunotherapy can be effective in treating non-small cell lung cancer, and that it may work well if used with radiation. This study aims to find out whether SBRT plus a checkpoint inhibitor is a better treatment.

This trial is set up to find out:

- How long participants survive in each group at the end of the five-year study period
- How long people remain cancer free in the two treatment groups, and if participants have any side effects from taking the study medicine

Why is this trial important?

This trial is important because even after SBRT, non-small cell lung cancer may return. Doctors want to find a better way to treat people so that they live longer, healthier lives. Other trials have shown that this new type of immunotherapy, called a checkpoint inhibitor, can benefit people with non-small cell lung cancer. There is also some evidence that checkpoint inhibitors work well, and are safe, when given along with radiation treatments. This is one of the largest studies so far to test this idea in people with high risk, early stage non-small cell lung cancer.

Who can be in this trial?

This trial is for men and women over the age of 18, with stage 1 or 2 non-small cell lung cancer. The cancer cannot have spread to lymph nodes or any other part of the body.

This trial may be for people who:

- Have proven stage 1 or 2 non-small lung cancer
- Are at higher risk for their cancer growing and spreading based on the size of their tumor, or other tumor features
- Have no evidence of their cancer spreading to another part of their body
- Cannot or will not have lung cancer surgery

This trial is not for people who:

- Have a major infection, an autoimmune disease, or a current or past case of hepatitis B, hepatitis C, or HIV
- Are pregnant
- Have a history of certain types of serious lung disease

S2013

NEW CANCER TRIAL

Patients taking immune checkpoint inhibitors for solid tumors may be eligible for this trial.

CTSU Resources

For New Site Staff

Help Topics

- Help topics appear on most CTSU screens, and have replaced user guides
- They are unique to the screen being viewed
- Clicking the icon shows the drop-down, a link opens the page, which has navigation
- Home help topics give an overview of the entire website

The screenshot shows the CTSU Regulatory Office website interface. At the top, there is a navigation bar with links: Home, Protocols, Dashboard, Regulatory (highlighted), OPEN, Data Management, Auditing & Monitoring, RUMS, Delegation Log, Resources, Collaboration, and Reports. Below this is a secondary navigation bar with tabs: Site Registration, Protocol Requirements, Provider Association, and Regulatory Submission (highlighted). The main content area contains text about the CTSU Regulatory Office, a search form with fields for Site Number, Registration Status, Protocol Status, and IRB Type, and a table titled 'Site Registrations'. A red box highlights a 'Help' icon (a question mark) in the top right corner. A red arrow points from this icon to a dropdown menu that lists the following help topics: Site Registration, Protocol Requirements, Provider Association, Regulatory Submission, CIRB Site Preferences, CTSU Forms, Resources, and Regulatory Contacts.

Resources: Central Location for Help Topics

- **All** help topics appear in the Resources section → CTSU Operations Information → User Guides & Help Topics

The screenshot displays the 'Resources Browser' interface. The top navigation bar includes links for Home, Protocols, Dashboard, Regulatory, OPEN, Data Management, Auditing & Monitoring, RUMS, Delegation Log, Resources (highlighted in red), Collaboration, and Reports. The left sidebar contains a tree view of resources, with 'User Guides & Help Topics' highlighted in red. The main content area shows a table of help topics.

New Site Staff Resources

- › Resources > CTSU Operations Information > General Procedures and Training, contains introductory materials
- › Tips for Onboarding and Site Staff Orientation Slides are geared for new site staff

The screenshot shows the 'Resources Browser' interface. The 'Resources' menu item is highlighted in the top navigation bar. The left sidebar shows a tree view with 'CTSU Operations Information' expanded, and 'General Procedures & Training' and 'Site Staff Orientation Slides' highlighted with red boxes. The main content area displays a table of resources under the heading 'General Procedures & Training'. The table has columns for '#', 'Title', 'Format', and 'Post Date'. A red arrow points to a star icon next to the title 'CTSU Overview PowerPoint Presentation' with the text 'add to your favorites'. Another red box highlights the title 'New Site Staff and the CTSU: Tips for Onboarding'. A third red box highlights the 'Site Staff Orientation Slides' section, which contains four modules, with the text '10 modules' written in red next to it.

NCTN Performance Survey Results

Andrea Denicoff, MS, RN
Grace Mishkin, PhD, MPH

Survey Context and Goals

Background: Brief survey developed to gather feedback from external NCTN stakeholders after 3 years of NCTN operations under the current grant (3/1/2019 – 2/28/2025) in advance of the NCTN recompetition

Goals: Gather feedback about the NCTN structure, processes, and achievement of program goals and identify areas for improvement

Survey Development, Participants, and Distribution

- Development
 - Questions based on previous survey conducted in 2016-2017, which was developed and edited by NCI staff and NCTN group leadership
 - Approved under OMB Clearance No. 0766
- Participants
 - Email lists requested from each Group for key personnel and leadership
 - Emails added for all LAPS and NCORP Contact PIs and admins
 - 1,505 unique LAPS and Group participants emailed, in addition to email to the NCORP PI and admin listservs (some overlap expected)
- Distribution
 - Programmed and distributed in SurveyMonkey
 - 1 initial and 2 follow-up emails sent to each email on the list
 - Open 32 days: July 25 to August 26, 2022

Survey Response Rate

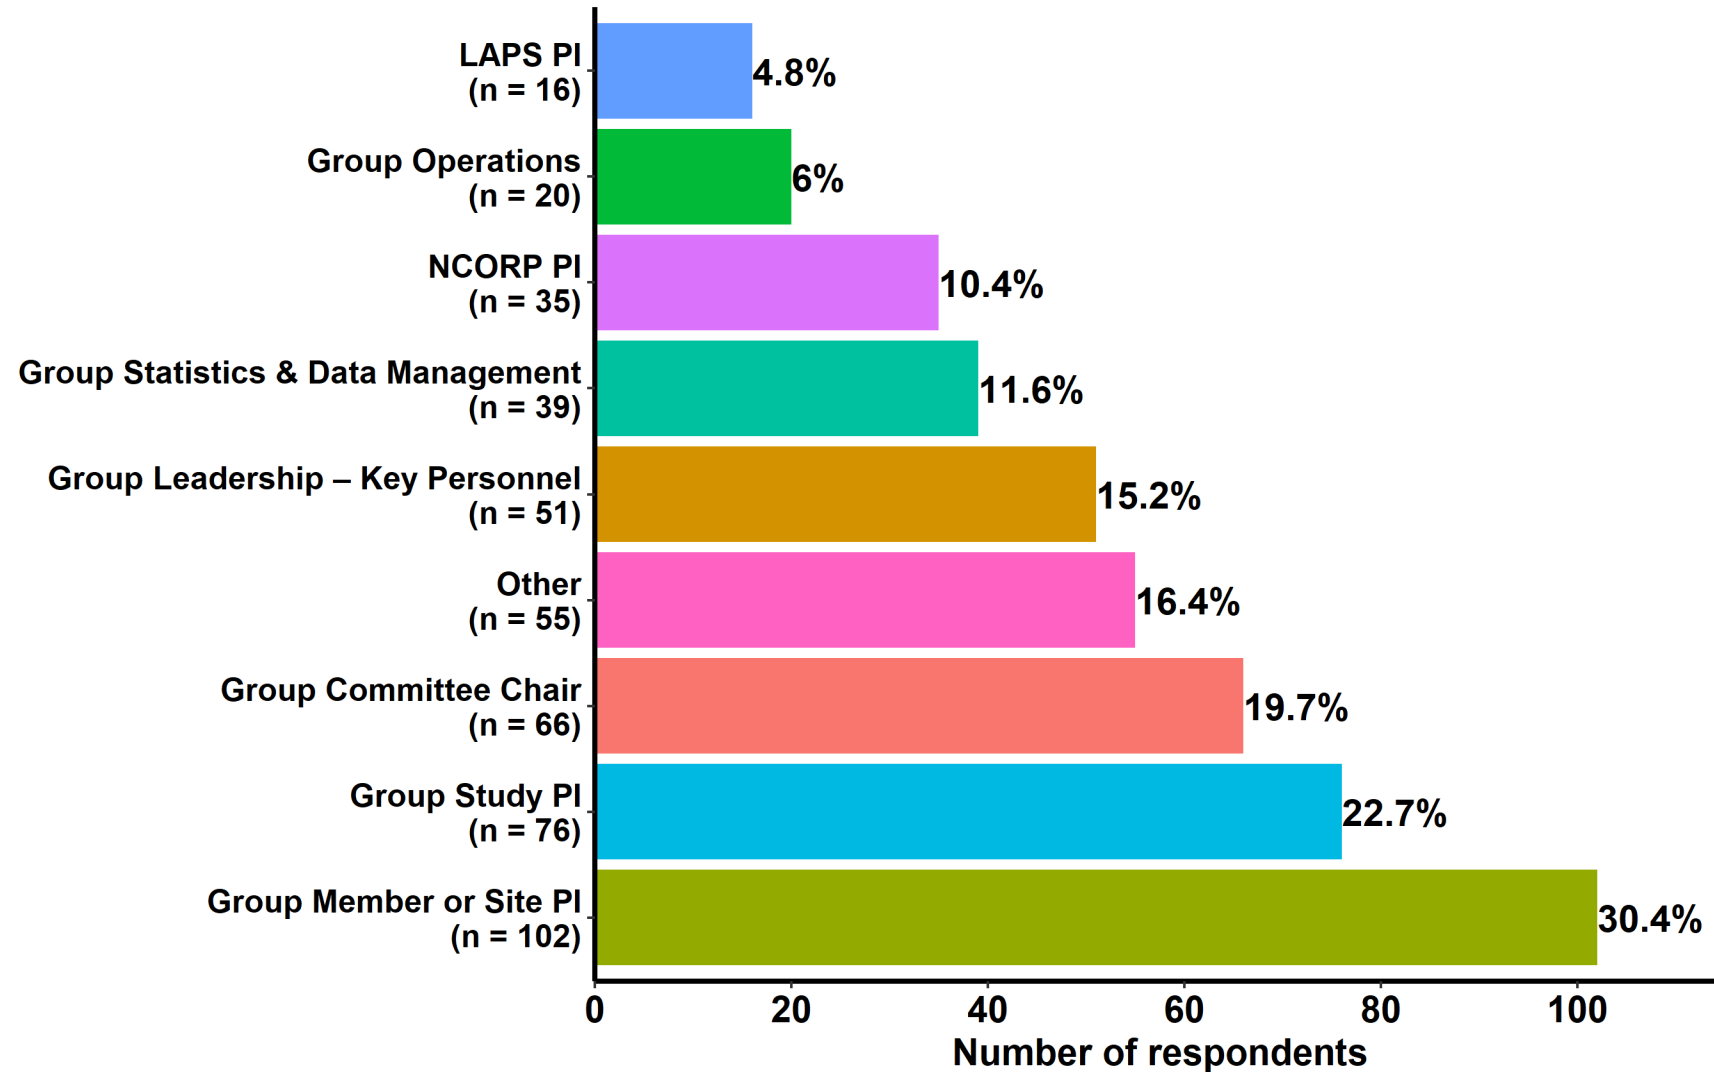

- Number who started the survey out of the 1505 who were sent the survey: **335 (22.3%)**
- Number who completed the “overall satisfaction” question out of the 1505 who were sent the survey: **272 (18.1%)**
- Drop-off from first to last survey question: **254 (16.9%)**

Respondents by Group Affiliation (n=335)

Which NCTN Group(s) are you affiliated with?	Number of Respondents who Selected Group (could select multiple)	% of Total Respondents (% of n=335)
Alliance	161	48.1
COG	82	24.5
ECOG-ACRIN	137	40.9
NRG	167	49.8
SWOG	134	40.0
CCTG	38	11.3

Respondents by Role(s)

Number of respondents = 335

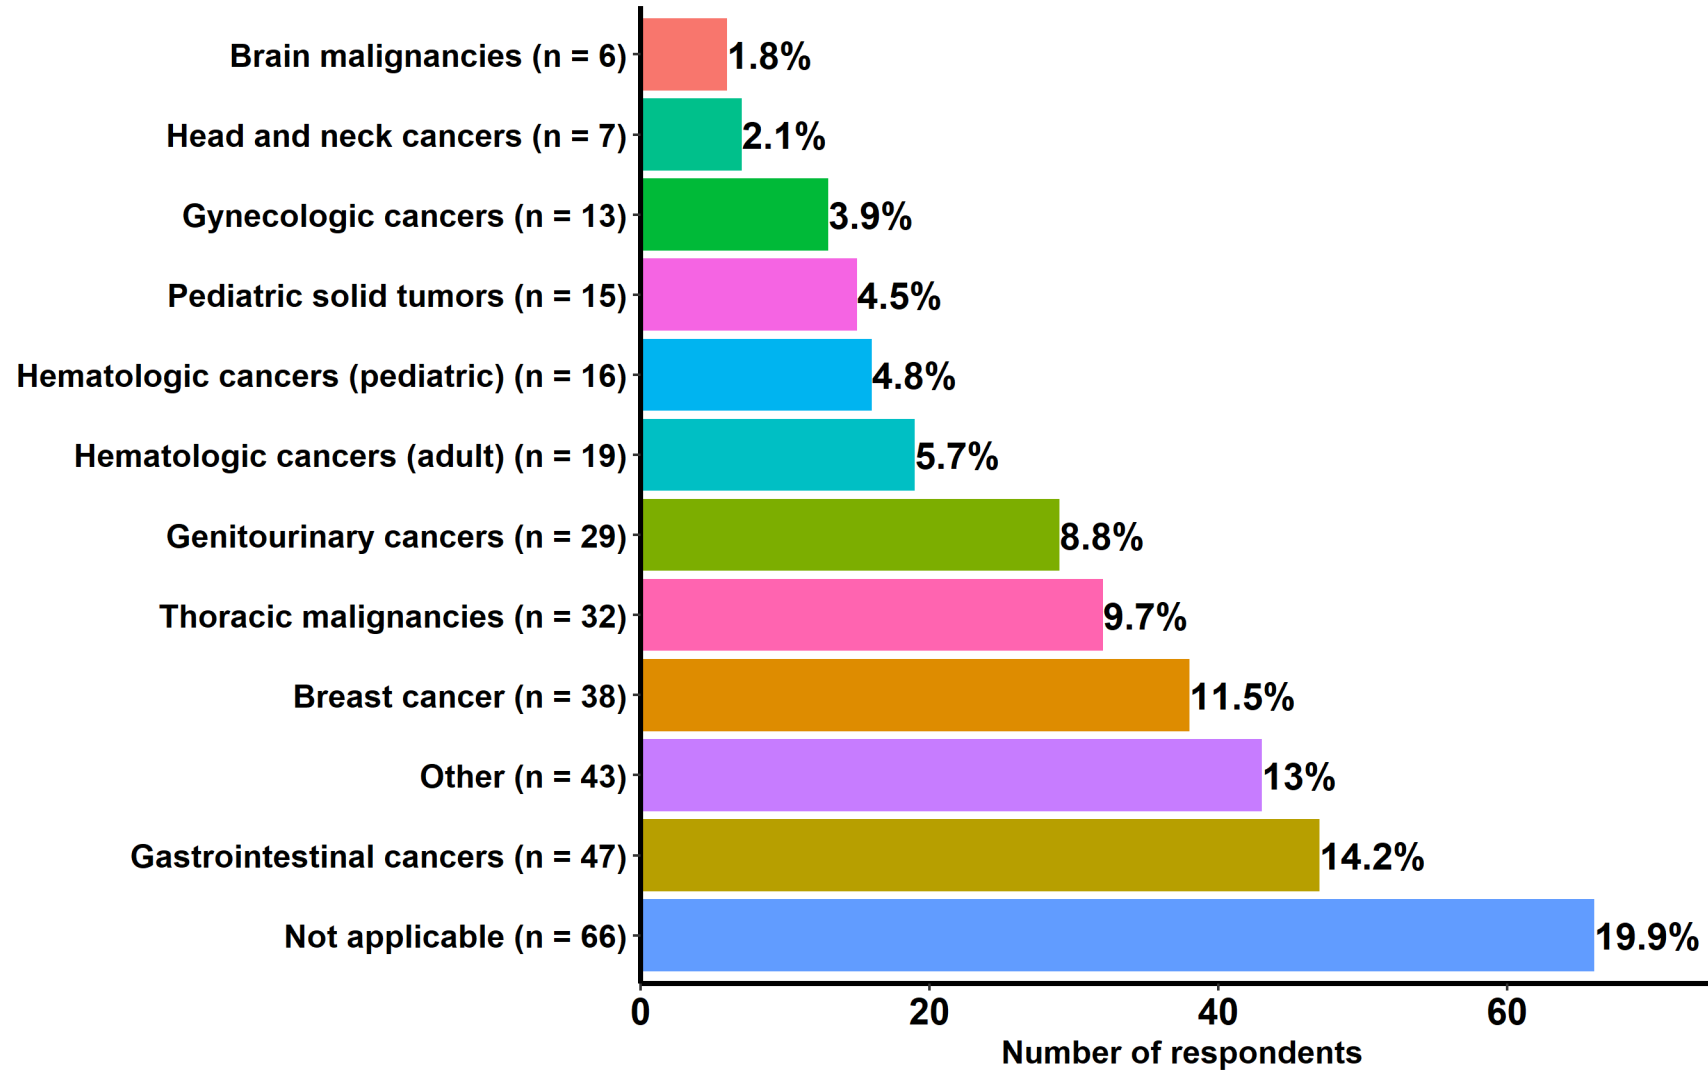

Respondents by Area of Expertise

Number of respondents = 331

Respondents by Area of Disease

Number of respondents = 331

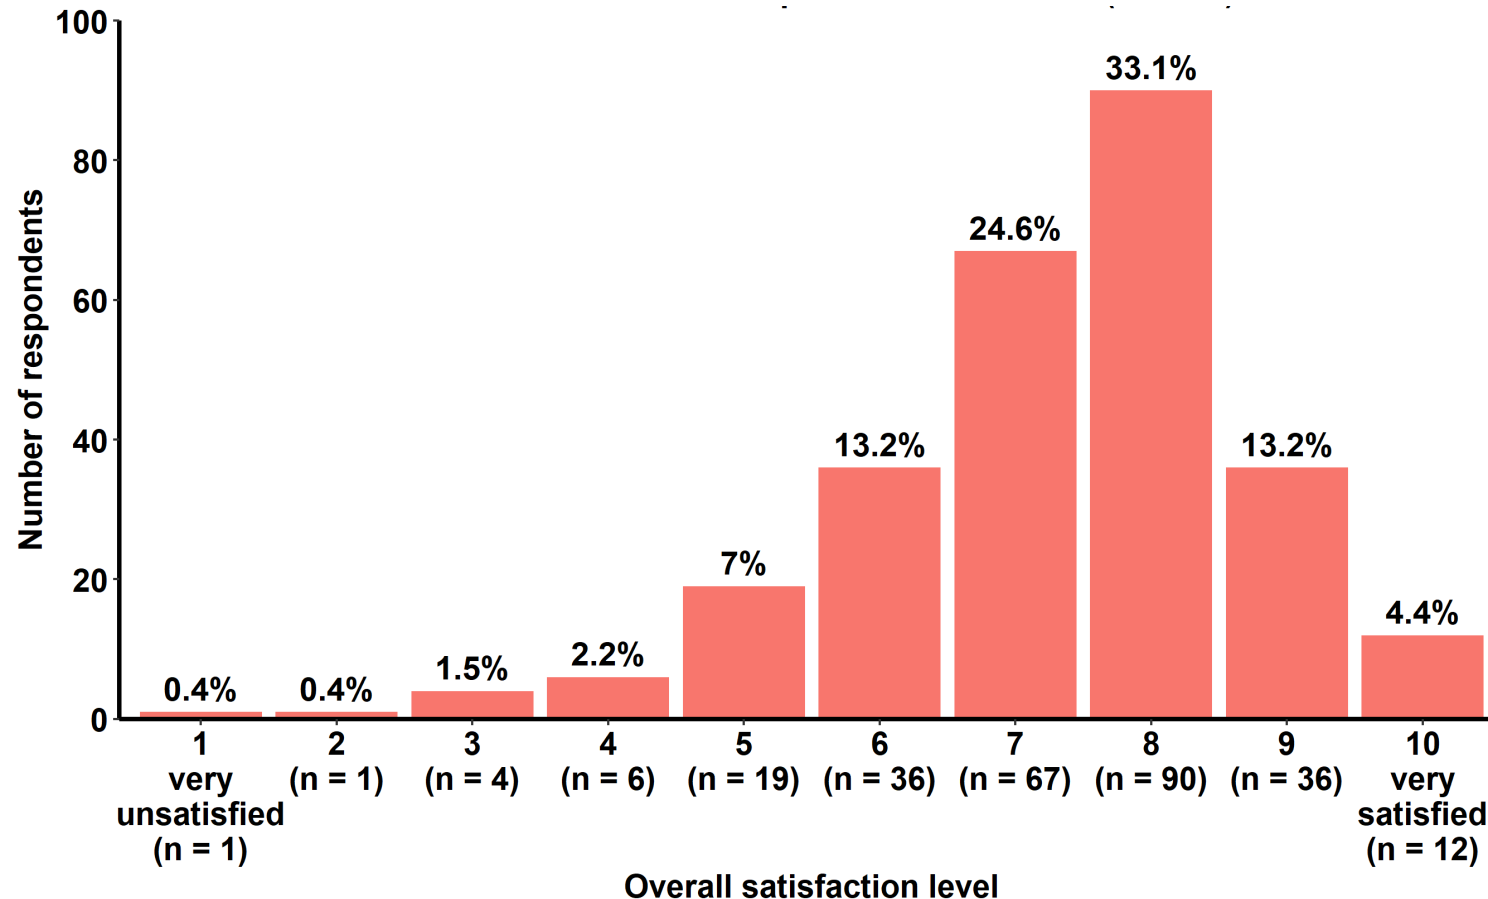

Overall Satisfaction with the NCTN

Number of respondents = 272 (18.1% of total asked)

88.5% gave an answer in “satisfied” range (6 to 10) [2017 – 65%]

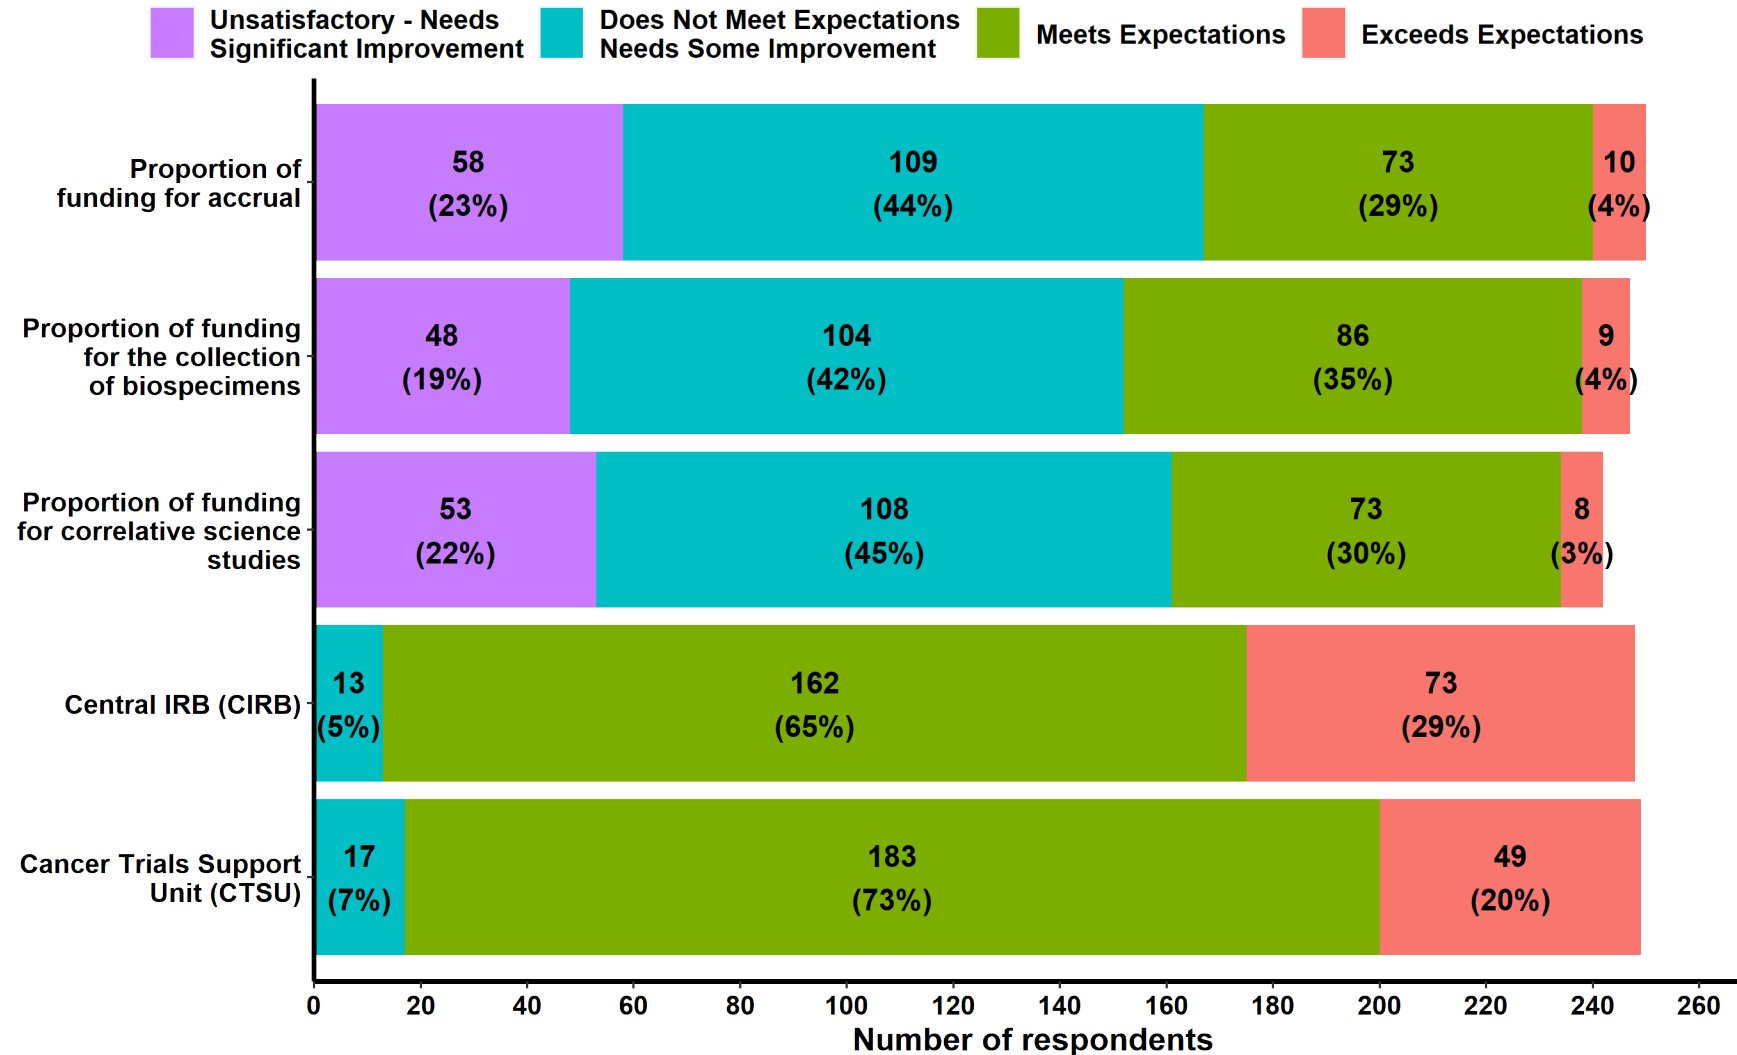

50.7% gave an answer in “very satisfied” range (8 to 10) [2017- 24%]

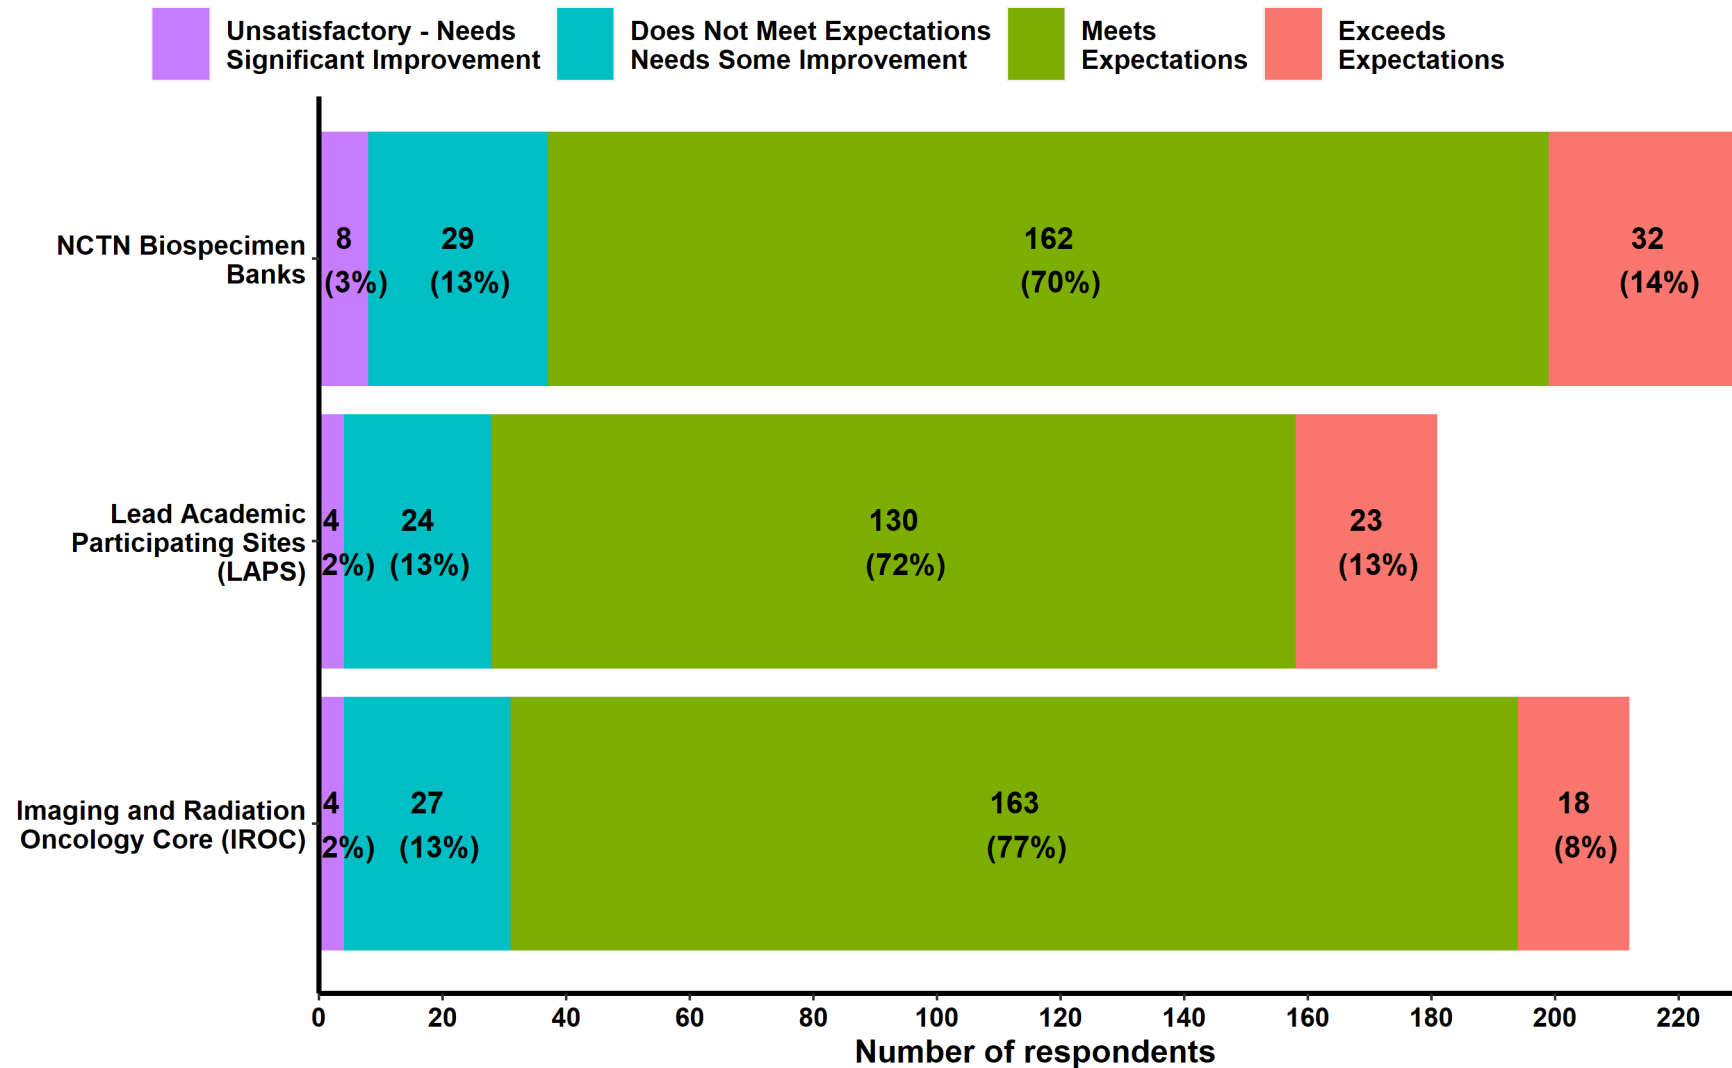

Overall, how satisfied are you with the degree to which the NCTN is achieving the following goals? (n~270)

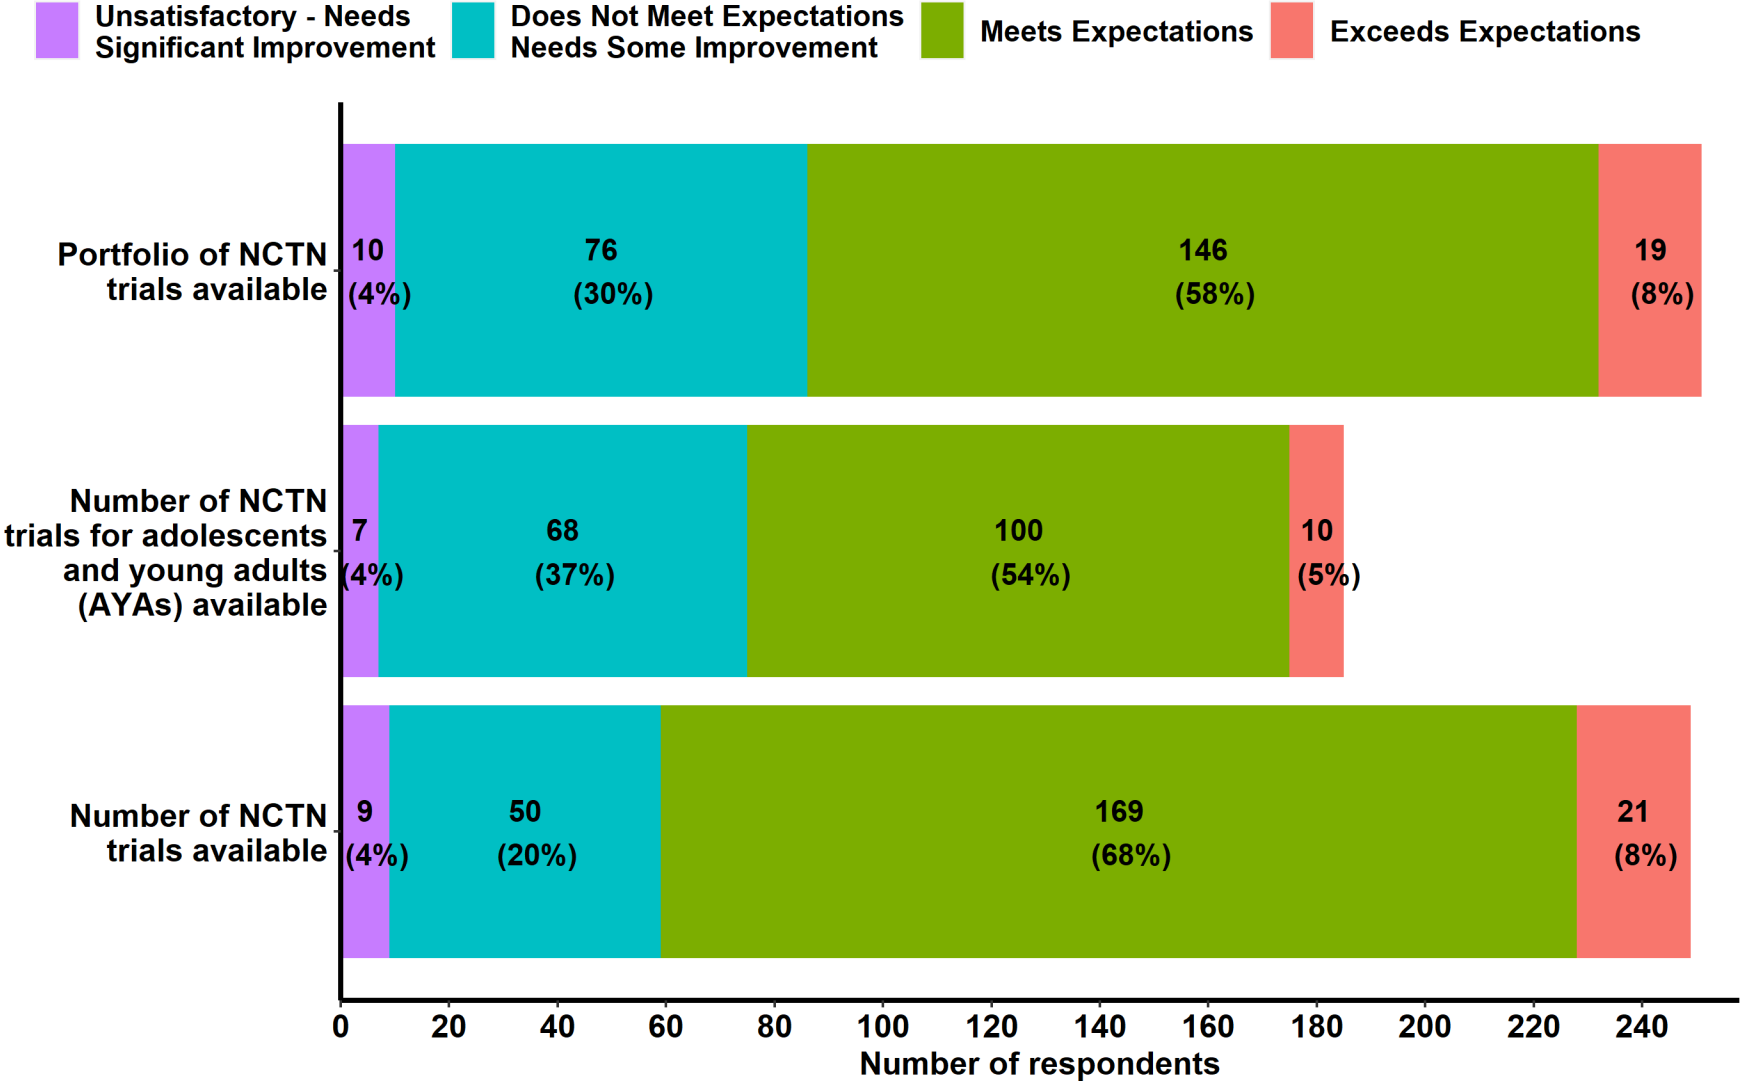

Overall, how satisfied are you with the following centralized services and administrative aspects of the NCTN? (n~250)

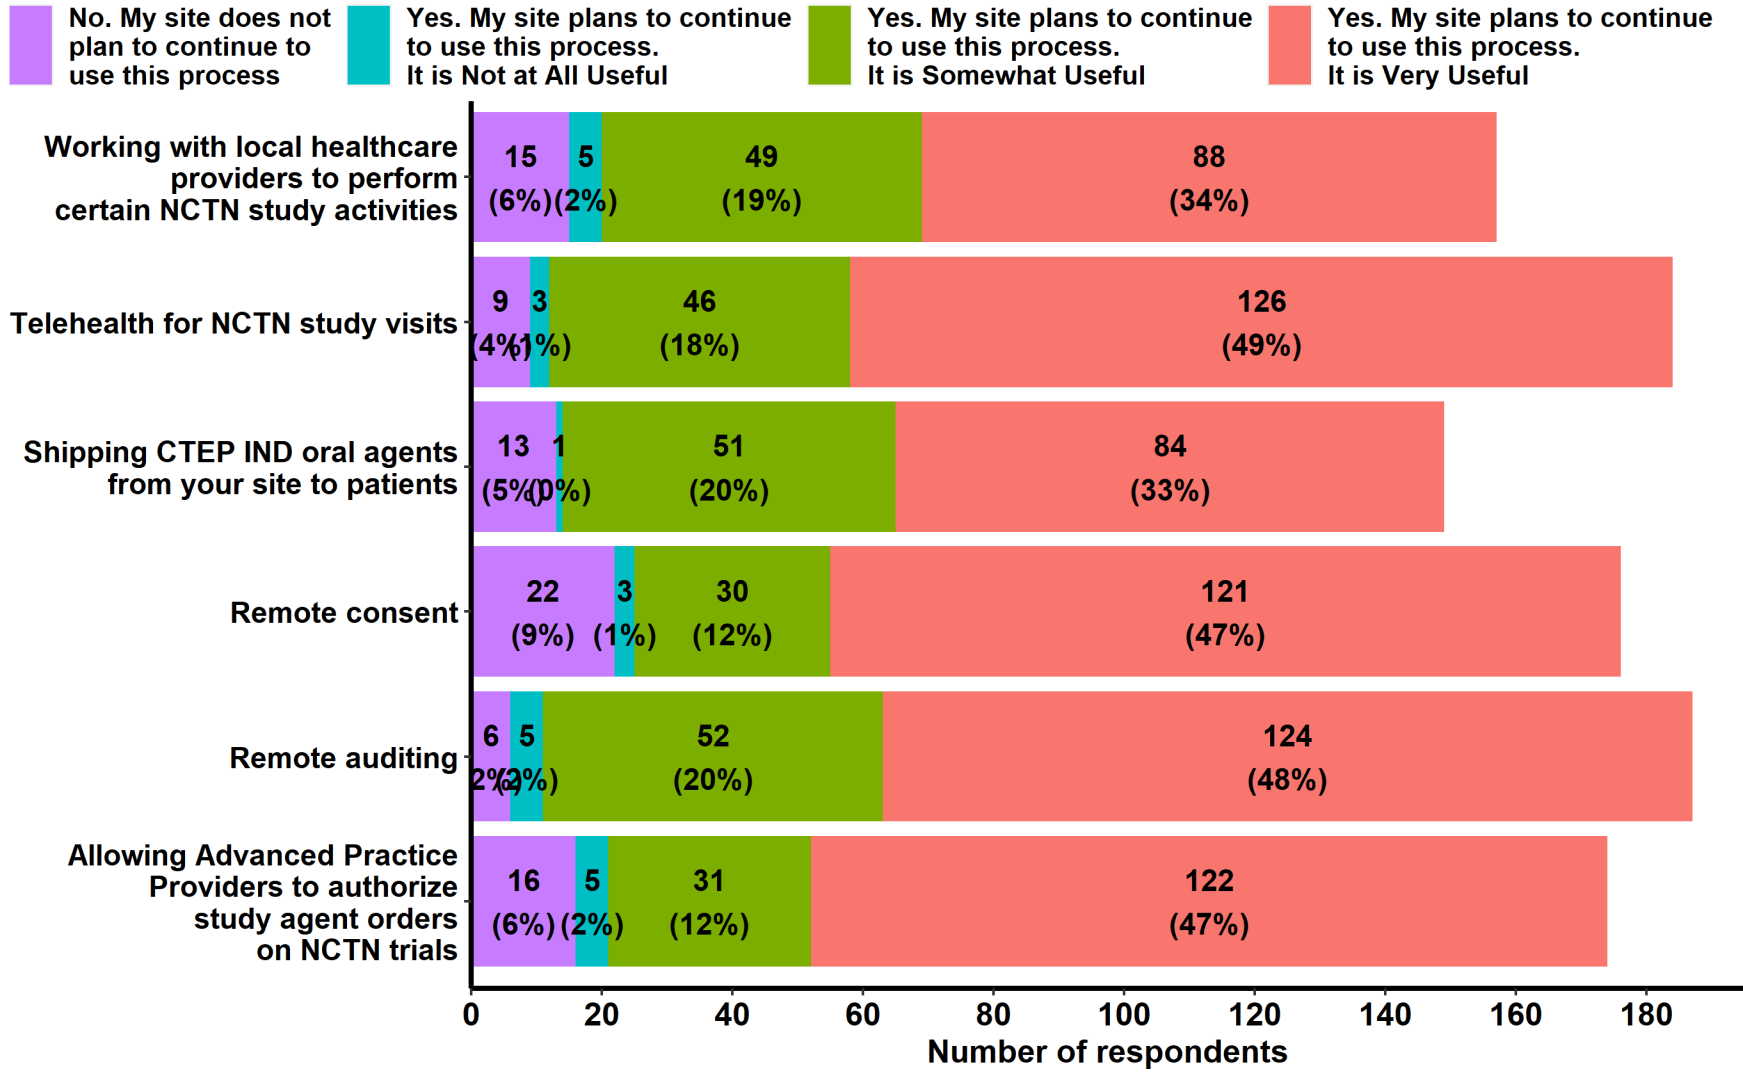

Overall, how satisfied are you with the following programs within the NCTN?

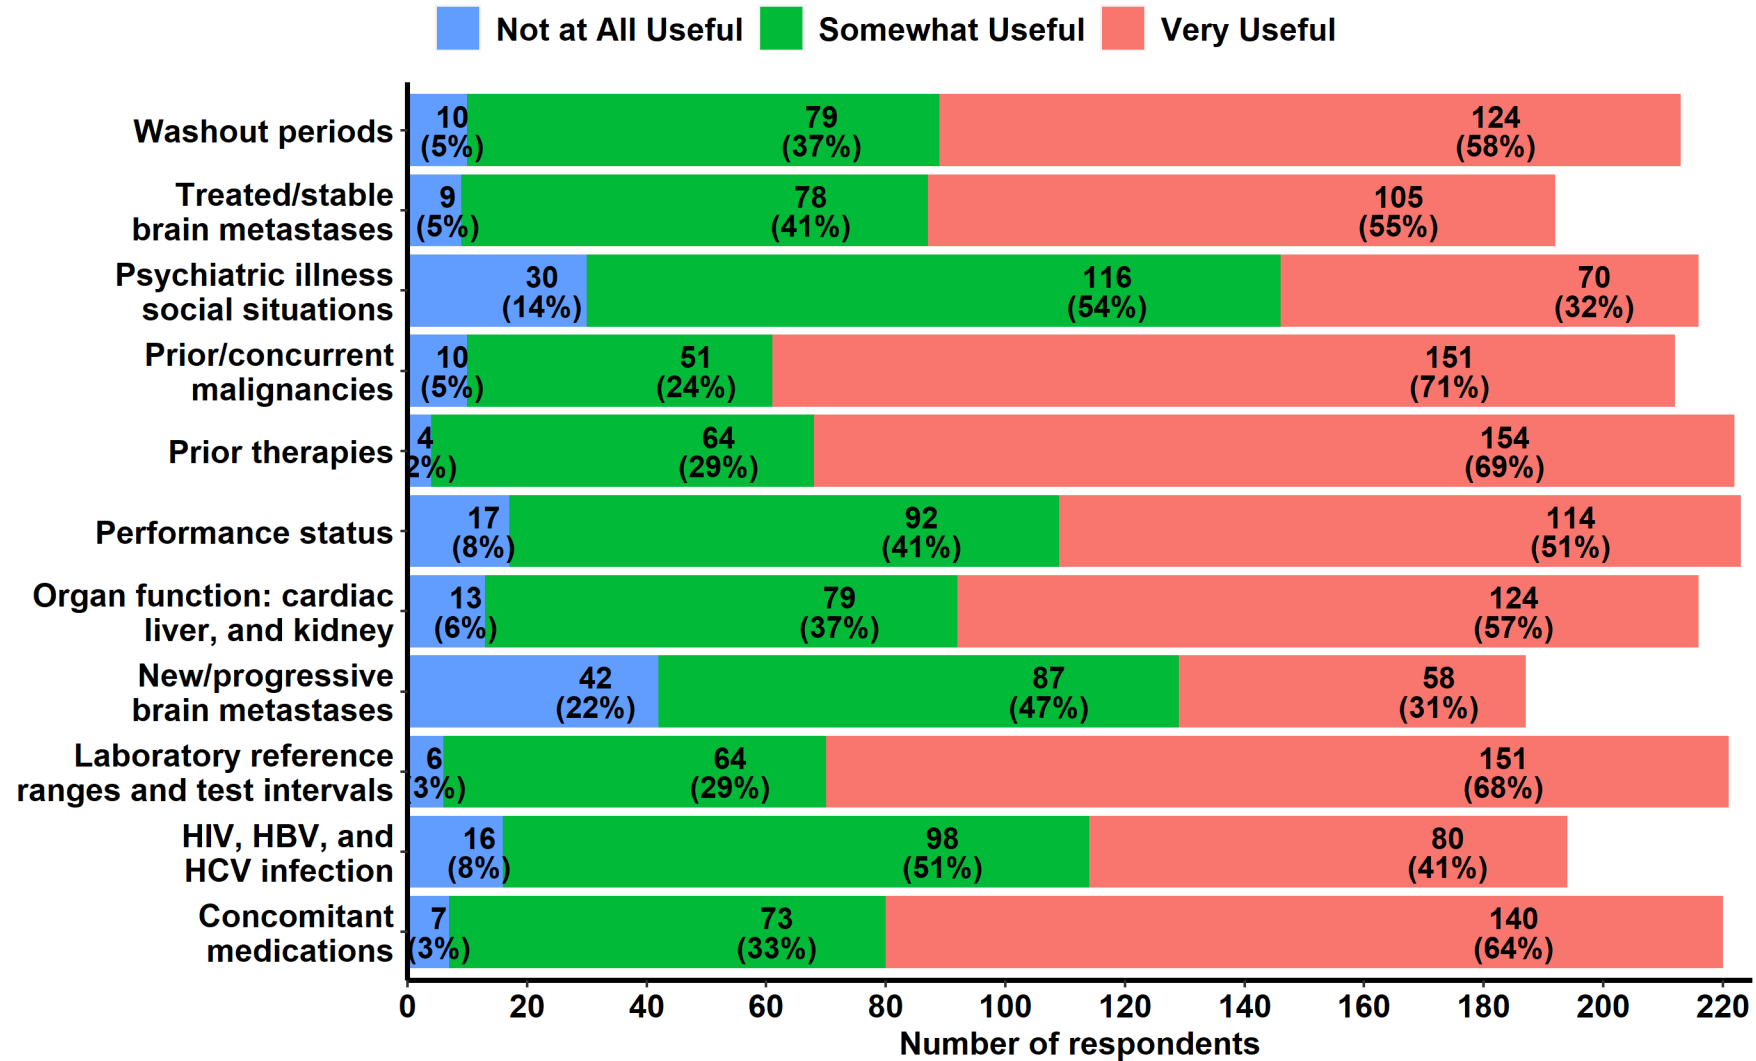

Overall, how satisfied are you with the following aspects of the NCTN menu of trials ?

For each of the following new processes, does your site plan to continue to use the new process?

Which of the following categories of broadened eligibility criteria do you think will have the greatest impact?

Qualitative Questions – Preview of Part 2

What improvements or changes would you like to see in the NCTN?

- **More standardization/consistency/same expectations/common guidelines – protocol writing, forms in RAVE, data reporting, auditing, and policies and procedures. (“simplify trials”)**
- **More intergroup/trans-NCTN meetings**
- **Increase funding: support increased workload of complex trials (staffing needs) and support enrollment and retention of underserved populations**
- **Foster collaboration**
- **Enhance recognition: authorship/Joint leadership/Junior PIs**
- **Activation of trials: need to be more timely and more efficient**
- **Continue changes implemented during pandemic, allow more flexible and decentralized trial activities**

Pharmaceutical Management Branch (PMB) Updates

Matt Boron, RPh

PMB, CTEP, DCTD

AGENDA

- ID.me
- Agent Shipping
- AURORA

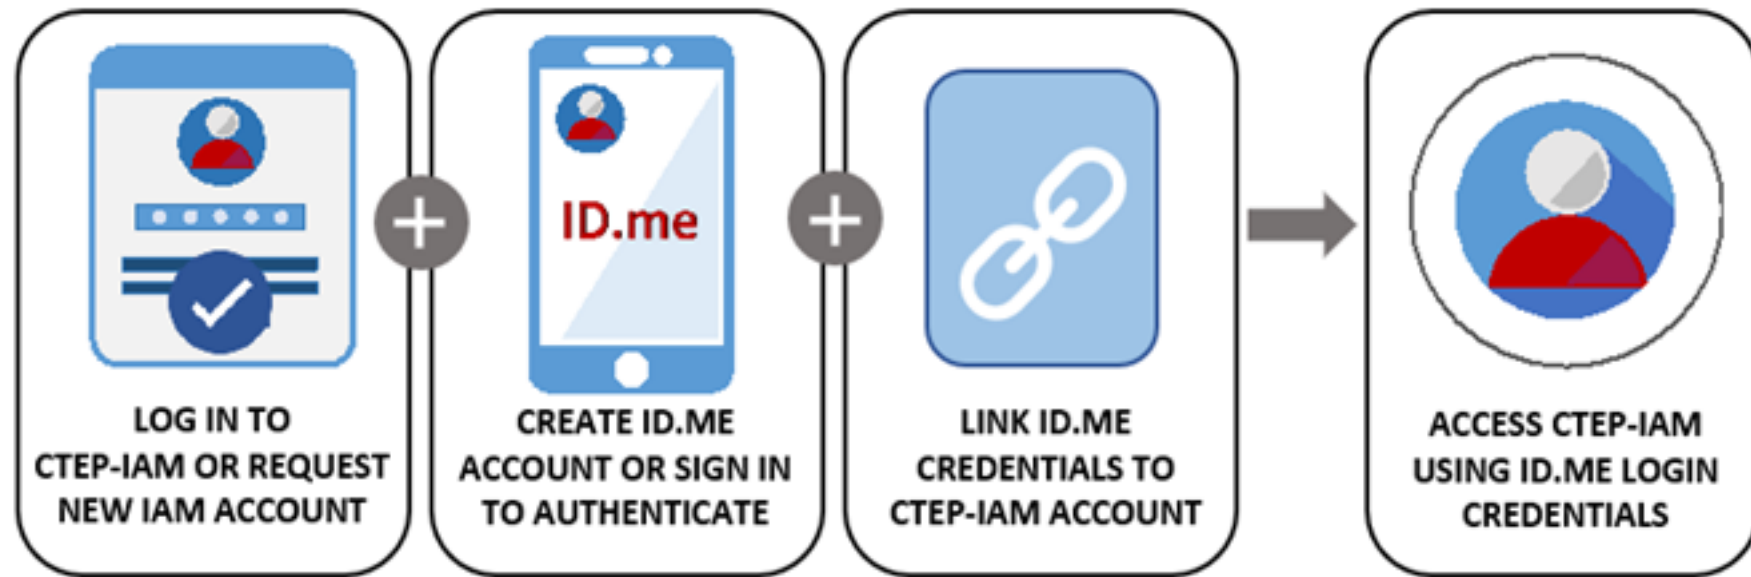

Enhanced IT Security required for all Federal Systems

- Identity verification and MFA is required for all federal systems and meets [NIST SP 800-63-3 Digital Identity Guidelines](#)
- Began July 8, 2022, CTEP-IAM integrated with ID.me to meet this requirement
- ***All users must complete ID verification and MFA with ID.me by July 1, 2023***

Making sure all users are who they say they are.

ID.me to IAM Workflow

For more information:

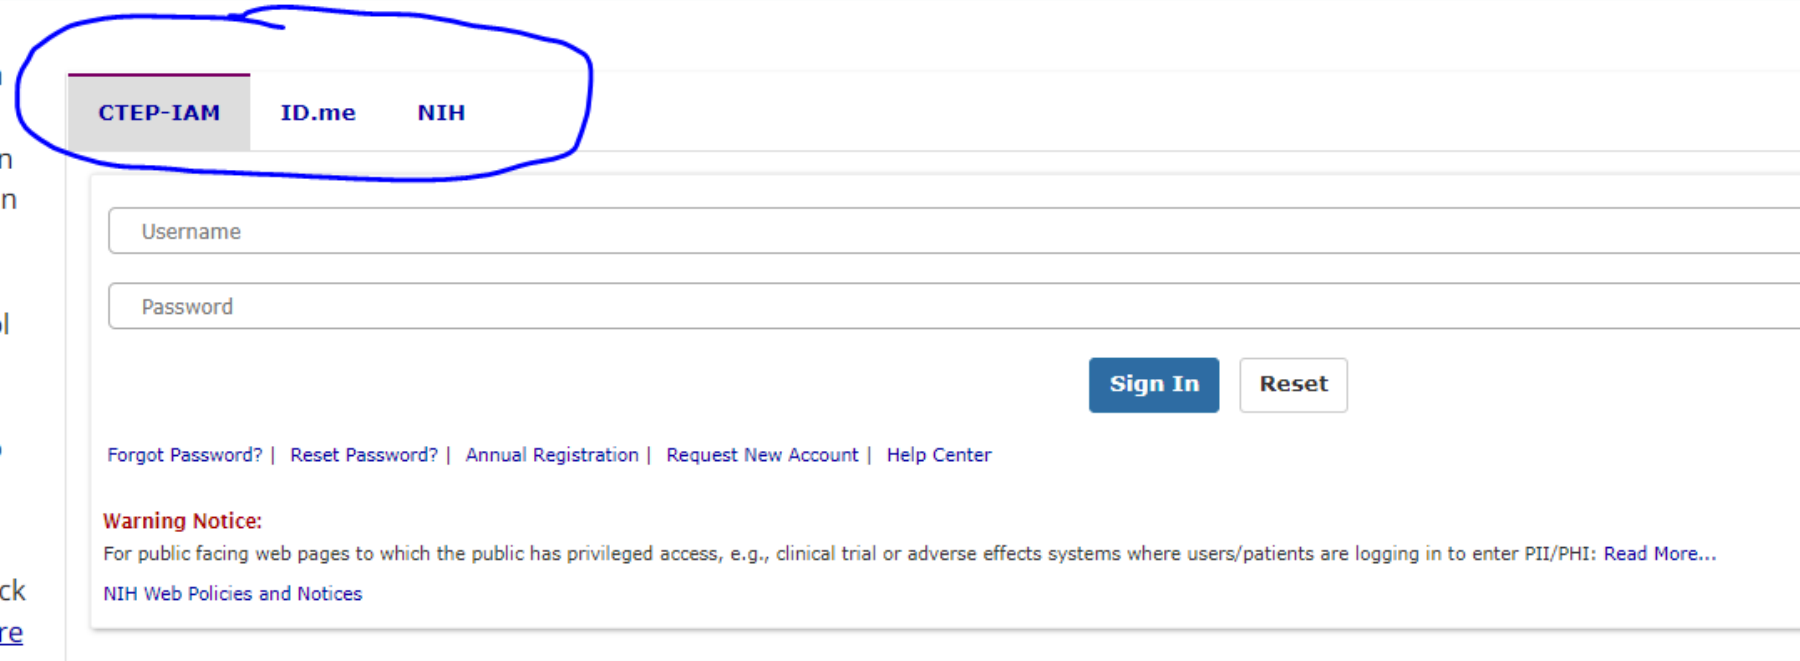

https://ctep.cancer.gov/investigatorResources/NCI_CTEP_IAM_User_Access_Update.htm

Registration and Credential Repository (RCR)

Welcome to the National Cancer Institute's **Registration and Credential Repository (RCR)** system. The RCR is available for the electronic submission of NCI registration documents by clinical research personnel participating on NCI-sponsored clinical trials. The system, in combination with other NCI Clinical Oncology Research Enterprise (CORE) applications, ensures real-time updates to control trial activities and system access. The RCR meets FDA regulatory requirements while maintaining an annual registration submission lifecycle to allow investigators to quickly participate on research trials, increase efficiency and lower the cost of conducting clinical trials.

An IAM account is required to access the RCR system. Click **Request New Account** to obtain this account or click [here](#) to check on your IAM account status.

We've made updates to RCR - take a look at [What's New!](#)

The screenshot shows the login interface for the RCR system. At the top, there are three navigation tabs: **CTEP-IAM**, **ID.me**, and **NIH**. The **CTEP-IAM** tab is highlighted with a blue circle. Below the tabs are two input fields: **Username** and **Password**. To the right of these fields are two buttons: **Sign In** (in a dark blue box) and **Reset** (in a white box with a grey border). Below the buttons, there are links for [Forgot Password?](#), [Reset Password?](#), [Annual Registration](#), [Request New Account](#), and [Help Center](#). A **Warning Notice** is displayed below the links, stating: "For public facing web pages to which the public has privileged access, e.g., clinical trial or adverse effects systems where users/patients are logging in to enter PII/PHI: [Read More...](#)". At the bottom, there is a link for [NIH Web Policies and Notices](#).

ID.me resources

Investigational Agent Shipping

- CTEP IND oral agents for shipment to patient only
 - Check with sponsor if not CTEP IND
- Must have a site-level SOP
 - Available for audit
- Not for every occasion
 - Should not be the base treatment plan
- Exceptions
 - Dangerous Goods / REMS

https://ctep.cancer.gov/content/docs/CTEP_Oral_IND_Agent_Shipment_Guideline.pdf

AURORA Updates

- ❖ AURORA is PMB's centralized agent inventory management system.
- ❖ AURORA consists of several modules, including:
 1. Agent Ordering and review of order status (replaces OAOP)
 2. Access to PMB provided documents (stock recovery notices, IB, and MSDS)
 3. Creation and Maintenance of the PSD (Primary Shipping Designee) shipping addresses and Primary Ordering Designees
 4. Enhanced communication tools to connect with PMB
 5. Creation and maintenance of electronic NCI Investigational Agent (Drug) Accountability Records (eDARF) and associated inventory management practices

When we talk about AURORA, it is not just eDARFs.

High Level Benefits of AURORA

- Elimination of all paper records = no lost documents
- Improved sponsor and site compliance with regulatory requirements = system validation throughout trial conduct reduces audit and inspection findings
- Prevention of medication dispensing errors and common accountability errors = improved patient care
- PMB-determined agent expiration dates are populated on the eDARF = no missing stock notifications

High Level Benefits of AURORA, continued

- AURORA's record retention supports straight-forward pharmacy monitoring and auditing = reduced # pharmacy findings on audit
- Electronic access for pharmacy monitoring and auditing = improves compliance by allowing central and remote auditing
- Efficient inventory management and accountability record storage and retention = push button reports on demand
- Streamlined communication between trial sites and PMB = reduced email volume

AURORA Updates

- The AURORA Training and Resources website is now available on the PMB website: <https://ctep.cancer.gov/branches/pmb/aurora.htm>
- Table added summarizing AURORA function accessibility by site user access roles
- NCI/CTEP AURORA Training course is available through the CLASS Learning Management System website (<https://classlms.org>) and a few additional videos will be added soon. Users may self-enroll in the ***NCI/CTEP Aurora Training*** course in the catalog
- AURORA Overview presentation and slides from July 2022
- AURORA FAQs
- Help button within AURORA

AURORA Updates

- The AURORA implementation plan and frequently asked questions (FAQs) are available on the FAQ website:
 - <https://ctep.cancer.gov/branches/pmb/faq.htm>
 - Phase 1 release: AURORA will include agent ordering, document access (including stock recovery letters, IB, and MSDS), and PSD worksheet modules. OAOP will be shutdown and users re-directed to AURORA
 - Phase 2 release: eDARF module (final timeline TBD)
 - Check back for updates to the FAQs and timing of AURORA releases and/or sign up for the PMB Listserv (<https://list.nih.gov/cgi-bin/wa.exe?SUBED1=NCI-DCTD-CTEP-PMB&A=1>)

AURORA Function	Primary Shipping Designees	Primary Ordering Designees	Control site- assigned Satellite Designees	Investigators	All Other Users
Agent Ordering	✓	✓		✓	
Document Access - IB	✓	✓	✓	✓	✓
Document Access - MSDS, stock recovery	✓	✓		✓	
View PSD worksheet	✓	✓		✓	
Create and Edit PSD worksheet	✓			✓*	
Agent Accountability	✓	✓	✓	✓	
	Control Dispensing Area and Satellite Dispensing Area records	Control Dispensing Area and Satellite Dispensing Area records	Satellite Dispensing Area records only		

***Only investigators serving as a primary shipping designee have the ability to create new PSD records and submit updates to current PSD records.**

AURORA Updates

- Questions/comments contact PMB:

CTSU

Common Regulatory Challenges and Best Regulatory Practices

Agenda

Local IRB Approvals

NCI CIRB Approvals

PI Validations

CTSU Website – Site Registration

Local IRB Approvals

Local IRB Approvals

- › Nearly 15,000 local IRB Approvals processed last year
- › Required data points:

Site Name/Site CTEP ID	Meeting Date
PI	Approval Date
Approval Type	Expiration Date
Level of Review	<i>IRB Number</i>
<i>Protocol Version</i>	

- › Protocol Version and IRB Number are the most common data points that are not included in a submission of a local IRB Approval

Protocol Version

- › The version of the protocol reviewed by the IRB must be provided with the submission of all local IRB Approvals
 - **Initial IRB approvals** – Protocol version must be provided on the valid IRB approval documentation
 - **IRB amendment approvals** – Protocol version must be provided on the valid IRB approval documentation
 - **IRB continuing review approvals** – Protocol version can be provided on supporting documentation, including in the comments of the Regulatory Submission Portal cover page

IRB Number

- › The IRB Number of the board that performed the review must be provided for all local IRB approval submissions
- › Can be provided on supporting documentation, such as the CTSU IRB Certification Form, or in the comments of the RSP cover page
- › Must be the IRB's OHRP Registration Number
 - Must be in the format of IRB#####

NCI CIRB Approvals

NCI CIRB Approvals

- › CIRB and CTSU have established a web-service for the submission of all CIRB approvals to the CTSU
- › Participating sites no longer have to submit documentation of CIRB IRB approvals to the CTSU
- › CIRB Signatory Institution designates participating sites by establishing Site Preference settings via email correspondence with the CTSU (CTSURegPref@coccg.org)

Site Preference Settings

› Network Levels:

- **ETCTN LAO** – Current ETCTN studies
- **ETCTN P2C** – Legacy ETCTN studies
- **NCTN Adult** – Alliance, AMC, ECOG-ACRIN, CCTG, NRG, and SWOG
- **NCTN Pediatric** – COG, PBTC, and PEP-CTN
- **Multi-Network** – comprising two or more of the Network Levels above

› Site Preference Settings:

- **All** – approvals applied to all active participating sites on the Signatory Institution's roster
- **Site Specific** – approvals applied to a specific set of active sites on the Signatory Institution's roster
- **Protocol** – applied to the active sites on the Signatory Institution's roster as designated by the Signatory on a study-by-study basis
- **None** – Signatory Institution not participating in studies in this Network Level

CIRB Roster Updates

- A few key points to keep in mind when adding a site or sites to a CIRB Signatory Institution's roster:
 - Is the site's Federalwide Assurance (FWA) up to date with OHRP and on file with CTSU?
 - Is the site Active on at least one NCTN or ETCTN roster?
 - Do the Site Preferences need to be updated with the addition of the new site?
 - Site Preference settings of *All* or *None* do not require action
 - Site Preference settings of *Site Specific* or *Protocol* will require a notification to the CTSU if approvals for the Network Level studies with these preferences should be applied to the newly added sites
 - Does the PI on the Signatory Institution's approval meet all of the PI Validations at the newly added site?

A photograph of two healthcare professionals, likely nurses or doctors, in blue scrubs. They are sitting at a table, looking at a tablet computer together. The woman on the right is smiling and looking towards the tablet. The woman on the left is also smiling and looking towards the tablet. The background is a bright, out-of-focus window. The text 'PI Validations' is overlaid on the left side of the image, underlined with a yellow line.

PI Validations

PI Validations

- RSS automatically makes the following validations for all PIs that are entered into the system for an IRB Approval
 - PI has an Active CTEP registration status
 - PI must have a Registration Type of IVR (investigator) or NPIVR (non-physician investigator), if allowed by the study sponsor
 - PI is Active at the site on a participating organization's roster
 - PI has the site listed as a Practice Site on their FDA 1572 in RCR
 - PI has the IRB Number of the board that issued the approval listed on their FDA 1572 in RCR
- If the PI fails any of the validations above the site's registration status will be set to "Pending" and new patient enrollments will not be able to be completed in OPEN

A photograph of a woman wearing a light blue hijab and a grey cable-knit sweater, smiling warmly. She is looking towards a man on the left, whose profile is partially visible. He is wearing a white hard hat and glasses. The background is a blurred indoor setting, possibly a construction site or office. The overall color palette is dominated by blue and grey tones.

Pat Mize, MBA, Grants and Contracts Manager

Kyle Theige, Senior Grants and Contracts Coordinator

National Coverage Analysis (NCA)

- What is a Clinical Trials Coverage Analysis?
 - A coverage analysis is a review of all tests, procedures, and interventions associated with a clinical trial (CT) to determine which ones are 'billable' and which are 'not billable' to a third party payer against the national guidelines and coverage rules
- Who performs the NCA's?
 - The Clinical Trials Support Unit (CTSU) creates the NCAs for NCTN and NCORP trials
 - SWOG also does internal coverage analysis to aid in identifying study budget needs
- Why are NCA's performed?
 - NCAs are intended to be a guide for the sites as they consider their participation in SWOG trials
- Where can you find NCA's?
 - Once completed, official NCAs are posted on the CTSU dashboard

Financial Agreements

- Fixed-price subawards for federal member site payments are now required by the National Cancer Institute (NCI) for Cooperative Groups
- Current project period dates:
 - NCTN funding: **03/01/2019 – 02/28/2025**
 - NCORP funding: **08/01/2019 – 07/31/2025**
- Non-federal site payments are not affected
 - Non-federal site payments will continue to be distributed via current PSA w/ SWOG-CTP

Site Payments

- SWOG does NOT accept invoices for federal site payments
- Instead, payments are **triggered** as indicated on the study's funding memo:
 - Base Intervention (patient enrollment)
 - Biospecimen submission (entered into OPEN)
 - QOL/PRO Questionnaires (entered into OPEN)
- Federal Site Payments:
 - Processed via SWOG GCO (located at OHSU)
 - Typically run bi-monthly
- Non-Federal Site Payments:
 - Processed via SWOG-CTP (located at The Hope Foundation)
 - Typically run monthly

Funding Memos

Activity	Does Cover	Does <u>NOT</u> Cover
Base Intervention (Treatment Intervention)	<ul style="list-style-type: none"> • Site effort for study • Enrollment efforts • Data collection, data management and data submission • Pharmacy set-up 	<ul style="list-style-type: none"> • Standard or non-standard of care (SOC) procedures
Biospecimen Submission	<ul style="list-style-type: none"> • Site effort and supplies for submission of biospecimens • Institutional supplies, processing, packing effort/materials • Shipping to biobank/lab 	<ul style="list-style-type: none"> • Cost of biopsies and/or blood draws
Quality of Life (QOL) <i>NCTN studies only</i>	<ul style="list-style-type: none"> • Site effort towards QOL correlatives 	<ul style="list-style-type: none"> • Effort for QOL on NCORP studies is part of the capitation amount

Funding Memos

Study Specific Notes:

1. Screening payment will be triggered by registration onto Step 1 in OPEN. This payment represents a portion of the CTEP IND base intervention payment.
2. Sites are eligible to receive additional federal funds for biospecimen submissions. See information contained in section 15 of Protocol for detailed information on biospecimen collections. Payments will be triggered by submission of information for the first time point for each submission type into the OPEN system.
3. Sites are eligible to receive additional federal funds for Quality of Life/Patient Reported Outcomes (QOL/PRO). See information contained in section 15 of Protocol for detailed information. Payment will be triggered by submission of information for the first time point into the OPEN system.

Funding Questions?

SWOG Clinical Trials Partnerships

- Busy developing studies with several industry partners including Genentech, Novartis and AstraZeneca
- Active collaborations in the following spaces:
 - Leukemia; MDS, MPN/MDS, CMML
 - Breast cancer
 - Bladder cancer
 - Non-small cell lung cancer
 - Head and neck squamous cell cancer
 - Cutaneous squamous cell cancer

CTP Process Overview

- Sites will be contacted via email about CTP trial opportunities
- Interested sites will need to complete study feasibility assessment
- CTP will be utilizing WCG IRB as central IRB
- CTP will be posting NCA's for all CTP trials

- Velos Clinical Trial Management System and Florence Electronic Trial Master File will be used to streamline site communications and start-up efforts, house study documents, assist in management of Investigator Site Files (ISF), regulatory requirements, and monitoring/auditing efforts

CTP Updates and News

- CTP Update Forum recording will be posted to the meeting website
- You can also find news and contact info on the CTP website
 - <https://www.swogctp.org/>
 - ctp@swog.org

New NCI Precision Medicine Initiatives

Existing NCI Precision Medicine Trials:

LungMAP

Adult MATCH

ALCHEMIST

Pediatric MATCH

New Initiatives:

ComboMATCH – adding targeted agent to another anticancer therapy

MyeloMATCH – long term treatment tracking using current and investigational agents for AML and MDS patient

iMATCH – centralized profiling to calculate TMB and GEP

ComboMATCH (EAY191)

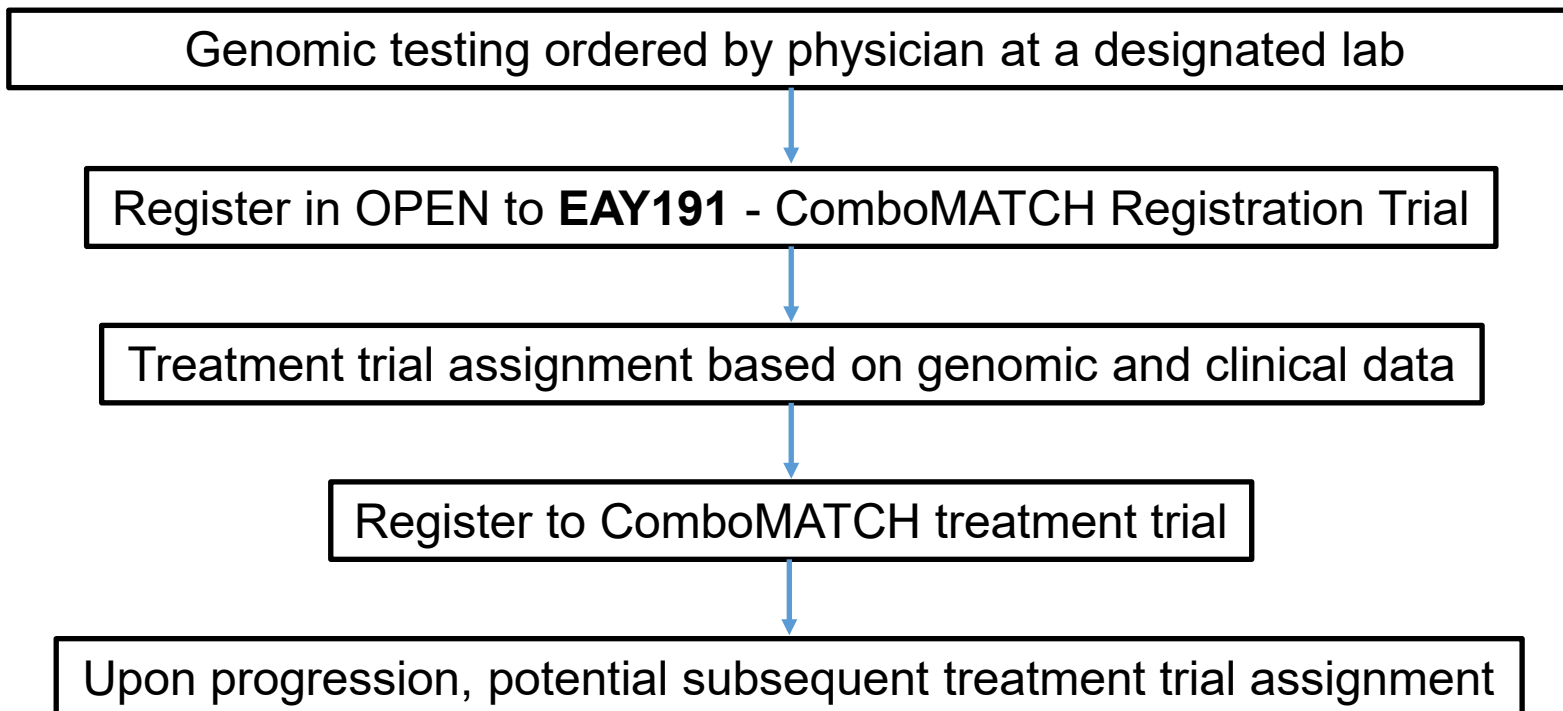

It is hypothesized that genomically-driven, evidence-based addition of a targeted agent to another anticancer therapy will produce greater clinical benefit than treatment without the added targeted agent.

ECOG-ACRIN to coordinate the master registration trial.

Any Network Group can coordinate targeted therapy treatment trials.

ComboMATCH (EAY191)

EAY191-S3

Phase II Study of Paclitaxel + Ipatasertib in Taxane-Refractory Participants with AKT-Altered Advanced Non-Breast Solid Tumors

MyeloMATCH

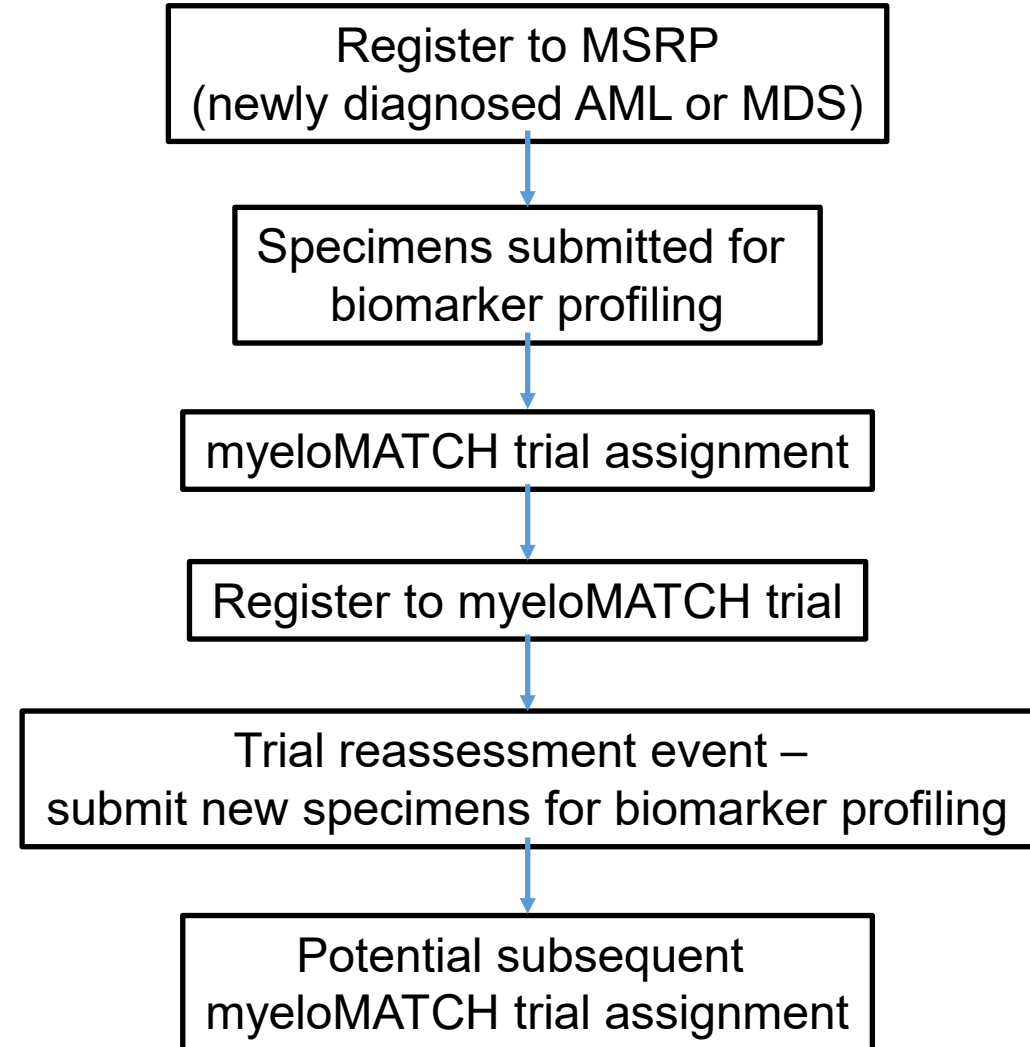

Includes a master screening and reassessment protocol (MSRP) coordinated by SWOG

MSRP will assign participants to an appropriate myeloMATCH clinical trial if one is available

Eligible participants must be suspected to have untreated AML or MDS

At reassessment event, MSRP will determine eligibility for an additional myeloMATCH trial

MyeloMATCH trials in the pipeline

Untreated AML:

MM1YA-S01 – age \leq 59 high risk AML

MM1OA-S02 – age \geq 60 *TP53*-mutated AML

MM1OA-S03 – age \geq 60 IDH2 mutant AML

MM1YA-CTG01 – age \leq 59 intermediate risk AML

AML, received induction on myeloMATCH clinical trial:

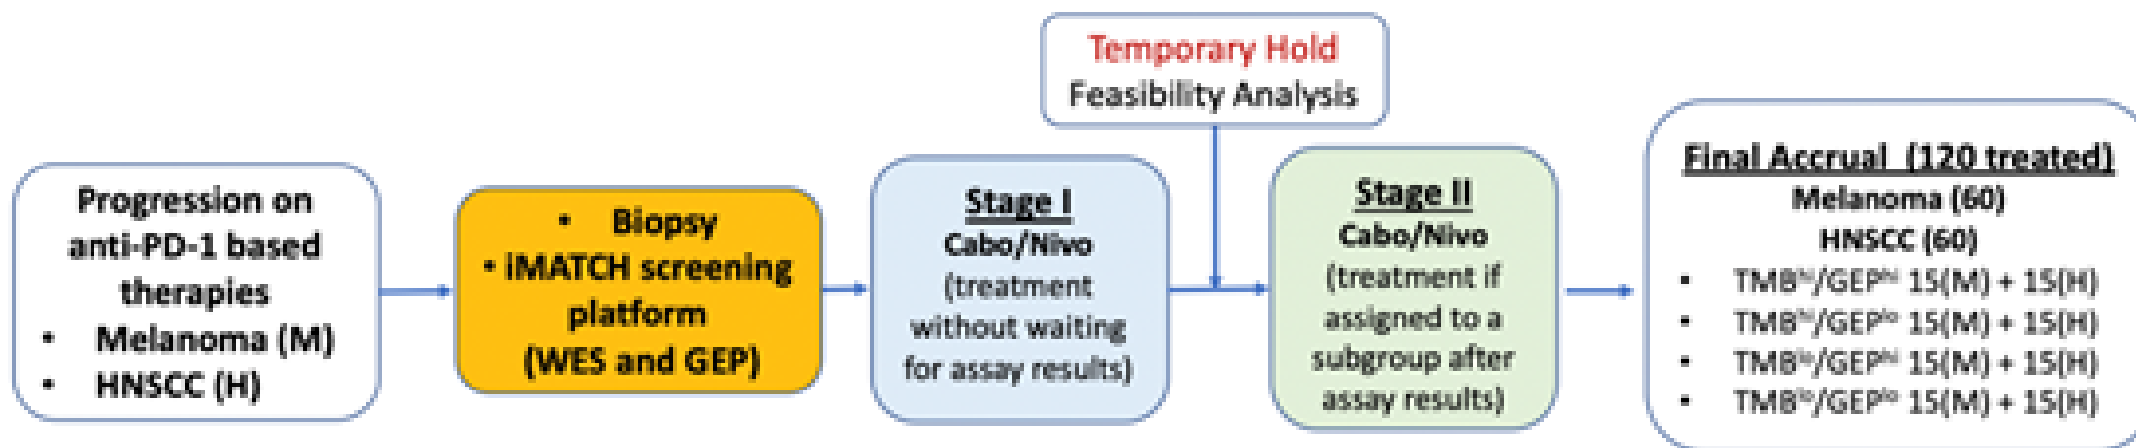

MM2YA-EA01 – age \leq 59; achieved CR/CRi on induction; MRD+

Pilot Study

S2101 - A Phase II Study of Combining Cabozantinib and Nivolumab in Participants with Advanced Solid Tumors (IO refractory Melanoma or HNSCC) Stratified by Tumor Biomarkers – an immunoMATCH Pilot Study

iMATCH

Quality Assurance Updates

- Elaine Armstrong, MS - QA Consultant

Protocol Deviations

- SWOG now follows CIRB guidance
- Potential unanticipated problem
- Continuous or serious non-compliance

Local IRB may require additional reporting

SWOG COVID-19 Deviation and Diagnosis Guidance

SWOG memo dated 6/1/22

The NCI has removed the requirement to report COVID-19 minor protocol deviations to CIRB at time of Continuing Review as follows:

- This requirement started for all trials with CR date on or after July 1, 2020 and will end **for all trials on June 30, 2022.**
- **The requirement to collect date of initial Covid diagnoses will end for most trials* on June 30, 2022.**
- In response to this change in requirement, Rave will be modified to remove the Covid Diagnosis and Deviation Form, as is appropriate.

*** Exceptions**

- **The trials that must continue to report COVID-19 Diagnoses are: S1418, S1501, S1826, S1918, and S1925.**

Additions to the SWOG Glossary (Published on the CRA Workbench)

- **ON-STUDY:**
 - Time from Registration (in OPEN) through completion requirements (including follow-up).
- **OFF-STUDY:**
 - Participant is no longer receiving protocol-directed intervention per Section 7 (protocol-directed intervention can include surveillance or observational Arm A), the site has submitted an Off-Treatment Notice and all follow-up requirements have been met.
 - This includes the infrequent occasions where participants are no longer able to be contacted for further follow-up.
- **ON-TREATMENT:**
 - Duration of time when participant is receiving protocol-directed intervention per Section 7 (protocol-directed intervention can include surveillance or observational arms).
- **OFF-TREATMENT:**
 - Participant is no longer receiving protocol-directed intervention per Section 7 (protocol-directed intervention can include surveillance or observational arms), the site has submitted an Off-Treatment Notice but is still submitting follow-up requirements per protocol.

Back to (the new) Normal

QA Audits Remote vs Onsite

2021:

➤ 69 onsite audits

306 remote audits

2022 (as of 8/31/22):

➤ 73 onsite audits

141 remote audits

The QA audit team is ready and willing to come to your site for audits but has procedures to conduct remote audits if necessary.
